PAGE

- 7 ELECTRON BEAM PREIONIZATION IN AN MHD GENERATOR--by F. H. Shair and A. Sherman, General Electric Company
- 13 SEGMENTED ELECTRODE LOSSES IN MHD GENERATORS WITH NONEQUILIBRIUM IONIZATION - II--by Jack L. Kerrebrock, Massachusetts Institute of Technology
- 26 EXPERIMENTAL STUDIES OF STRONG HALL EFFECTS AND $U \times B$ INDUCED IONIZATION - II--by James Klepeis, and Richard J. Rosa, Avco-Everett Research Laboratory
- 31 SHOCK TUBE STUDIES OF MAGNETICALLY INDUCED IONIZATION MHD GENERATOR VOLTAGE-CURRENT CHARACTERISTICS--by B. Zauderer, General Electric Company
- 33 ELECTRICAL CONDUCTIVITY EXPERIMENTS IN A MPD GENERATOR--by I. R. McNab, International Research and Development Co. Ltd.
- 34 ELECTRODE CURRENT DISTRIBUTION IN LINEAR M. G. D. CHANNEL FLOWS--by M. A. Hoffman and G. C. Oates, Massachusetts Institute of Technology.
- 35 MHD GENERATION WITH ELEVATED ELECTRODE TEMPERATURES--by J. F. Armstrong, D. W. George (University of Sydney, N. S. W., Australia) and H. K. Messerle (Visiting at Cornell University)
- 37 DESIGN AND PERFORMANCE OF THE STANFORD COMBUSTION MHD GENERATOR--by Karl G. Reseck, Robert H. Eustis, Charles H. Kruger, Stanford University
- 38 LARGE SCALE EXPLOSIVELY DRIVEN MHD GENERATOR EXPERIMENTS--by M. S. Jones, Jr.; P. W. Webster and F. H. Webb, Jr., MHD Research, Inc.; C. D. Bangerter, A. H. Peterson and L. J. Davis, Hercules Powder Company
- 39 EFFICIENCY OF LARGE SCALE OPEN LOOP MHD POWER GENERATION--by Manfred Rosner, Lang S. Dzung, Brown Boveri Corporation
- 49 DC LIQUID-METAL MAGNETOHYDRODYNAMIC POWER GENERATION--by David G. Elliott, Jet Propulsion Laboratory
- 60 ON THE MODULATED CONDUCTIVITY INDUCTION SYNCHRONOUS MAGNETOGASDYNAMIC GENERATOR--by J. Milewski, Polish Academy of Sciences
- 65 REAL MACHINE EFFECTS IN THE MHD INDUCTION GENERATOR--by E. S. Pierson and W. D. Jackson, Massachusetts Institute of Technology
- 67 PROSPECTS FOR A 1000 Mw(e) NUCLEAR REACTOR/MHD POWER PLANT--by L. A. Booth, University of California
- 69 INTEGRATION PROBLEMS OF GAS COOLED NUCLEAR REACTORS AND M. H. D. GENERATORS--by Ralph S. Cooper and Curtis Rhodes, University of California
- 70 PERFORMANCE CHARACTERISTICS OF A MAGNETIC ANNULAR ARC--by R. M. Patrick and A. M. Schneiderman, Avco-Everett Research Laboratory
- 83 EXPERIMENTS AND ANALYSIS FOR COAXIAL HALL CURRENT ACCELERATORS AND THE ROLE OF IONIZATION EFFECTS--by H. A. Hassan, R. V. Hess, W. Grossmann, P. Brockman and G. Oertel, NASA, Langley Research Center
- 85 THE SIGNIFICANCE OF NONEQUILIBRIUM CONDUCTIVITY ON THE PERFORMANCE OF AN MHD FARADAY ENGINE--by Myron Levoy and T. H. Dimmock, Thiokol Chemical Corporation
- 87 IMPLOSIVE BEHAVIOR OF MAGNETICALLY-DRIVEN AXISYMMETRIC SLUG-TYPE PLASMA SHEETS--by W. J. Guman, H. J. Hagerup, and H. S. Glick, Rensselaer Polytechnic Institute
- 89 NON-LINEAR EFFECTS OF FLUCTUATIONS ON MHD PERFORMANCE--by James E. McCune, Avco-Everett Research Laboratory
- 104 TRAVELING WAVE INTERACTION AND WAVE GROWTH--by Hugo K. Messerle, Cornell University
- 113 EXPERIMENTAL MEASUREMENT OF THE GROWTH OF A TURBULENT CIRCULAR JET IN A COAXIAL MAGNETIC FIELD --by J. A. Fay, M. Sajben and F. Fraim, Massachusetts Institute of Technology
- 114 MEASUREMENT OF PRESSURE GRADIENTS IN A CIRCULAR PIPE AT HIGH HARTMANN AND REYNOLDS NUMBERS--by A. Maciulaitis, A. L. Loeffler, Jr. and P. J. Calcanes, Grumman Aircraft Engineering Corporation
- 115 A GENERALIZED GRAPHICAL PRESENTATION OF MHD GENERATOR AND ACCELERATOR PERFORMANCE CHARACTERISTICS--by W. L. Powers, ARO, Inc., and J. B. Dicks and W. T. Snyder, University of Tennessee Space Institute
- 118 DESIGN AND OPERATION OF A LARGE PULSED $J \times B$ ACCELERATOR--by R. Leon Leonard and Peter H. Rose, Avco-Everett Research Laboratory
- 119 EXPERIMENTAL PERFORMANCE OF A TRAVELLING WAVE ACCELERATOR--by Thiebault Moulin, ONERA
- 120 A MHD DESCRIPTION OF THE SLEPIAN DISCHARGE--by R. A. Elco, Carnegie Institute of Technology
- 121 STUDY OF AN INDUCTION COMPRESSOR--by J. L. Neuringer and R. M. Haag, Avco/RAD
- 122 RECOMBINATION RATES AND NON-EQUILIBRIUM ELECTRICAL CONDUCTIVITY IN A SEEDED PLASMA--by T. A. Cool and E. E. Zukoski, Daniel and Florence Guggenheim Jet Propulsion Center, California Institute of Technology
- 135 ELECTRICAL CONDUCTIVITY OF PARTIALLY IONIZED GASES--by S. Schweitzer and M. Mitchner, Stanford University

PAGE

- 137 NON-EQUILIBRIUM ELECTRICAL CONDUCTIVITY AND ELECTRON TEMPERATURE MEASUREMENTS IN ELECTRIC FIELDS AND CROSSED ELECTRIC AND MAGNETIC FIELDS--by G. Brederlow, R. Hodgson, and W. Riedmüller, Institut für Plasmaphysik, Garching bei München
- 138 MEASUREMENT OF NONEQUILIBRIUM ELECTRICAL CONDUCTIVITY IN MERCURY VAPOR SEEDED WITH POTASSIUM--by D. H. Polk, United Aircraft Research Laboratories
- 139 A PHYSICAL MODEL OF THE ELECTRIC DISCHARGE WITH COLD ELECTRODES IN A SUPERSONIC SEEDED PLASMA--by L. E. Rittenhouse and J. M. Whorric, ARO, Incorporated
- 142 USE OF LINE RADIATION FROM CARBON IMPURITY TO DETERMINE ELECTRON TEMPERATURES OF A PLASMA--Chieh Ho and Dick Duffey, University of Maryland
- 144 DEVELOPMENT OF HOT SHOT GAS SOURCE FOR PULSED MHD WIND TUNNEL STUDY--by D. A. Durran and W. R. Grabowsky
- 146 SUPERCONDUCTING MAGNET FACILITY FOR PLASMA PHYSICS RESEARCH--by J. Reece Roth, NASA Lewis Research Center, and Donald C. Freeman, Jr., and David A. Haid, Linde division of Union Carbide
