

CONTENTS

	<u>PAGE</u>
I. INTRODUCTION .....	1
II. PROGRAM LOGICS .....	6
A. General Considerations .....	6
B. General Assumptions .....	8
C. The Five Program Logics .....	10
D. Cost and Schedule Summary .....	26
III. AN AGGRESSIVE (LOGIC III) PROGRAM .....	29
A. Assumptions .....	29
B. Logic III Reference Option Overview .....	30
C. Critical Parameter Assessments .....	33
D. Reference Options .....	41
1. Tokamaks .....	42
2. Magnetic Mirrors .....	45
3. Toroidal Theta Pinch .....	49
4. Other Alternate Concepts .....	50
5. Supporting Engineering Facilities .....	53
6. FERF/ETR .....	56
7. Fusion-Fission .....	62
8. Alternate Fuel Cycles .....	65

	<u>PAGE</u>
IV. ASSUMPTIONS ON DATES AND COSTS OF MAJOR FACILITIES CONSTRUCTION AND DESCRIPTION OF MAJOR FACILITIES .....	68
A. Assumptions on Dates and Costs of Major Facilities Construction .....	68
B. Description of Major Facilities .....	78
V. ROLL-BACK PLANNING .....	94
A. Major Program Elements .....	94
Element I: Scaling .....	99
Element II: Impurity Control .....	105
Element III: Beta Limits .....	107
Element IV: DT Burn Dynamics .....	110
Element V: Plasma Maintenance and Control .....	110
Element VI: Heating Technology .....	111
Element VII: Superconducting Magnets .....	112
Element VIII: Pulsed Energy Systems .....	113
Element IX: Blanket and Shield .....	114
Element X: Tritium Processing and Control .....	114
Element XI: Electrical Subsystems .....	114
Element XII: Power Handling .....	115
Element XIII: Plant Availability .....	116
Element XIV: Instrumentation and Control .....	116
Element XV: Plant Maintenance .....	117
Element XVI: Vacuum Technology .....	117
Element XVII: Materials .....	117
Element XVIII: Balance of Plant .....	118
Element XIX: Systems Integration .....	118
Element XX: Environment and Safety .....	119
Element XXI: Economics .....	119
