Contents

1. INTRODUCTION

- 1.1 What is Magneto-Solid Mechanics?, 1
- 1.2 Physical Quantities and Nondimensional Groups, 3
- 1.3 Applications, 9
- 1.4 Brief Historical Review, 16

2 REVIEW OF ELECTROMAGNETICS

23

53

5

1

2.1 Introduction, 23

- 2.2 Maxwell's Equations, 25
- 2.3 Electromagnetic Boundary Conditions, 27
- 2.4 Electromagnetic Constitutive Relations, 28
- 2.5 Ferromagnetic Materials, 31
- 2.6 Electromagnetic Forces, 40
- 2.7 Energy Dissipation and Poynting's Theorem, 45
- 2.8 Electric and Magnetic Circuit Theory, 46

3 BASIC EQUATIONS OF MAGNETO-SOLID MECHANICS

- 3.1 Introduction, 53
- 3.2 Electromagnetic Forces, 54
- 3.3 Forces on Discrete Circuits, 55
- 3.4 Forces on Magnetized Materials $(\mathbf{J} = 0)$, 59
- 3.5 Energy Method and Lagrange's Equations for Discrete Systems, 61
- 3.6 Basic Equations for Magnetomechanical Continua, 68
- 3.7 Equations for Nonmagnetic Elastic Conductors, 73
- 3.8 Reduction of Body Force Problems to Surface Traction Problems, 78

Contents

3.9 Magnetomechanical Virial Theorem, 79

3.10 Equations for Magnetizable Elastic Continua, 81

3.11 A Plate Theory for Ferroelastic Materials, 83

4 STRESSES DUE TO STEADY CURRENTS IN STRUCTURES

4.1 Introduction, 87

х

- 4.2 Magnetic Fields and Forces, 92
- 4.3 Stress in a Circular Ring with Current, 105
- 4.4 Stress Analysis in Solenoid Magnets, 107
- 4.5 Stress in a Thin Plate with Uniform Current Density, 121
- 4.6 Deformation-Dependent Problems and Magnetic Stiffness, 124

5 MAGNETOELASTIC STABILITY OF STRUCTURES

- 5.1 Introduction, 131
- 5.2 Earnshaw's Theorem, 137
- 5.3 The Two-Wire Instability, 140
- 5.4 The Electroelastic Contact—A Fold Catastrophe, 142
- 5.5 Current Filament Near a Ferromagnetic Plate, 146
- 5.6 Electromagnet Near an Elastic Keeper, 150
- 5.7 The Three-Wire Problem, 152
- 5.8 The N-Wire Torus, 154
- 5.9 Current Filament Between Ferromagnetic Plates, 156
- 5.10 Ferroelastic Beam in a Uniform Magnetic Field, 158
- 5.11 Circular Ferroelastic Rod in a Transverse Magnetic Field, 167
- 5.12 Stability of Current-Carrying Rods, 169

6 MECHANICS OF SUPERCONDUCTING SOLIDS AND STRUCTURES 177

- 6.1 Introduction, 177
- 6.2 The Phenomena of Superconductivity, 178
- 6.3 Properties of Commercial Type-II Superconducting Solids, 188
- 6.4 Composite Structure of Superconducting Materials, 197
- 6.5 Bending-Free Magnets, 201
- 6.6 Stresses in Superconducting Magnets, 205
- 6.7 Magnetoelastic Stability of Superconducting Structures, 211
- 6.8 Mass-Energy Scaling Laws for Superconducting Magnets, 245

7 MECHANICS OF FERROMAGNETIC SOLIDS AND STRUCTURES 255

7.1 Introduction, 255

87

131

- 7.2 Ferromagnetic Particles in Magnetic Fields, 257
- 7.3 Dynamics of Electromagnetic Actuators, 266
- 7.4 Feedback-Controlled Electromagnetic Levitation, 271
- 7.5 Permanent Magnet Circuits with Elastic Components, 275
- 7.6 Bending of Ferromagnetic Plates, 279
- 7.7 Experiments on Bending of Ferroelastic Plates, 284
- 7.8 Bending of a Ferroelastic Shell, 288

8 MAGNETICALLY INDUCED CURRENTS AND FORCES

297

xi

- 8.1 Introduction, 297
- 8.2 Basic Equations for Eddy Currents, 298
- 8.3 Potential Methods, 302
- 8.4 Four Elementary Eddy-Current Problems, 304
- 8.5 Eddy-Current Magnetic-Moment Method, 316
- 8.6 Scaling Principles in Eddy-Current Problems, 322
- 8.7 Hall Potential Effects in Eddy Currents, 330
- 8.8 Levitation Forces on Moving Conductors, 336
- 8.9 Electromagnetic Launchers, 345
- 8.10 Dynamics of Deformable Solids in Magnetic Fields, 353

9 EXPERIMENTAL METHODS IN MAGNETO-SOLID MECHANICS 371

- 9.1 Introduction, 371
- 9.2 Generation of Magnetic Fields and Currents, 372
- 9.3 Methods of Measuring Magnetic Fields and Currents, 375
- 9.4 Methods of Measuring Eddy Currents in Solids, 378
- 9.5 Strain Gage Techniques in Magnetic Fields, 383
- 9.6 Force Measurements in Pulsed Magnetic Fields—Stress Wave Techniques, 386
- 9.7 Vibration Detection Using Passive Magnetic Fields, 387
- 9.8 Superconducting Experiments at Cryogenic Temperatures, 395
- 9.9 Effects of Magnetic Fields on Humans and Exposure Limits, 398
