Organizing Committee	
Preface	
Opening Address	
Opening Remarks	

Part I. International Cooperation on Energy

International Cooperation on Nuclear Energy W. Kenneth DAVIS	3
Nuclear Energy and International Cooperation Keichi OSHIMA	17
<i>Discussion: Part I</i>	27

Part II. Toward an Acceptable Fuel Cycle Scheme

The Nuclear Fuel Cycle: An Overview Manson BENEDICT	31
Reprocessing Technology in Europe Cyril BUCK	57
Management of the Nuclear Fuel Cycle Ryohei KIYOSE	71
<i>Discussion: Part II</i>	83

Part III. Engineering Philosophy on Safety

The Management of Nuclear Safety: Lessons Learned from the Accident at Three Mile Island Thomas H. PIGFORD	89
Nuclear Safety: Its Achievement in Perspective Armin JAHNS	103
Safety-Oriented Research on Power Reactor Fuels Yoshitsugu MISHIMA	115
<i>Discussion: Part III</i>	121

Part IV. Transition to Fast Breeder Reactors

A Breeder Strategy to Solve Uncertain Future Problems in Energy Supply: The French Example Jean F. PETIT	125
--	-----

RDD & D on the Fast Breeder Reactor
Shigehiro AN 131
Discussion: Part IV 141

Part V. Research and Development of Fusion Technologies

Nuclear Fusion Research: Status and Prospects
Hugh A. B. BODIN 145
Japan Fusion Research Activities and Future Plans
Taijiro UCHIDA 189
Discussion: Part V 209

Part VI. Nuclear Engineering and Technological Innovation

The Impact of Nuclear Engineering on Technological Improvements in
Other Fields
D. G. H. LATZKO 213
Soft Energy vs Nuclear Energy
Yoshio ANDO 229
Discussion: Part VI 239

Part VII. Conclusion

Panel Discussion: The Role of Nuclear Engineering Research and
Education for Energy Futures 243

Closing Remarks 261
Abbreviations 263
Conference Agenda 267
Index of Lecturers 271
