

Contents

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
1 The Edge Plasma	1
<i>Detlev Reiter</i>	
I. Introduction	1
II. Magnetically Confined Fusion Plasmas	8
III. The Edge Plasma	18
References	31
I SURFACE PHENOMENA	
2 Wall Effects on Particle Recycling in Tokamaks	35
<i>Joachim K. Ehrenberg</i>	
I. Introduction	35
II. Elements of Particle Recycling	37
III. Global Modeling of Particle Recycling in Tokamaks	63
IV. Outlook	86
References	88
3 Physical Sputtering and Radiation-Enhanced Sublimation	93
<i>W. Eckstein and V. Philippss</i>	
I. Introduction	93
II. Basic Processes of Ion Implantation and Damage Production	95
III. Physical Sputtering	99

IV.	Radiation-Enhanced Sublimation (RES) of Graphite and Carbon-Based Materials	117
	References	130
4	Chemical Erosion	135
	<i>E. Vietzke and A. A. Haasz</i>	
I.	Introduction	135
II.	Chemical Erosion of Carbon Due to Hydrogen	140
III.	Chemical Erosion of Carbon Due to Oxygen	153
IV.	Synergistic Erosion Due to Multispecies Impact	159
V.	Chemical Erosion of Carbon-Based Compounds	165
VI.	Summary	170
	References	172
5	Electron Emission from Solids	177
	<i>Jørgen Schou</i>	
I.	Introduction	177
II.	Reflected Electrons	182
III.	Electron-Induced Electron Emission	187
IV.	Ion-Induced Kinetic Electron Emission	196
V.	Photon-Induced Electron Emission	202
VI.	Potential Emission by Ions	206
VII.	Thermionic Emission	209
VIII.	Conclusion	210
	List of Symbols	211
	References	212
6	Control of Plasma–Surface Interactions by Thin Films	217
	<i>J. Winter</i>	
I.	Introduction	217
II.	The Role of Plasma Impurities	219
III.	Deposition of Thin Films and Film Properties	221
IV.	Influence of Thin Surface Layers on Fusion Plasmas	228
V.	Redeposition of Thin Films	237
VI.	Conclusions and Outlook	239
	References	240
7	Interaction of Pellets with Hot Plasmas	243
	<i>Karl Heinz Finken and Wolfgang O. Hofer</i>	
I.	Objectives of Cryogenic Pellet Injection	243
II.	Cryogenic Pellets and Their Fate in Hot Plasmas	244

III.	Elementary Ablation Processes	247
IV.	Pellet Ablation in Fusion-Relevant Plasmas	257
V.	Outlook	260
	References	263

II BULK MATERIALS PHENOMENA

8	Thermal Stability	269
	<i>Jochen Linke and Harald Bolt</i>	
I.	Introduction	269
II.	Plasma-Facing Materials and Components	272
III.	Test Facilities	280
IV.	Normal Operation	282
V.	Off-Normal Conditions	290
VI.	Critical Issues and Perspectives	300
	References	301
9	Radiation Damage in Metallic Structural Materials	305
	<i>H. Ullmaier and H. Trinkaus</i>	
I.	Introduction	305
II.	Basic Interactions between Radiation and Solids	308
III.	Defect Reactions	319
IV.	Changes of Macroscopic Properties	328
V.	Concluding Remarks	336
	References	338
10	Radiation Damage in Carbon Materials	341
	<i>Timothy D. Burchell</i>	
I.	Introduction	341
II.	Manufacture and Properties of Carbon Materials	343
III.	Radiation Damage Mechanisms and Induced Structural and Dimensional Changes in Carbon Materials	347
IV.	Effects of Neutron Damage on Mechanical and Physical Properties	363
V.	Effect of Irradiation Damage on Thermal Conductivity and Energy Content	368
VI.	Summary and Future Outlook	380
	References	382
	Index	385
