

CONTENTS

LIST OF CONTRIBUTORS	ix
PREFACE	xi
CONTENTS OF OTHER VOLUMES	xiii
Chapter 1 Millimeter-Wave Communications	
<i>K. Miyauchi</i>	
I. Introduction	1
II. Devices and Components for Millimeter-Wave Communication Systems	5
III. Guided Millimeter-Wave Communication Systems	30
IV. Millimeter-Wave Terrestrial Radio Communication Systems	51
V. Satellite Communication in Millimeter Waves	73
References	89
Chapter 2 A Comparative Study of Millimeter-Wave Transmission Lines	
<i>Tatsuo Itoh and Juan Rivera</i>	
I. Introduction	95
II. List of Transmission Lines	96
III. Conclusion	130
References	131
Chapter 3 Dielectric Waveguide Electrooptic Devices	
<i>Marvin B. Klein</i>	
I. Introduction	133
II. Electrooptic Properties of Ferroelectric Materials	135
III. Candidate Waveguide Structures for Phase Shifting	145
IV. Properties of the TE ₁₀ Mode in H Guide	148
V. TE ₁₀ -Mode Parameters for LiNbO ₃ H Guide	153
VI. LiNbO ₃ H-Guide Phase Shifters at 95 GHz	158

VII. Other Electrooptic Devices	164
VIII. Prospects for Improved Materials	172
IX. Conclusion	173
References	174

Chapter 4 Millimeter-Wave Propagation and Remote Sensing of the Atmosphere

Edward E. Altshuler

I. Introduction	177
II. Atmospheric Effects on Propagated Waves	181
III. Transmission Paths	206
IV. Remote Sensing of the Atmosphere	223
V. Conclusion	235
References	236

Chapter 5 Technology of Large Radio Telescopes for Millimeter and Submillimeter Wavelengths

J. W. M. Baars

I. Introduction	241
II. Natural Limits	245
III. Structural Design—Homology	247
IV. Temperature Effects	254
V. Thermal Control of the 30-m Millimeter Telescope	256
VI. Wind Effects	260
VII. Radome, Astrodome, or Exposed?	260
VIII. Reflector Surface	264
IX. Measuring and Setting the Reflector Profile	269
X. Pointing and Tracking—Servo Control	274
XI. Electromagnetic and Operational Aspects	277
XII. Conclusion	279
References	279

Chapter 6 A Gyrotron Study Program

*G. Boucher, Ph. Boulanger, P. Charbit, G. Faillon,
A. Herscovici, E. Kammerer, and G. Mourier*

I. Single-Cavity Oscillators at 35 GHz	283
II. Self-Consistent Calculations of Beam-Waveguide Interaction	285
III. Space-Charge Effects in Traveling-Wave Gyrotron Amplifiers (Small Signal Theory)	291
IV. Proposed Scheme for an Infrared Electron Maser and Its Electron Source	301
V. Conclusion	307
References	308

**Chapter 7 Multimode Analysis of Quasi-Optical
Gyrotrons and Gryoklystrons**
Anders Bondeson, Wallace M. Manheimer, and Edward Ott

I. Introduction	310
II. Field and Particle Equations	312
III. Linear Theory of the Quasi-Optical Gyrokylytron	315
IV. Single-Mode Nonlinear Computations	320
V. Multimode Formulation	327
VI. Multimode Simulations	330
VII. Conclusion	338
References	339
