

CONTENTS	page
List of participants.....	XIII
F. TROYON - Introduction.....	XIX
 EQUILIBRIUM AND STABILITY	
J. NÜHRENBERG and R. ZILLE - Equilibrium and stability of low-shear stellarators.....	3
P. MERKEL - Applications of the Neumann problem to stellarators: magnetic surfaces, coils, free-boundary equilibrium, magnetic diagnostics.....	25
A. BHATTACHARJEE - MHD equilibrium and stability of axisymmetric plasmas in the presence of rotation.....	47
E.K. MASCHKE and J. MORROS TOSAS - Bifurcation approach for ballooning and tearing instabilities in a toroidal plasma.....	69
G. SCHULTZ, F. TROYON, T. TSUNEMATSU, A. BONDESON and A. ROY - Comparison of numerical calculations of external kinks with large aspect ratio theory.....	77
M.S. CHANCE - Approaching the second stability region in tokamaks.....	87
R.L. DEWAR - Ballooning mode Schrödinger equation.....	107
C.M. BISHOP - A mechanism for the L-mode - H-mode bifurcation.....	123
A. ROY and F. TROYON - Numerical study of ballooning stability for quasi divertor tokamak equilibria.....	143

page	page		
G.Y. FU, J.W. VAN DAM and M.N. ROSENBLUTH - Dynamical global transition to second stability in auxiliary heated tokamaks.....	153	O.J.W.F. KARDAUN, P.J. MC CARTHY, K. LACKNER, K. RIEDEL and O. GRUBER - A statistical approach to profile invariance.....	435
T.M. ANTONSEN Jr. - Kinetic energy principles.....	161	G. LAVAL - Transport with destroyed magnetic surfaces....	445
C.Z. CHENG - Kinetic-MHD stability calculations for toroidal plasmas using the NOVA-K code.....	185	A. REGISTER, G. HASSELBERG, F. WAELBROECK and J. WEILAND - Towards a self-contained theory of anomalous confinement	457
R. IACONO and A. BONDESON - GCP stability of equilibria with mass flow.....	205	C.S. LIU, P.N. GUZDAR, J.Q. DONG and Y.C. LEE - Temperature gradient driven modes and anomalous transport in tokamaks.....	477
T.C. HENDER, R.J. HASTIE, D.C. ROBINSON, L.A. CHARLTON, J. A. HOLMES, B.A. CARRERAS and V.E. LYNCH - Toroidal stability in the tokamak.....	215	F. ROMANELLI - Microinstability based models of anomalous energy transport.....	499
R.J. HASTIE - Theory of resistive modes in tokamaks.....	231	X. GARRET, F. MOURGUES and A. SAMAIN - Non linear self consistency of microtearing modes.....	517
RELAXATION PHENOMENA			
J. WESSON - Theory of sawtooth oscillations.....	253	H. BIGLARI and P.H. DIAMOND - Theory of trapped-particle-induced resistive fluid turbulence.....	531
M.N. BUSSAC and R. PELLAT - Internal disruptions and release of plasma pressure in tokamak.....	283	X. GARRET, L. LAURENT, F. MOURGUES and A. SAMAIN - Numerical study of ion thermal gradient driven modes.....	543
D.J. WARD - Sawtooth relaxations.....	295	OTHER TOPICS	
A. BONDESON - Disruptions in tokamaks.....	303	F. ROMANELLI, A. CARDINALI and R. BARTIROMO - Propagation of 1.h waves in plasma in presence of $m=1,2$ magnetic island.....	553
M. PERSSON and A. BONDESON - Mode locking and the $q=2$ limit.....	325	C. ALEJALDRE - Influence of a superthermal tail on microwave absorption in the TJ-II flexible heliac.....	559
M. WAKATANI - Pressure-driven relaxations in heliotron E	333	G.P. MADDISON - Modelling of sheath edge ion distribution functions.....	567
R.B. WHITE - MHD, kinetic and hybrid models.....	357	APPENDIX	
TRANSPORT			
K. LACKNER, O. GRUBER and K. GRASSIE - Different confinement regimes in tokamaks.....	377	List of Authors.....	575
A. NOCENTINI - Bootstrap current and Ware pinch in tokamaks.....	397		
B.S. LILEY and G.J. RADFORD - Anomalous heat flows.....	415		
G.J. RADFORD and B.S. LILEY - The applicability of a moment equation approach to neoclassical processes.....	423		
M. OTTAVIANI - Density fluctuations in tokamaks : a phenomenological approach.....	431
