Introduction

ALBERT G. PETSCHER	ix
--------------------	----

List of Contributors	xiii
----------------------	------

CHAPTER 1

Classification of Supernovae

ROBERT P. HARKNESS and J. CRAIG WHEELER	1
1.1. Introduction	1
1.2. Observed Time Dependence	4
1.3. Theory	14
1.4. SN 1987K	24
1.5. Conclusions	26
References	28

CHAPTER 2

Spectra of Supernovae

DAVID BRANCH	30
2.1. Introduction	30
2.2. Historical Overview	31
2.3. Individual Supernovae: Spectral Types and Bibliography	38
2.4. Spectrum Formation	42
2.5. Spectral Types Ia, Ib, and II	46
2.6. Toward Quantitative Spectroscopy	52
References	53

CHAPTER 3

Supernova Light Curves

ROBERT P. KIRSHNER	59
3.1. Introduction	59
3.2. Light Curves of Type IA Supernovae	60
3.3. The Light Curves of SN Ib	63
3.4. The Cosmological Uses of SN Ia	65
3.5. Light Curves for SN II	66
3.6. Cosmology and SN II	71
References	73

CHAPTER 4

Radio Supernovae

RICHARD A. SRAMEK and KURT W. WEILER	76
4.1. Introduction	76
4.2. Radio Emission from SN 1970G	77
4.3. Further Radio Detections of Type II Supernovae	77
4.4. Radio Detection of Type I Supernovae	80
4.5. Supernovae Discovered by Their Radio Emission	83
4.6. Intermediate Age Radio Supernovae	85
4.7. Very Early Radio Emission from SN 1987A	86
4.8. Summary of Radio Supernovae	86
4.9. Models for the Supernova Radio Emission	87
4.10. Conclusion	89
References	89

CHAPTER 5

Interaction of Supernovae with Circumstellar Matter

ROGER A. CHEVALIER	91
5.1. Introduction	91
5.2. Circumstellar Environments	91
5.3. Hydrodynamic Interaction	94
5.4. Radiative Interaction	101
5.5. Summary and Future Prospects	107
References	108

CHAPTER 6

Gamma-Rays and X-Rays from Supernovae

PETER G. SUTHERLAND	111
6.1. Introduction	111
6.2. Prompt Emission, Radiation from Interaction with a Wind, and Very High-Energy Radiation	112
6.3. Gamma-Rays and X-Rays due to Radioactive Decay	114
6.4. SN 1987A	126
6.5. Concluding Remarks	139
References	140

CHAPTER 7

Neutrinos from Supernovae

ADAM S. BURROWS	143
7.1. Introduction	143
7.2. A Short History of Supernova Neutrino Theory	144
7.3. The Neutrino Signature of Core Collapse Supernovae	152
7.4. The Neutrinos from SN 1987A	163
Appendix: Detectors	173
References	178

CHAPTER 8

Type I Supernovae: Carbon Deflagration and Detonation

S.E. WOOSLEY	182
8.1. Introduction	182
8.2. The Pre-Explosive Evolution	184
8.3. Some General Considerations	185
8.4. Carbon Deflagration	187
8.5. Carbon Detonation	196
8.6. Type Ib Supernovae	204
8.7. Type I $\frac{1}{2}$ Supernovae	207
8.8. Conclusions	208
References	210

CHAPTER 9

Supernovae: The Direct Mechanism and the Equation of State

JERRY COOPERSTEIN and EDWARD A. BARON	213
9.1. Introduction	213
9.2. Gravitational Collapse	215
9.3. Subsaturation Density Equation of State	227
9.4. Supersaturation Density Equation of State	245
9.5. Numerical Results	249
9.6. Rotation	261
9.7. Discussion	262
References	264

CHAPTER 10

Neutrino Heating Supernovae

RONALD W. MAYLE	267
10.1. Introduction	267
10.2. Brief Review of Numerical Work	268
10.3. Collapse-Driven Supernova	269
10.4. Calculational Neutrino Spectra and Luminosity from Collapsed Stellar Cores	280
10.5. The Neutrino Heating Mechanism for Supernova Explosions: A Critique	287
References	289

Index	291
