

## Contents

### Opening Address

T. Nishikawa (KEK)

### A. Invited Talk

1. Development of high-field superconducting materials  
K. Tachikawa (NRIM)
2. Recent advances in opto-electronics  
S. Gonda (ETL)
3. Recent development of permanent magnets containing rare earths  
M. Sagawa (SSM)

### B. Status of Accelerator Construction and Operation

1. Present status of KEK 12 GeV proton synchrotron  
M. Kondoh (KEK) ..... 1
2. Status of the KEK 2.5 GeV electron linac  
J. Tanaka (KEK) ..... 3
3. Construction and operation of the TRISTAN accumulation ring  
G. Horikoshi and the crew of TRISTAN accelerator group (KEK) ..... 6
4. Construction of the TRISTAN main ring  
Y. Kimura, for the TRISTAN accelerator group (KEK) ..... 9
5. Status of KEK-PF storage ring  
K. Huke (KEK) ..... 12
6. Present status of UVSOR  
M. Watanabe, T. Kasuga, H. Yonehara, A. Uchida, K. Sakai, O. Matsudo,  
T. Kinoshita, M. Hasumoto, J. Yamazaki, E. Nakamura (IMS)  
H. Yamamoto (Nagoya Univ.), K. Takami (Kyoto Univ.)  
T. Katayama and K. Yoshida (INS), M. Kihara (KEK)  
G. Saxon (Daresbury Lab.) ..... 15
7. Present status of the 600-MeV ITL storage ring as an electron undulating  
ring for VLSI lithography  
T. Tomimasu, T. Noguchi, S. Sugiyama, T. Mikado, M. Chiwaki (ETL) ..... 18
8. Status of the RIKEN SSC  
RIKEN SSC group  
(Presented by S. Motonaga) (RIKEN) ..... 21
9. Present status and developments at the Osaka RCNP cyclotron  
T. Itahashi, T. Saito, H. Ogata, N. Matsuoka, K. Hosono,  
M. Inoue, A. Shimizu, I. Miura, T. Yamazaki, H. Sakai,  
K. Hatanaka and M. Kondo (RCNP) ..... 25
10. Status report on INS SF cyclotron  
Y. Sakurada, M. Fujita, T. Honma, T. Yamazaki, Y. Ohshino and  
N. Yamazaki (INS) ..... 28
11. Present status of baby cyclotron  
T. Yamada (JSW) ..... 31
12. Present status of UTTAC tandem accelerator  
S. Seki (Tsukuba Univ.) ..... 34

### C. Ion Source and DC Accelerator

1. An extension to the negative ion injector for the JAERI tandem accelerator  
E. Minehara, T. Yoshida, A. Abe, S. Kanazawa, S. Hanazima  
K. Horie, Y. Tsukihashi (RIKEN) ..... \*\*

2. Automatic control of gas circulation and gas-feed system for ion source of 160 cm cyclotron	
T. Noda, K. Ikegami, N. Kamiyama and I. Kohno (RIKEN).....	36
3. Acceleration of heavy ions at the Tohoku University cyclotron	
T. Yamaya, K. Kotajima, T. Shinozuka and M. Fujioka (Tohoku Univ.).....	38
4. Present status of KEK polarized ion source	
K. Ikegami, Y. Mori, A. Takagi and S. Fukumoto (KEK).....	41
5. Multicusp H <sup>-</sup> ion source at KEK	
A. Takagi, Y. Mori, I. Ikegami, Z. Igarashi, C. Kubota and S. Fukumoto (KEK).....	44
6. A heavy-ion post accelerator and a new beam bunching system for the University of Tsukuba tandem	
K. Fruno, T. Komatsubara, Y. Fukuchi, T. Kimura T. Ishihara and T. Seki (Tsukuba Univ.).....	47
7. Improvement of the pellet chains in the tandem accelerator laboratory of Kyushu University	
A. Isoya, T. Nakashima, K. Kimura and S. Mitarai (Kyushu Univ.).....	50
<u>D. Linac</u>	
1. Design of 40 MeV Alvarez linac	
S. Fukumoto, Z. Igarashi, K. Ikegami, T. Kato, C. Kubota Y. Mori, A. Takagi, E. Takasaki, T. Takenaka S. Machida* (KEK, *Tokyo Univ.).....	53
2. New Alvarez type linac structure with chain-like electrodes	
M. Odera, M. Hemmi, G. Goto, M. Hara and M. Kase (RIKEN).....	56
3. The interdigital H-type structure developed at INS	
S. Yamada, T. Hattori*, T. Fujino, T. Fukushima T. Murakami*, E. Tojyo and K. Yoshida (INS, *T.I.T.).....	59
4. Tokyo Institute of Technology heavy-ion linear accelerator system	
E. Arai, T. Hattori, Y. Oguri and M. Ogawa (T.I.T.).....	62
5. Acceleration unit of positron linac	
I. Satoh, H. Matsumoto, S. Enomoto, K. Takeda, T. Ohgoe J. Tanaka, Y. Iino* (KEK, *Mitsubishi).....	65
6. Characteristics of PF linac injection system	
A. Asami, S. Ohsawa, T. Shidara, T. Urano and J. Tanaka T. Ozaki* (KEK, *Nihon Univ.).....	68
7. Design of the injection system of positron generator	
A. Asami, T. Ohsawa, S. Anami, T. Shidara, T. Ozaki and H. Matsumoto (KEK).....	71
8. Present status of the JAERI-Linac	
K. Mashiko, Y. Nobusaka, N. Akiyama, T. Shoji, N. Ishizaki and Y. Kawarasaki (JAERI).....	74
9. Present status of the Osaka University single bunch electron linac	
K. Tsumori, S. Takeda, T. Yamamoto, T. Hori, N. Kimura, J. Ohkuma, T. Sawai, S. Suemine* and M. Kawanishi (Osaka Univ., *Unicon System).....	77
10. The wake potential and the energy spread of a high current single bunch	
S. Takeda, N. Kimura, K. Tsumori, M. Kawanishi, T. Shintake* (ISIR, *KEK).....	80
11. Measurements on the post stabilized linac	
S. Machida, T. Kato* and S. Fukumoto* (Tokyo Univ., *KEK).....	83
12. Effects of gaps at longitudinal vane joints on RFQ field	
N. Ueda, T. Nakanishi and K. Inoue* (INS, *Toshiba).....	86

13. RFQ development at INS	
T. Nakanishi, N. Ueda, S. Arai S. Yamada and A. Mizobuchi (INS).....	89
14. Split coaxial RFQ linac with modulated vane	
S. Arai, T. Fujino, T. Fukushima, E. Tojyo, N. Tokuda and	
T. Hattori* (INS, *T.I.T).....	92
15. Acceleration test stand of the KEK 750 keV RFQ	
E. Takasaki, T. Kato, S. Fukumoto, Y. Mori, Z. Igarashi,	
K. Ikegami, C. Kubota, A. Takagi, T. Takenaka and	
S. Machida* (KEK, *Tokyo Univ.).....	95
16. Operation of split coaxial RFQ	
Y. Katayama, M. Sawamura, Y. Iwashita and H. Takekoshi (ICR).....	98
<u>E. RF Acceleration System</u>	
1. The improvement of the auto-tuning system in KEK-PS main ring RF cavity	
S. Ninomiya (KEK).....	100
2. RF acceleration cavity for TARN II	
A. Itano and M. Takanaka (NIRS)	
M. Fujita, M. Kanazawa, M. Kodaira, T. Kurihara, A. Mizobuchi,	
K. Sato, E. Tojyo, S. Watanabe, N. Yamazaki and M. Yoshizawa (INS).....	103
3. Control of RF acceleration system for TARN II	
K. Sato, S. Watanabe, A. Itano, M. Fujita, E. Tojyo	
N. Yamazaki, T. Kurihara, M. Yoshizawa, M. Takanaka,	
M. Kanazawa, M. Kodaira and M. Mizobuchi (INS).....	105
4. An aluminum RF cavity for the ring cyclotron project	
T. Saito, H. Tamura, A. Shimizu, M. Inoue, T. Itahashi,	
and I. Miura (RCNP).....	108
5. 12-cell DAW structures in the TRISTAN accumulator ring	
S. Noguchi, H. Nakanishi, T. Higo and K. Takata (KEK).....	111
6. Development of the APS cavity for TRISTAN e <sup>+</sup> e <sup>-</sup> storage ring	
T. Higo, S. Inagaki, Y. Yamazaki and K. Takata (KEK).....	114
7. Initial operation of the RF system for TRISTAN AR	
E. Ezura, H. Hayano, T. Higo, S. Inagaki, S. Isagawa,	
H. Nakanishi, M. Ono, T. Takashima, K. Takata and Y. Takeuchi (KEK).....	117
8. Phase stabilization of RF reference line for TRISTAN AR	
H. Hayano, E. Ezura and K. Kitagawa (KEK).....	120
9. 500 MHz three cell superconducting cavity	
T. Furuya, K. Hara, K. Hosoyama, Y. Kojima, S. Mitsunobu,	
S. Noguchi, T. Nakazato and K. Saito (KEK).....	122
10. Superconducting cavity beam test in the TRISTAN accumulator ring	
S. Noguchi, T. Furuya, K. Hara, K. Hosoyama, Y. Kojima,	
S. Mitsunobu, T. Nakazato and K. Saito (KEK)	
H. Heinrichs (Univ. of Wuppertal).....	124
11. Development of high gradient accelerating cavities	
I. Satoh, H. Matsumoto, T. Shidara and M. Yoshioka* (KEK, *INS).....	*
12. Status of the high power klystrons at the PF linac	
S. Fukuda, S. Anami, T. Shidara, Y. Saitoh, H. Hanaki,	
H. Honma and K. Nakao (KEK).....	127
13. Resonant ring test of klystron windows	
T. Onodera and S. Yamashita (Mitsubishi).....	*
14. LASERTRON: Laser switched microwave source for linear collider in the TeV region	
T. Shidara, Y. Fukushima, T. Kamei, H. Matsumoto, H. Mizuno,	
S. Noguchi, I. Satoh, T. Shintake and K. Takata (KEK)	
H. Kuroda, N. Nakano, H. Nishimura and K. Soda (ISSP)	
M. Mutou and M. Yoshioka (INS)	

M. Miyao (Shizuoka Univ. ) Y. Kato and T. Kanabe (Osaka Univ.)	
S. Takeda (ISIR).....	130
15. Beam dynamics of LASERTRON	
T. Shintake, H. Nishimura*, S. Takeda** (KEK, *ISSP, **ISIR).....	*
<u>F. Beam Monitor and Beam Handling</u>	
1. A method to measure two-dimensional motion of orbit center with three radial differential probes	
Y. Yano and A. Goto (RIKEN).....	133
2. Diagnostic apparatus for polarized H <sup>-</sup> beam at KEK 750 keV and 20 MeV lines	
Z. Igarashi, Y. Mori and S. Fukumoto (KEK).....	135
3. The main ring polarimeter at KEK 12 GeV PS	
H. Sato, S. Hiramatsu, T. Toyama, D. Arakawa	
H. Sakamoto*, K. Imai** and N. Tamura** (KEK, *Tsukuba Univ., **Kyoto Univ.).....	138
4. Fast rotary beam scraper in KEK PS booster	
T. Toyama, H. Sato, S. Hiramatsu and D. Arakawa (KEK).....	141
5. Position measurement of faint beam with electrostatic monitor	
S. Watanabe, N. Tokuda, M. Takanaka and A. Noda (INS).....	143
6. Beam position monitoring system in UVSOR storage ring	
T. Kasuga, H. Yonehara, M. Hasumoto and T. Kinoshita (IMS).....	145
7. Observation of bremsstrahlung caused by ion trapping	
M. Kobayashi, K. Huke, S. Ban and H. Hirayama (KEK).....	148
8. Optical beam diagnostics in TRISTAN accumulation ring	
A. Ogata and Y. Mizumachi (KEK).....	151
9. Performance of the beam position monitors of the TRISTAN accumulation ring	
T. Ieiri, H. Ishii, Y. Mizumachi, A. Ogata, T. Shintake and M. Tejima (KEK).....	154
10. The transverse feedback system for the TRISTAN AR	
T. Ieiri, Y. Mizumachi (KEK) J. Pellegrin (SLAC).....	157
11. Beam dynamics experiments using transverse feedback system	
T. Ieiri, K. Nakajima, K. Yokoya and Y. Mizumachi (KEK).....	160
12. Design and construction of twin linac pulse radiolysis system	
H. Kobayashi, T. Ueda, T. Kobayashi, and U. Tabata (Tokyo Univ.).....	163
13. Beam chopper for GEMINI	
Y. Yano, T. Kawakubo, M. Kumada and H. Sasaki (KEK).....	166
14. Pulsed beam deflection and transport systems of the ETL linac	
S. Sugiyama, T. Noguchi, T. Yamazaki, T. Mikado, M. Chiwaki and T. Tomimasu (ETL).....	169
15. Production of quasi-monochromatic photon beams from Compton backscattered laser light at electron storage ring	
T. Yamazaki, T. Noguchi, S. Sugiyama, T. Mikado, M. Chiwaki and T. Tominasu (ETL).....	172
16. Main beam lines at the Photon Factory 2.5 GeV storage ring	
T. Koide, S. Sato and M. Kanaya (KEK).....	175
17. Generation of high duty cycle, tagged and polarized photon beam	
T. Fukushima, M. Kasuya, T. Kitami, T. Miyachi, M. Mutou	
H. Tsujikawa, K. Yoshida, K. Watanabe, K. Baba, I. Endo,	
T. Sugitate, Y. Sumi, K. Takahashi and T. Maki (INS).....	178
18. Gamma ray source using internal targets in the TRISTAN accumulation ring	
K. Oide, H. Fukuma, S. Kamada, M. Kikuchi, T. Momose,	
K. Satoh, T. Shintake and M. Tejima (KEK).....	181

19. The RIKEN SSC beam handling system	
K. Hatanaka, T. Inamura, Y. Yano, K. Yamaguchi and	
H. Kamitsubo (RIKEN) .....	184
20. Characteristics of a low-energy antiproton beam K4	
S. Kurokawa, M. Takasaki and M. Kobayashi (KEK) .....	186
<u>G. Magnet and Power Supply</u>	
1. Characteristic of the superconducting vertical wiggler	
and operation status in the Photon Factory	
H. Kitamura, M. Kihara, S. Sato, T. Shioya, E. Takasaki,	
I. Mikuni, T. Yamakawa, I. Nagakura* and M. Niwano**	
(KEK, *Gunma Univ., **Miyagi Univ.) .....	189
2. Spiral sector magnet of RCNP ring cyclotron project	
K. Hosono, I. Miura, M. Kobayashi, M. Inoue and A. Shimizu (RCNP) .....	192
3. Magnetic extraction channels for 1st ring cyclotron	
T. Itahashi, M. Inoue, A. Shimizu and I. Miura (RCNP) .....	195
4. Construction of RIKEN SSC sector magnets	
H. Takebe, S. Motonaga, T. Wada, I. Takeshita and	
H. Kamitsubo (RIKEN) .....	197
5. Estimation of fringing field of the dipole magnet for TARN II	
using two-dimensional magnetic program TRIM	
A. Itano and M. Takanaka (NIRS)	
M. Kanazawa, M. Kodaira, Y. Takahashi and A. Noda (INS) .....	200
6. Magnetic field measurement of high gradient SmCo <sub>5</sub> permanent	
quadrupole magnets	
M. Kumada, N. Kaneko, S. Inagaki, H. Baba and H. Sasaki (KEK) .....	203
7. Permanent quadrupole magnets for drift tubes of 20~40 MeV linac	
E. Takasaki, S. Fukumoto, T. Kato, T. Takenaka and	
S. Machida* (KEK, *Tokyo Univ.) .....	206
8. DC power lines for TRISTAN AR magnet system	
T. Kubo, K. Endo, S. Kikuchi* and T. Endo**	
(KEK, *Toshiba, **Furukawa) .....	209
9. Detection of reactive power and control of static capacitor	
for reactive power compensation	
Y. Takeuchi and K. Endo (KEK) .....	212
10. Alignments of the TRISTAN MR magnets	
A. Kabe and K. Endo (KEK) .....	215
11. An application of gyro-mechanism to the accurate alignment of	
magnets in a large ring accelerator	
G. Horikoshi, T. Hongo, T. Kubo and M. Iwai (KEK) .....	218
12. Application of a GTO thyristor to a dual resonant frequency	
circuit for excitation of synchrotron magnet	
H. Someya, T. Adachi, Y. Irie, Y. Yano and H. Sasaki (KEK) .....	221
13. Some problems on the new computer control system for the main	
ring magnet power supply of 12 GeV PS	
S. Matsumoto, H. Baba, T. Sueno, K. Mikawa, K. Muto and M. Toda (KEK) .....	223
<u>H. Vacuum</u>	
1. An aluminium RF acceleration chamber for the ring cyclotron	
A. Shimizu, T. Saito and I. Miura (RCNP) .....	226
2. Design of the vacuum system of the RIKEN SSC	
S. Nakajima, K. Ikegami, Y. Oikawa, S. H. Be and	
S. Motonaga (RIKEN) .....	229
3. Vacuum system of UVSOR	
K. Sakai, H. Yonehara, E. Nakamura and M. Watanabe (IMS) .....	232

4. Status of the Photon Factory ring vacuum system H. Kitamura, M. Kobayashi and Y. Takiyama (KEK) .....	234
5. Vacuum problems of RF cavities in the PF storage ring M. Izawa, Y. Kamiya, H. Kobayakawa, S. Tokumoto and Y. Yamazaki (KEK) .....	237
6. All-aluminum alloy vacuum system for TRISTAN e <sup>+</sup> e <sup>-</sup> colliding beam ring H. Ishimaru, T. Momose, K. Narushima, H. Mizuno, K. Kanazawa, H. Watanabe and M. Shimamoto (KEK) .....	239
7. Surface pretreatment test on TMR aluminum chambers by electron bombardment K. Narushima, K. Kanazawa, H. Mizuno, T. Momose and H. Ishimaru (KEK) .....	242
8. Surface treatment test on TMR aluminum chambers by microwave discharge in vacuum H. Mizuno, M. Shimamoto, K. Kanazawa, K. Narushima, T. Momose and H. Ishimaru (KEK) .....	244
9. Photon induced gas desorption from aluminum samples K. Kanazawa and H. Ishimaru (KEK) .....	247
10. Estimation of photoelectrons generated in large electron and positron accelerators M. Kobayashi (KEK) .....	250
11. Operation of the TRISTAN vacuum system, injection line and accumulation ring T. Momose, K. Narushima, H. Mizuno, K. Kanazawa, H. Watanabe and H. Ishimaru (KEK) .....	253
12. Control of the TRISTAN vacuum system H. Watanabe, K. Kanazawa and H. Ishimaru (KEK) .....	256
<u>I. Beam Dynamics</u>	
1. Nonlinear effects in cyclotron T. Yamazaki, K. Hosono, M. Inoue and I. Miura (RCNP).....	259
2. Accelerated orbits for injector cyclotron T. Tei, Y. Kadota, T. Yamazaki, M. Inoue, K. Hosono and I. Miura (RCNP) .....	262
3. Stochastic momentum cooling of a 7 MeV proton beam at TARN N. Tokuda, T. Hattori*, T. Katayama, A. Noda, M. Takanaka** S. Watanabe, H. Yonehara*** and M. Yoshizawa (INS, *T.I.T. **NIRS ***IMS).....	265
4. Orbit analysis and magnet design of TARN II A. Noda, M. Kanazawa, T. Katayama, M. Kodaira, M. Mutou, N. Takahashi, T. Tanabe, H. Tsujikawa, A. Mizobuchi, A. Itano* and M. Takanaka* (INS, *NIRS) .....	268
5. Design study of the third order resonance extraction system at TARN II M. Takanaka, A. Itano, A. Noda*, T. Tanabe* and H. Tsujikawa* (NIRS, *INS).....	271
6. The first experiment of H <sup>-</sup> charge exchange injection in the KEK booster T. Kawakubo, I. Sakai, M. Suetake and H. Sasaki (KEK).....	274
7. The first acceleration test of polarized protons in KEK PS booster S. Hiramatsu, H. Sato, T. Toyama, D. Arakawa, A. Ando, Y. Mori, A. Takagi, Z. Igarashi, K. Ikegami, H. Sakamoto* and K. Imai** (KEK, *Tsukuba Univ., **Kyoto Univ.).....	277
8. A method to control $\Delta p/p$ of the debunched beam at KEK-PS main ring S. Ninomiya and H. Nakagawa (KEK).....	280
9. Stability of the betatron oscillation during the operation of the superconducting wiggler in the Photon Factory A. Araki, Y. Kamiya, M. Kihara, H. Kitamura, T. Shioya and T. Yamakawa (KEK)...	283
10. Synchrotron sidebands in betatron oscillation measured by means of RF knockout in the PF storage ring T. Katsura, Y. Kamiya and S. Shibata (KEK).....	286

11. Beam instabilities in the PF storage ring	
H. Kobayakawa, M. Izawa, Y. Kamiya, M. Kihara and Y. Yamazaki (KEK).....	289
12. Vertical instability caused by ion-trapping in KEK-PF storage ring	
Y. Kamiya, M. Izawa, T. Katsura, M. Kihara,	
H. Kobayakawa and S. Shibata (KEK).....	292
13. Single bunch storage in UVSOR storage ring	
T. Kasuga, T. Kinoshita, M. Hasumoto and H. Yonehara (IMS).....	295
14. Bunch lengthening in TRISTAN AR	
K. Nakajima, K. Ebihara, A. Ogata and K. Satoh.....	297
15. First measurement of the parasitic mode loss in TRISTAN AR	
K. Nakajima, M. Ono, A. Ogata and E. Ezura .....	300
16. Beam cavity interaction in a DAW cavity	
S. Inagaki, T. Higo, K. Nakajima, M. Akemoto,	
Y. Yamazaki and K. Takata (KEK).....	303
17. Extraction system of TRISTAN accumulation ring and transport	
line to main ring	
M. Kikuchi, K. Ebihara, H. Nakayama, Y. Sakamoto and	
K. Satoh (KEK).....	306
18. Lattice design for the TRISTAN main ring	
S. Kamada and Y. Kimura (KEK).....	308
19. Beam dynamics in high energy linear colliders	
K. Yokoya (KEK).....	311
20. Wake field hadron lepton accelerator complex	
M. Kumada (KEK).....	314
<u>J. Accelerator Operation and Control</u>	
1. A decay rate plot of stored electron beam current and	
its applications	
T. Tomimasu, T. Yamazaki, T. Mikado, S. Sugiyama,	
M. Chiwaki and T. Noguchi (ETL).....	317
2. Optics in the TRISTAN accumulation ring	
S. Kamada, K. Oide, H. Fukuma and K. Yokoya (KEK).....	320
3. Correction of closed orbit distortion in TRISTAN accumulating ring	
H. Fukuma, S. Kamada, E. Kikutani, K. Nakajima and M. Tejima (KEK).....	323
4. Measurement system of the betatron oscillation frequency	
for the TRISTAN accumulation ring	
M. Akemoto, K. Uchino and T. Ieiri (KEK).....	*
5. Ergonomic design of the TRISTAN control room	
S. Takeda, T. Katoh, K. Kudo, A. Akiyama, T. Yamada and T. Kitani (KEK).....	326
6. Beam synchronization for TRISTAN AR	
K. Ishii, T. Urano and E. Kadokura (KEK).....	329
7. Touch-button system in the TRISTAN control system	
T. Katoh, S. Takeda, K. Kudo and A. Akiyama (KEK).....	332
8. Interface system of TRISTAN accelerator	
K. Uchino, H. Ikeda, I. Komada, J. Urakawa and T. Kawamoto (KEK).....	335
9. Accelerator operation with general-purpose computer	
E. Kikutani, A. Akiyama, T. Katoh, H. Koiso, S. Kurokawa and K. Oide (KEK).....	338
10. Computer control system of TRISTAN	
H. Koiso, A. Akiyama, T. Katoh, E. Kikutani, S. Kurokawa and K. Oide (KEK).....	341
11. Operation control system of the the Photon Factory storage ring	
T. Igarashi (KEK).....	344
12. Computer control system of Photon Factory storage ring	
C. O. Pak, T. Igarashi, N. Kajiura, A. Mishina and S. Shibata (KEK).....	347

13. Distributed control system for beam lines, the application of computer network N. Kanaya, S. Sato and T. Koide (KEK).....	350
14. KEK positron generator control system design K. Nakahara, I. Abe, A. Enomoto, Y. Otake and T. Urano (KEK).....	352
15. The trigger system of KEK positron generator T. Urano and K. Nakahara (KEK).....	355
16. Control system of the RIKEN SSC (I) T. Wada, J. Fujita, K. Shimizu, I. Yokoyama and T. Kambara (RIKEN).....	358
17. Control system for the RIKEN SSC (II) K. Shimizu, M. Nagase and I. Takeshita (RIKEN).....	361
18. Control system of IPCR heavy ion linac T. Kambara and M. Odera (RIKEN).....	364
19. Personal computer system in operation of the 160 cm cyclotron H. Takebe, S. Fujita, K. Ogiwara and I. Kohno (RIKEN).....	367
20. Operation statistics and reliability of KEK-PS H. Nakanishi and A. Takagi (KEK).....	369
21. Optically coupled isolated FDC-DFC module S. Hanashima, K. Horie and E. Minehara (JAERI).....	*
22. An automated operation for JAERI tandem accelerator S. Hanashima, K. Horie, S. Kanda, I. Ohuchi, Y. Tsukihashi and E. Minehara (JAERI).....	*
<u>K. Radiation and Safety</u>	
1. Time variations of exposure rates from residual radioactivities produced in shield concretes K. Kondo, H. Hirayama, S. Ban, M. Taino and H. Ishii (KEK).....	373
2. Particle size distribution of radioactive aerosols formed in high energy accelerator tunnels H. Muramatsu, K. Kondo, Y. Kanda and S. Takahara (KEK).....	375
3. The attenuation of neutrons in a labyrinth at an accelerator S. Ban and H. Hirayama (KEK).....	378
4. Investigations of electromagnetic cascades produced in lead by 2.5 GeV bremsstrahlung H. Hirayama, S. Ban and S. Miura (KEK).....	381
5. New method for absolute measurement of gamma ray absorbed dose with a plastic scintillator M. Miyajima (KEK).....	384
6. Average G-value of chemical dosimeter in a mixed radiation field around an electron linear accelerator T. Yamamoto, K. Oda, H. Mukai, H. Koyama and M. Kawanishi (ISIR).....	386
7. Measurement of neutron dose equivalent in pulsed and mixed radiation field around an electron linear accelerator K. Oda, H. Mukai, H. Koyama, T. Yamamoto and M. Kawanishi (ISIR).....	389
8. Radiation shielding for the RIKEN SSC T. Shikata, N. Nakanishi, T. Kosako* and S. Fujita (RIKEN, *RCNST).....	391
<u>L Future Project</u>	
1. Accelerator project GEMINI H. Sasaki and GEMINI study group (KEK).....	394
2. A proposal of high intensity accelerator complex for meson science in Kyoto University K. Imai, A. Masaie, S. Matsuki*, H. Takekoshi* (Kyoto Univ., *ICR).....	397
3. TARN II project T. Katayama (INS).....	400

4. RCNP ring cyclotron	
I. Miura, T. Yamazaki, A. Shimizu, M. Inoue, K. Hosono, T. Itahashi, T. Saito, I. Katayama, M. Fujiwara, Y. Kadota, T. Tei and M. Kondo (RCNP).....	403
5. The Tohoku proposal for a CW electron accelerator facility	
M. Sugawara (Tohoku Univ.).....	406
6. NIRS heavy particle accelerator for medical use	
K. Kawachi, H. Matsuzawa and H. Tsunemoto (NIRS).....	409
7. Kyushu University medical heavy ion accelerator (I)	
A. Ueno, K. Takasaki, K. Ogura and Y. Wakuta (Kyushu Univ.).....	*
8. Proposal of the pion facility for the cancer therapy	
K. Hayakawa, K. Tsukada, K. Saito, T. Tanaka and O. Takeda (Nihon Univ.).....	412
<u>X. Post dead-line papers</u> .....	415

#### ABBREVIATIONS

ETL	Electrotechnical Laboratory (Denso-Ken)
ICR	Institute for Chemical Research, Kyoto University
IMS	Institute for Molecular Science (Bunshi-Ken)
INS	Institute for Nuclear Study, University of Tokyo (Kakken)
ISIR	Institute of Scientific and Industrial Research, Osaka University (Sanken)
ISSP	Institute for Solid State Physics, University of Tokyo (Bussei-Ken)
JAERI	Japan Atomic Energy Research Institute
JSW	Japan Steel Works, Ltd.
KEK	National Laboratory for High Energy Physics (Ko-e-Ken)
NIRS	National Institute of Radiological Science (Ho-i-Ken)
NRIM	National Research Institute for Metals (Kinzai-Ken)
RCNP	Research Center for Nuclear Physics, Osaka University (Kaku-Butsuri-Senta)
RCNST	Research Center for Nuclear Science and Technology, University of Tokyo (Genshiryoku-Sogo-Senta)
RIKEN	Institute for Physical and Chemical Research
SSM	Sumitomo Special Metals Co., Ltd.
T.I.T.	Tokyo Institute of Technology (Tokyo-Kodai)
