

CONTENTS

Opening address

M. Odera(RIKEN)

I. REVIEW TALK(invited)

24Aa.

1. Current Status of Clinical Particle Radiotherapy and Criticism against it H. Tsuji (Hokkaido Univ.)	1
2. Synchrotron Radiation Research at the Photon Factory T. Sasaki (KEK)	3
3. Interactions between Energetic ion Beams and Solids and Their Applications K. Ozawa(JAERI)	7
4. Focused Ion Beam System and Maskless Microfabrication S. Namba (RIKEN)	11

II. STATUS REPORT

24Ap.

1. Present Status of the Tristan Accelerator Construction Y. Kimura (KEK)	17
2. Status of RIKEN SSC H. Kamitsubo (RIKEN)	19
3. Present Status of Booster Synchrotron Utilization Facility at KEK H. Sasaki (KEK)	21
4. Beam Stacking Experiments at TARN T. Katayama (INS)	23
5. Initial Operation of the Photon Factory 2.5 GeV Electron Linac J. Tanaka (KEK)	29
6. Status of the PF Storage Ring K. Huke (KEK)	31
7-a. Present Status of the 600-MeV ETL Electron Storage Ring "TERAS" T. Tomimasu, T. Noguchi, S. Sugiyama, T. Yamazaki, T. Mikado and M. Chiwaki (ETL)	33
7-b. Present Status of the 500-MeV ETL ElectronLinac "TELL" and the Pion Channel T. Tomimasu (ETL)	35

8. Acceleration Characters of the PF 2.5 GeV LINAC I. Sato, H. Matsumoto, A. Enomoto and K. Takeda (KEK) ..	37
9. Status of the JAERI LINAC Y. Kawarasaki, K. Mashiko, N. Akiyama, Y. Nobusaka, T. Shoji and M. Kitajima (JAERI) ..	41
10. Present Status of the 38 MeV Osaka University Electron Linac K. Tsumori, N. Kimura, T. Yamamoto, T. Hori, S. Takeda, J. OKuma, T. Sawai, M. Kawanishi (ISIR) ..	43
11. Construction of the INS RFQ Linac "LITL" S. Arai, N. Ueda, T. Nakanishi, N. Tokuda, S. Yamada, T. Hori and A. Mizobuchi (INS) ..	47
12. Acceleration Test of the INS RFQ Linac "LITL" T. Nakanishi, N. Ueda, S. Arai, T. Hattori, T. Fukushima, Y. Sakurada, T. Homma, M. Takanaka, N. Tokuda and A. Itano (INS) ..	49
13. Status of Operation of the Variable Frequency Heavy-Ion Linac, RILAC M. Odera and RILAC group (RIKEN) ..	53
14. Heavy-ion Post Accelerator for the UTTAC 12 UD Pelletron Tandem Accelerator K. Furuno, T. Komatsubara, Y. Fukuchi and T. Kimura (Univ. Tsukuba) ..	55
15. Acceleration of Horizontally Polarized Protons and Deuterons by the RCNP Cyclotron K. Hatanaka, T. Saito, N. Matsuoka, H. Sakai, H. Tamura, K. Imai*, K. Nisimura** and M. Kondo (RCNP, *Kyoto Univ. and **INS) ..	57
16. Meson Science Research with Pulsed Muons K. Nagamine, J. Imazato, K. Nishiyama, Y. Kuno, H. Nakayama* and T. Yamazaki (Univ. Tokyo and *KEK) ..	59

III. RADIATION SAFETY & MEASUREMENT

24Bp.

1. Penetration Through Shielding Materials of Secondary Neutrons and Photons Generated by 52-MeV Protons Y. Uwamino*, T. Nakamura** and K. Shin*** (*NIRS, **INS and ***Kyoto Univ.) ..	61
2. Design of Radiation Shielding for the RIKEN SSC T. Shikata, S. Fujita, S. Yamaji, H. Kamitsubo and T. Kosako* (RIKEN and *INS) ..	63
3. Monte Carlo Analysis on Neutron Skyshine T. Nakamura and T. Kosako(INS) ..	65

4. Radiation Shielding Design and Radiation Level of PARMS A. Maruhashi, Y. Hayakawa, T. Inada and S. Suwa (Univ. Tsukuba)	67	9. A Computer Code FIGER I. Miura, M. Fukui, Y. Kadota, K. Hosono, T. Yamazaki and M. Inoue (RCNP)	97
5. Measurements of Secondary Neutron and Photon Yield from Several-Tens-MeV Light Ions K. Shin*, K. Hibi*, M. Fujii** and T. Nakamura*** (*Kyoto Univ., **NAIG and ***INS)	69	10. The Effect of a Resonance on the Beam in the RIKEN SSC N. Nakanishi, Y. Yano and A. Goto (RIKEN)	99
6. On the Scheme of Radiation Works in the KEK G. Horikoshi (KEK)	71	11. Central Region of the Injector Cyclotron M. Inoue, T. Itahashi and I. Miura (RCNP)	101
7. Air Activation by an Electron Synchrotron T. Kosako* and T. Nakamura** (*RCNST and **INS) ...	73	12. Injection and Extraction System for the 1st Ring Cyclotron T. Itahashi, M. Inoue, A. Shimizu and I. Miura (RCNP)	103
8. Evaluation of Dose Rate of Pulsed Synchrotron Radiations Emitted from LEP Colliding Machine at CERN T. Yamamoto and M. Hofert* (ISIR and *CERN)	75	13. Formulation of the RFQ Radial Matching Section N. Tokuda and S. Yamada (INS)	105
9. LET Distribution of Absorbed Dose in a Mixed Radiation Field around an Electron Linear Accelerator K. Oda, H. Koyama, T. Yamamoto and M. Kawanishi (ISIR)	77	14. Optimization of Buncher Section in RFQ Linacs S. Yamada (INS)	107
		15. The Evaluation of RF Stacking Efficiency by the Numerical Calculation T. Murakami (INS)	109

IV. BEAM DYNAMICS

24Cp.

1. Wake Field Generated by a High-Current Single Bunch S. Takeda, N. Kimura, K. Tsumori and M. Kawanishi (ISIR)	79
2. Longitudinal Stability Limit for Electron Bunches in a Double RF System Y. Chin (KEK)	83
3. On the beam of Photon Factory Storage Ring Y. Kamiya and M. Kihara (KEK)	85
4. Evaluation of the Field Homogeneity of the Magnets by Phase Space Mapping M. Kumada (KEK)	87
5. Constant Phase Tunable Insertion S. Kamada (KEK)	89
6. Mode Coupling Theory T. Suzuki, Y. Chin and K. Satoh (KEK)	91
7. Orbit Analysis of a Ring Cyclotron (I) M. Fukui, Y. Kadota, T. Yamazaki, K. Hosono, M. Inoue and I. Miura (RCNP)	93
8. Orbit Analysis of a Ring Cyclotron II) Y. Kadota, M. Fukui, K. Hosono, T. Yamazaki, M. Inoue and I. Miura (RCNP)	95

V. BEAM TECHNOLOGY & MEASUREMENT (A)

25Aa.

1. Bunch Signal Sensitization by Use of Secondary Electron Emission M. Kase (RIKEN)	111
2. Bunch Phase Monitor I. Yokoyama, M. Kase, S. Kohara and Y. Yano (RIKEN) .113	113
3. Linac Energy Tuning By Phase Control of Last Cavity M. Kase, M. Odera, T. Tonuma and T. Kambara (RIKEN) .115	115
4. Application of High Energy Charge Transfer to Beam Diagnostics I. Katayama and S. Morinobu (RCNP)	117
5. 4π -Mode Acceleration in the KEK 20 MeV LINAC T. Kato, Z. Igarashi, K. Ikegami, C. Kubota, A. Takagi, E. Takasaki, T. Takenaka, Y. Mori and S. Fukumoto (KEK)	119
6. Observation of Schottky Signal at TARN and On-line Q Measurement A. Noda, M. Takanaka, M. Yoshizawa and S. Kadota (INS)	121
7. Beam Monitor of Injector Synchrotron For UVSOR H. Yamamoto and T. Kasuga* (Fukui Univ. and *IMS) ..123	123

8. Beam Characteristics of PF Linac Injection System A. Asami, S. Ohsawa and J. Tanaka (KEK)	125
9. Beam Position Monitoring in the Photon Factory Storage Ring T. Katsura, H. Nakagawa and S. Shibata (KEK)	127
10. Beam Monitoring Systems for the ETL Storage Ring T. Noguchi, S. Sugiyama, T. Yamazaki, T. Mikado, M. Chiwaki and T. Tomimasu (ETL)	129
11. Measurements of Loss Parameter and Its Frequency Characteristics in Vacuum Components T. Ieiri (KEK)	131
12. An Observation of the Bunch Structure in Slowly Extracted Beam Spill S. Ninomiya (KEK)	133
<u>VI. BEAM TECHNOLOGY & MONITORING (B)</u>	
25Ap.	
1. Development of Undulator in the Photon Factory H. Kitamura, H. Maesawa, S. Sato, T. Koide, T. Yamakawa, T. Miyahara, A. Yagisita, Y. Suzuki and T. Sakaki (KEK)	135
2. Studies on Electron Injector of Linac for Picosecond Single Beam H. Kobayashi, T. Ueda, T. Kobayashi, and Y. Tabata (Univ. Tokyo)	137
3. Perturbators of Injector Synchrotron for UVSOR M. Hasumoto, K. Takami* and A. Uchida (IMS and *Kyoto Univ.)	139
4. Project of Polarized Proton Acceleration in KEP PS S. Hiramatsu, D. Arakawa, T. Kawakubo, J. Kishiro, K. Muto, H. Sato, K. Yokoya, K. Imai* and N. Tamura* (KEK and *Kyoto Univ.)	141
5. Beam Monitors for Polarized Beam Z. Igarashi, Y. Mori, S. Fukumoto and Y. Wakuta* (KEK and *Kyushu Univ.)	143
6. Beam Position Monitoring and Analysing System in KEK D. Arakawa, H. Ishii, J. Kishiro and S. Hiramatsu (KEK)	145
7. C.O.D. Correction for Polarized Proton Acceleration H. Sato, S. Hiramatsu, S. Ninomiya and D. Arakawa (KEK)	147
8. Beam Diagnostic System for the RIKEN SSC Y. Yano, N. Kishida, A. Goto and N. Nakanishi (RIKEN)	149

9. Beam Diagnostic Instrumentation of the TRISTAN Accumulation Ring T. Ieiri, H. Ishii, Y. Mizumachi, A. Ogata, J.L. Pellegrin* and M. Tejima (KEK and *SLAC)	151
10. Beam Position Monitors in the TRISTAN Accumulation Ring M. Tejima, H. Ishii, H. Ishimaru, T. Ieiri, Y. Mizumachi and A. Ogata (KEK)	153

VII. APPLICATIONS OF ACCELERATORS

25Ba.	
1. Present Status of the Fusion Neutronics Source (FNS) T. Nakamura, H. Maekawa, J. Kusano, Y. Oyama, Y. Ikeda, C. Kutsukake, S. Tanaka and S. Tanaka (JAERI)	155
2. Osaka University Intense 14 MEV Neutron Source (OKTAVIAN) and Its Utilizations for Fusion Studies K. Sumita, A. Takahashi, T. Iida, J. Yamamoto, S. Imoto and K. Matsuda* (Osaka Univ. and *Nissin High Voltage Co. Ltd.)	157
3. Practical Use Neutron Radiography with Baby Cyclotron Y. Nozaki, N. Saito, U. Fukushima, T. Nakamura, J. Furuta,* E. Hiraoka,* J. Sekita**, A. Murakoshi**, T. Yamada***, S. Wakasa***, T. Tanaka***, H. Yoshida*** (NSDAJ, *Radiation Center of Osaka Pref., **Tesco Corporation and ***Japan Steel Industries Co. Ltd)	159
4. A Simple Method for Large-Current Irradiation of a Metal Target in the Cyclotron M. Fujioka, T. Shinozuka, K. Ishii and K. Sera (Tohoku Univ.)	161
5. Effects of 10 MeV Proton Irradiation on Electrical Properties of GaAs M. Kitagawa, K. Morimoto, S. Yoshida*, K. Mitsui, and Y. Uukimoto* (Radiation Center of Osaka Pref. and *LSI, Mitsubishi Electric Co, Ltd)	163
6. Development of the Proton Microprobe for the Surface Analysis K. Okuda, K. Saneyoshi, M. Ogawa and E. Arai (T.I.T.)	165
7. Applications of Particle Induced X-Ray Emission Analysis for Atmospheric Aerosol Y. Hashimoto, S. Tanaka and R. Chiba* (Keio Univ. and *T.I.T)	167
8. Absolute Measurement of Undulator Radiation Spectra H. Maesawa, H. Kitamura, T. Sasaki, S. Mitani*, A. Mikuni*, Y. Suzuki***, H. Kanamori*** and H. Tamamushi*** (KEK, *Osaka City Univ., **ISSR and	

***Univ. Tokyo)	169
9. Reaction Dynamics of Atoms and Molecules Using the Pulse Character of Synchrotron Radiation Y. Hatano(T.I.T)	171
10. Measurements of the Yield of Hydrated Electrons by Means of Picosecond Pulse Radiolysis T. Sumiyoshi and M. Katayama (Hokkaido Univ.)	175
11. Atomic and Molecular Processes in Ionized Gases as Studied by a Pulse Radiolysis Method Y. Hatano, K. Shinsaka, M. Toriumi, H. Koizumi, M. Ukai, E. Suzuki, and Y. Tanaka (T.I.T)	177
12. Excess Electron Transport and Electron-Ion Recombination in Nonpolar Condensed Media Y. Hatano, K. Shinsaka, Y. Nakamura, and T. Tezuka (T.I.T)	181

VIII. BIOLOGICAL & MEDICAL APPLICATION

25Bp.

1. A New Scattering Chamber of Ion-Irradiation for Biological Samples in Air I. Yamane, H. Eguchi, H. Yamashita, A. Tatara* and H. Yamaguchi * (RCNST and *Univ. Tokyo)	183
2. Application of Thermoluminescence Dosimeter for Dose Measurement of High LET Radiation F. Yatagai and K. Nakano (RIKEN)	185
3. Neutron-induced DNA Damage and Cellular Lethality in Cultured Mammalian Cells K. Sakai, S. Suzuki*, and S. Okada** (Univ. Tokyo, *IMS-Univ. Tokyo and **RIKEN)	187
4. Mutation Induction of Chinese Hamster V79 Cells by Nitrogen ion Beams G. Okada, K. Kurita, T. Nishimura, K. Nakano, and I. Kaneko (RIKEN)	189
5. Recovery from Potentially Lethal Damage of Human Normal Fibroblast IMR 90 Cells after Irradiation of Nitrogen Ion Beams I. Kaneko, T. Ohno*, T. Nishimura, G. Okada, and K. Nakano (RIKEN and *NIRS)	191
6. Recovery from Potentially Lethal Damage of Human Melanoma Cells after Irradiation of Protons and Nitrogen Ion Beam K. Eguchi, S. Sato, M. Yaguchi, T. Inada, K. Kobayashi, and I. Kaneko* (Univ. Tsukuba and *RIKEN)	193
7. Refinement and Dose Evaluation of 52-MeV Proton	

Irradiation Course for Biological and Medical Study Y. Uwamino, T. Nakamura*, T. Ohkubo*, A. Ito**, S. Ohtsu** and T. Arimoto*** (NIRS, *INS, **IMS-Univ. Tokyo and ***Hokkaido Univ.)	195
8. Production of Short-lived Radioactive Gases by an In-house Small Cyclotron and Its Clinical Use H. Saji, R. Morita, A. Yokoyama, K. Torizuka, S. Tazawa*, K. Fujii*, Y. Nishihara*, Y. Adachi*, and J. Adachi*. (Kyoto Univ. and *SHI)	197
9. Outline of PARMS and Some Preliminary Dosimetry T. Inada, S. Suwa, A. Maruhashi, Y. Takada, K. Kobayashi and T. Kitagawa (PRMSC and Univ. Tsukuba)	199
10. On the Possible Medical Application of μ e Decay and μ SR Measurements K. Nagamine and M. Akisada* (Univ. Tokyo and *Univ. Tsukuba)	201

IX. VACUUM

25ca.	
1. Design of the Acceleration Chamber and the Evacuation System of the RIKEN SSC S. Nakajima, K. Ikegami, Y. Oikawa and I. Takeshita (RIKEN)	203
2. Vacuum System of the RCNP Ring Cyclotron A. Shimizu and I. Miura (RCNP)	205
3. Test of the Model Pneumatic Expansion Seal K. Ikegami, S. Nakajima and Y. Oikawa (RIKEN) ...	207
4. New Sealing Method for Metal Gate Valve T. Terasawa, M. Saito, F. Kimijima and C. Hayashi (ULVAC)	209
5. Construction and Heat In-leak Measurements of a Long Cryogenic Transfer Line J. Yuyama, H. Yamakawa, M. Saito, T. Kawai and S. Komiya (ULVAC)	211
6. All Aluminum Alloy Vacuum System for Tristan Main Ring H. Ishimaru, T. Momose, K. Narushima, H. Mizuno, J. Watanabe, T. Kubo H. Yamaguchi, M. Kobayashi and G. Horikoshi (KEK)	213
7. Synchrotron Radiation Outlet of UVSOR K. Sakai, H. Yamamoto* and M. Watanabe (IMS and *Fukui Univ.)	215
8. Vacuum System of the Electron Storage Ring in the PF M. Kobayashi and H. Kitamura (KEK)	217
9. Argon Glow Discharge Cleaning in the Photon Factory	

Vacuum System	
H. Kitamura, M. Kobayashi, Y. Takiyama and K. Huke (KEK)	219
10. Preliminary Experiment on Discharge Cleaning of a Sector Magnet Vacuum Chamber for the RIKEN SSC (1)	
Y. Ishibe, H. Ohyama, Y. Sakamoto, K. Ikegami, S. Nakajima, Y. Oikawa and S. Motonaga (RIKEN) ...	221
11. Preliminary Experiment on Discharge Cleaning of a Sector Magnet Vacuum Chamber for the RIKEN SSC (2)	
K. Ikegami, S. Nakajima, Y. Oikawa, S. Motonaga, Y. Ishibe, H. Ohyama and Y. Sakamoto (RIKEN)	223
X. ION SOURCE	
25Cp.	
1. Measurement of Electron-spin Polarization of Sodium Atoms for Optical Pumping Type Polarized Ion Source	
Y. Mori, K. Ikegami, A. Takagi and S. Fukumoto (KEK).225	
2. Characteristics of ECR Ion Source for Optical Pumping Type Polarized Ion Source	
A. Takagi, Y. Mori, K. Ikegami and S. Fukumoto (KEK).227	
3. Emittance Measurement of 16.5 GHz ECR Ion Source	
K. Ikegami, A. Takagi, Y. Mori and S. Fukumoto (KEK).229	
4. Monochromatic Oscillation Generated in a Low Power Ion Magnetron	
N. Tanizuka (Univ. Osaka Pref.) 231	
5. Production and Acceleration of Light- and Medium- Heavy Ions at the JAERI Tandem Accelerator	
E. Minehara, S. Abe, C. Kobayashi, S. Kikuchi, S. Hanashima, Y. Sato, I. Ohuchi, T. Yoshida, S. Kanda, K. Horie, S. Tajima, Y. Tsukihashi and S. Kanazawa (JAERI) 233	
6. Development in Heavy Ion Acceleration at RCNP	
T. Itahashi, T. Saito, H. Ogata, N. Matsuoka, K. Hosono, M. Inoue, A. Shimizu, I. Miura, T. Yamazaki and M. Kondo (RCNP) 235	
7. Heavy Ion Source for IPCR Cyclotron	
T. Kageyama, K. Ikegami, K. Ogiwara, S. Kohara and I. Kohno (RIKEN) 237	
8. Multiply Charged Ion Production by the RIRAC PIG Source	
M. Kase, Y. Miyazawa, T. Chiba, M. Hemmi, T. Inoue and T. Kambara (RIKEN) 239	
9. A Pig Ion Source with REC Permanent Magnets	
E. Arai, K. Hayashi and K. Satoh (T.I.T) 241	
10. Present Status on the Development of a Beam Plasma Heavy Ion Source (BPHIS-1) and the Future Program	

H. Kametani, M. Horie, K. Komatsu, H. Ijiri, and
M. Matoba (Kyushu Univ.) 243

XI. RF-TECHNOLOGY

26Aa.

1. RF System for the RCNP Ring Cyclotron
T: Saito, M. Shimizu, H. Tamura and I. Miura (PCNP) .245
2. Model Test of 1/5 Scale Movable Box Type RF Resonator for the RIKEN SSC
K. Ogiwara, T. Fujisawa, and Y. Oikawa (RIKEN) 247
3. Basic Study of the RF High Power Amplifier for the RIKEN SSC (Study of the Screen Bypass Capacitor for the Final Stage)
S. Kohara, T. Fujisawa and Y. Chiba (RIKEN) 249
4. Beam Lock System for TARN
S. Watanabe, N. Tokuda, T. Katayama, M. Yoshizawa
(INS) 251
5. The Phasing System in the PF Linac
Y. Sato, Y. Otake, S. Anami, S. Fukuda, T. Shidara,
H. Honma, K. Nakao and J. Tanaka (KEK) 253
6. Test of a 5-Cell DAW Cavity
S. Noguchi, E. Ezura, T. Furuya, T. Higo,
S. Inagaki, K. Kitagawa, Y. Kojima, H. Mizuno,
H. Nakanishi, T. Takashima and K. Takata (KEK) ... 255
7. Properties of the Disk-And-Washer Cavity
S. Inagaki, T. Higo, K. Takata and H. Nakanishi
(KEK) 257
8. Acceleration Test of DAW Structure
T. Tanaka, K. Tsukada, K. Satoh, K. Hayakawa,
T. Ozaki, N. Nakamura, K. Okamoto, O. Takeda and
M. Nishinaka (Nihon Univ.) 259
9. Development of an RFQ Model Cavity in KEK
T. Kato, Z. Igarashi, C. Kubota, E. Takasaki,
T. Takenaka, S. Fukumoto, T. Hongo, Y. Higashi,
M. Sato and H. Kawamata (KEK) 261
10. Design for Split-Coaxial Structure
Y. katayama, Y. Ikeda and H. Takekoshi (Kyoto Univ.).263
11. Three Dimensional Analysis of RF Electromagnetic Field by Finite Element Method
M. Hara, T. Wada, T. Fukasawa and F. Kikuchi* (RIKEN
and *Univ. Tokyo) 265
12. Operation of the KEK-PF RF System
H. Kobayakawa, K. Takata, S. Tokumoto and
Y. Yamazaki (KEK) 267

13. RF System Design for the TRISTAN Accumulation Ring
E. Ezura, T. Furuya, T. Higo, S. Inagaki,
K. Kitagawa, Y. Kojima, H. Nakanishi, S. Noguchi,
T. Takashima and K. Takata (KEK) 269

14. Two Dimensional Analysis of RF Electromagnetic Fields
by Finite Element Method
M. Hara, T. Wada, T. Fukasawa and F. Kikuchi* (RIKEN
and *Univ. Tokyo) 271

XII. FUTURE PLAN

26Ap.

1. Conceptual Design for a Double-Sided Microtron
K. Hayakawa, K. Tsukada, K. Sato and T. Tanaka
(Nihon Univ.) 273
2. A Proposed High-Current Injector for the Osaka
University Single Bunch Electron Linear Accelerator
S. Takeda, K. Tsumori, N. Kimura, T. Yamamoto,
J. Ohkuma, T. Sawai, T. Hori and M. Kawanishi (ISIR). 275
3. Proposal for a University Accelerator Facility for
Physics and Medicine
H. Takekoshi (kyoto Univ.) 279
4. Proton Synchrotron for Intense Neutron and Meson Beam
T. Adachi, S. Inagaki, Y. Irie, N. Kaneko,
T. Kawakubo, N. Kumada, I. Sakai, H. Sasaki,
H. Someya, H. Baba, S. Matsumoto, M. Miki and
Y. Yano (KEK) 281
5. New Project of 1.5 GeV Electron Linac and Pulse
Stretcher
M. Sugawara (Tohoku Univ.) 283
6. Possibility of Deuteron Acceleration by the KEK Proton
Synchrotron
M. Kondoh (KEK) 287
7. Design Study of the RCNP Ring Cyclotron
I. Miura, T. Yamazaki, A. Shimizu, M. Inoue,
K. Hosono, T. Itahashi, T. Sato, M. Fujiwara,
Y. Fujita, Y. Kadota, M. Fuki and M. Kondo (RCNP) .. 289
8. Cyclotron Project of Hiroshima University
Y. Yoshizawa, M. Inoue, H. Inoue, H. Noma,
T. Horiguchi, T. Sugitate, Y. Iwata, H. Hasai,
K. Iwatani and F. Nishiyama (Hiroshima Univ.) 291
9. Very Big Accelerator
Y. Yamaguchi (Univ. Tokyo) -
10. TRISTAN II
S. Ozaki (KEK) -

XIII. NORMAL & SUPERCONDUCTING MAGNET (A)

26Ba.

1. Present Status of the Sector Magnets of the RIKEN SSC
S. Motonaga (RIKEN) 293
2. Measurements on the Trim Coil Fields and Optimization
of the TRIM Coil Currents for the RIKEN SSC
A. Goto, H. Takebe, S. Motonaga and T. Wada (RIKEN) .. 295
3. Magnet Model Study for a Proposed Ring Cyclotron at
RCNP
K. Hosono, I. Miura, T. Itahashi, M. Inoue,
A. Shimizu and M. Kibayashi (PCNP) 297
4. Distortion Measurements for the RIKEN SSC MAGNETS
H. Saito, T. Sato and J. Abe (SHI) 299
5. Magnetic Field Measuring System for the RIKEN SSC
SECTOR MAGNETS
H. Takebe, I. Takeshita, J. Fujita, I. Yokoyama,
T. Wada and S. Motonaga (RIKEN) 301
6. Estimation of the Mechanical Abbaration-Limited Energy
Resolution in a Model Beam-Analyzing Magnet
Y. Okuma (RCNP) 303
7. Measurement of the P.M.Q.'s Field
Y. Ikeda, Y. Katayama and H. Takekoshi (Kyoto Univ.) 305
8. Magnetic Field Control Using NMR Gaussmeter
N. Ishii and T. Mita (SHI) 307
9. Design Study of Magnetic Deflection Channels for the
RIKEN SSC
N. Kishida and Y. Yano (RIKEN) 309
10. Magnets of Injector Synchrotron for UVSOR
O. Matsudo, M. Hasumoto and M. Watanabe (IMS) 311
11. 5 T Superconducting Dipole Magnet
S. Mistunobu, Y. Ajima, K. Hosoyama, J. Kishiro,
Y. Kobayashi, Y. Sakakibara, A. Terashima,
A. Yamamoto, T. Hongo and H. Hirabayashi (KEK) ... 313
12. Construction of a Superconducting Wiggler
T. Yamakawa, H. Kitamura, S. Sato, E. Takasaki,
T. Shioya and C. Lesmond* (KEK and *CEN Saclay) ... 315

XIV. NORMAL & SUPERCONDUCTING MAGNET (B)

26Bp.

1. Bi-resonant Circuit for Excitation of Synchrotron Magnet	H. Someya, T. Adachi, M. Kumada, H. Baba, S. Matsumoto, H. Sasaki and I. Sakai (KEK)	317
2. Improved Control System of Thyristor Reactive Power Compensator for Main Ring Magnet Power Supply of 12 GeV P.S.	S. Matsumoto, H. Baba, H. Sato, T. Sueo and K. Mikawa (KEK)	319
3. Design Considerations on the Active Filter for the Bending Magnet Power Supply of TRISTAN Accumulation Ring	H. Fukuma, T. Kubo, A. Kabe, S. Matsumoto, H. Baba and K. Endo (KEK)	321
4. Dynamic Structural Analysis of the Sector Magnet of the RIKEN SSC	M. Hara, T. Wada and M. Deto (RIKEN)	323
XV. ELECTROSTATIC ACCELERATOR & APPLICATION BEAM INJECTION & BEAM LINE		
7. Ion Implantation System for High Energy Beams	T. Kawai, T. Shinyama, Y. Yamamoto and T. Ishida (Nissin-High Voltage Co., Ltd.)	339
8. High Voltage Equipment of Polarized Proton Preaccelerator	C. Kubota, S. Fukumoto, Y. Mori and E. Takasaki (KEK)	341
9. The Injection System for the ETL Storage Ring	S. Sugiyama, T. Noguchi, T. Yamazaki, T. Mikado, M. Chiwaki and T. Tomimatsu (ETL)	343
10. The RIKEN SSC Beam Handling System	T. Inamura, N. Kishida and Y. Hata (RIKEN)	345
11. A Plan of the Accelerator Tube and Beam Transport System of e^+ Generator Linac	I. Sato, H. Matsumoto, A. Enomoto, K. Takeda, Y. Iino* and K. Inoue* (KEK and *Mitsubishi Heavy Industry Co., Ltd.)	347
12. Design of the TRISTAN Injection Line	K. Ebihara, K. Satoh, Y. Sakamoto, M. Toda, H. Nakayama and I. Satoh (KEK)	351

26Ca

1. Present Status of the JAERI Tandem Accelerator	C. Kobayashi (JAERI)	325
2. Phenomenology of Conditioning the Pelletron 12UD at UTTAC	S. Seki, T. Ishihara, H. Oshima, Y. Tajima, S. Ishii, M. Oyaizu and T. Takahashi (Univ. Tsukuba) ..	329
3. The Electrostatic Tandem Accelerator of Kobe University of Mercantile Marine	S. Yano, T. Nakajima and A. Kitamura (Kobe Univ. Mercantile Marine)	331
4. ETL 4UH-HC Pelletron	N. Kobayashi, K. Kudoh, T. Nishijima, I. Nashiyama, H. Watanabe, H. Sekiguchi, M. Kageyama, T. Kinoshita, T. Michikawa and E. Teranishi (ETL) ..	333
5. RIKEN Tandetoron	H. Sakairi, E. Yagi, T. Kobayashi and T. Urai (RIKEN)	335
6. Accelerator Mass Spectroscopy at Tokyo University Tandem	Y. Hashimoto, K. Yoshida, H. Yamashita, H. Kobayashi, I. Yamane, M. Imamura, T. Inoue, S. Shibata, S. Tanaka, K. Mochiki, T. Sato, K. Hasegawa, H. Nagai, M. Honda and K. Kobayashi* (Univ. Tokyo and *Kyushu Univ.)	337

XVI. CONTROL

26Cp.

1. The On-line Beam Control and Diagnosis of TARN	M. Takanaka, S. Watanabe, K. Chiba, T. Katayama, A. Noda and M. Yoshizawa (INS)	353
2. Control System of 2.5 GeV Electron Linac in Photon Factory	K. Nakahara, T. Urano, Y. Otake and I. Abe (KEK) ..	355
3. Control System of TRISTAN	T. Kamei, T. Katoh, E. Kikutani, Y. Kimura, S. Kurokawa, K. Oide and S. Shibata (KEK)	357
4. Interfacing of TRISTAN Control System	H. Ikeda, I. Komada, N. Nakagawa and K. Uchino (KEK) ..	359
5. Timing Control for TRISTAN	E. Kadokura, K. Ishii, T. Katoh and K. Oide (KEK) ..	361
6. Control System for JAERI Tandem Accelerator	Y. Tomita, I. Ohuchi, S. Kanda, K. Horie, Y. Tshukihashi and S. Hanashima (JAERI)	363
7. Design of Control System of the RIKEN SSC	J. Fujita, T. Kambara, K. Shimizu, T. Wada, Y. Yano and I. Yokoyama (RIKEN)	365
8. Computer Control of Clinical Cyclotron "CYPRIS"	M. Maruyama, K. Hoshika, T. Hiroishi, Y. Kumata, K. Fujii and J. Abe (SHI)	367
