Preface	xiii
1. THE ESTIMATION OF PHYSICAL PROPERTIES	1
1-1 Introduction	1
1-2 Estimation of Properties	3
1-3 Types of Estimation Methods	4
1-4 Organization of Book	7
References	10
2. PURE-COMPONENT CONSTANTS	11
2-1 Scope	11
2-2 Critical Properties	12
2-3 Acentric Factor	19
2-4 Freezing and Boiling Points	21
2-5 Dipole Moments	22
2-6 Stiel Polar Factor	22
2-7 Potential Force Constants	23
Notation	24
References	25
3. PRESSURE-VOLUME-TEMPERATURE RELATIONSHIPS OF PURE GASES AND LIQUIDS	26
3-1 Scope	26
3-2 Two-Parameter Correlations	26

3-3	Three-Parameter Correlations	31
3-4	Analytical Equations of State	36
3-5	Redlich-Kwong Equation of State	37
3-6	Barner-Adler Equation of State	40
3-7	Sugie-Lu Equation of State	42
3-8	Benedict-Webb-Rubin Equation of State	43
3-9	Generalized Benedict-Webb-Rubin Equations	50
3-10	Lee-Erbar-Edmister Equation of State	52
3-11	Virial Equation	53
3-12	Discussion of Relations to Estimate Pure Gas P - V - T Properties	56
3-13	P - V - T Properties of Liquids—General Considerations	57
3-14	Estimation of the Liquid Molal Volume at the Normal Boiling Point	57
3-15	Estimation of Liquid Densities	60
3-16	Discussion of Liquid-Density Estimation Methods	67
	Notation	68
	References	69
4.	MIXTURE COMBINATION RULES	73
4-1	Scope	73
4-2	Corresponding-States Methods for Mixtures	74
4-3	Redlich-Kwong Equation of State	75
4-4	Barner-Adler Equation of State	78
4-5	Sugie-Lu Equation of State	80
4-6	Benedict-Webb-Rubin Equation of State	81
4-7	Lee-Erbar-Edmister Equation of State	82
4-8	Second Virial Coefficients for Mixtures	83
4-9	Mixing Rules	83
4-10	Mixing Rules for Liquid Mixtures	86
	Notation	88
	References	89
5.	THERMODYNAMIC PROPERTIES	90
5-1	Scope	90
5-2	Fundamental Thermodynamic Principles	90
5-3	Departure Functions	92
5-4	Evaluation of Departure Functions	96
5-5	Derivative Properties	126
5-6	Heat Capacities of Real Gases	135
5-7	True Critical Points of Mixtures	140
5-8	Heat Capacities of Liquids	149
5-9	Vapor-Phase Fugacity of a Component in a Mixture	171
	Notation	177
	References	178
6.	VAPOR PRESSURES AND ENTHALPIES OF VAPORIZATION OF PURE FLUIDS	181
6-1	Scope	181
6-2	Theory and Corresponding-States Correlations	181
6-3	Antoine Vapor-Pressure Correlation	184
6-4	Integration of the Clausius-Clapeyron Equation	185
6-5	Riedel's Vapor-Pressure Equation	186
6-6	Frost-Kalkwarf-Thodos Vapor-Pressure Equation	188
6-7	Riedel-Plank-Miller Vapor-Pressure Equation	190
6-8	Thek-Stiel Vapor-Pressure Equation	191
6-9	Correlation Equations	192
6-10	Discussion and Recommendations for Vapor-Pressure Estimation and Correlation	193

6-11	Enthalpy of Vaporization of Pure Compounds	197
6-12	Estimation of ΔH_v from the Clausius-Clapeyron Equation and Experimental Vapor Pressures	198
6-13	Estimation of ΔH_v from the Law of Corresponding States	199
6-14	Estimation of ΔH_v from Vapor-Pressure Equations	201
6-15	ΔH_v at the Normal Boiling Point	204
6-16	Variation of ΔH_v with Temperature	210
6-17	Discussion and Recommendations for Enthalpy of Vaporization	213
6-18	Enthalpy of Fusion	215
6-19	Enthalpy of Sublimation	217
	Notation	219
	References	220
7.	THERMODYNAMIC PROPERTIES OF IDEAL GASES	223
7-1	Scope and Definitions	223
7-2	Estimation Methods	225
7-3	Ideal-Gas Heat Capacity	226
7-4	Standard Heat of Formation	257
7-5	Ideal-Gas Entropy	273
7-6	Standard Gibbs Energy of Formation	278
	Notation	285
	References	286
8.	FLUID-PHASE EQUILIBRIA IN MULTICOMPONENT SYSTEMS	288
8-1	Scope	288
8-2	Basic Thermodynamics of Vapor-Liquid Equilibria	292
8-3	Fugacity of a Pure Liquid	294
8-4	Simplifications in the Vapor-Liquid Equilibrium Relation	295
8-5	Activity Coefficients; The Gibbs-Duhem Equation and Excess Gibbs Energy	296
8-6	Calculation of Binary Vapor-Liquid Equilibria	303
8-7	Effect of Temperature on Vapor-Liquid Equilibria	307
8-8	Binary Vapor-Liquid Equilibria: Examples	308
8-9	Multicomponent Vapor-Liquid Equilibria	317
8-10	Estimation of Activity Coefficients	325
8-11	Solubilities of Gases in Liquids	355
8-12	Vapor-Liquid Equilibria at High Pressures	359
8-13	Liquid-Liquid Equilibria	368
8-14	Phase Equilibria in Polymer Solutions	375
8-15	Solubilities of Solids in Liquids	380
8-16	Concluding Remarks	384
	Notation	385
	References	387
9.	VISCOSITY	391
9-1	Scope	391
9-2	Definitions and Units of Viscosity	391
9-3	Theory of Gas Viscosity and Other Transport Properties	392
9-4	Estimation of Low-Pressure Gas Viscosity	395
9-5	Viscosities of Gas Mixtures at Low Pressure	410
9-6	Effect of Pressure on the Viscosity of Pure Gases	420
9-7	Effect of Pressure on the Viscosity of Gas Mixtures	431
9-8	Liquid Viscosity	435
9-9	Effect of High Pressure on Low-Temperature Liquid Viscosity	435
9-10	Effect of Temperature on Liquid Viscosity	437
9-11	Estimation of Low-Temperature Liquid Viscosity	439
9-12	Estimation of Liquid Viscosity at High Temperatures	455

x Contents

9-13	Liquid-Mixture Viscosity	457
	Notation	463
	References	464
10.	THERMAL CONDUCTIVITY	470
10-1	Scope	470
10-2	Theory of Thermal Conduction in Gases	470
10-3	Thermal Conductivity of Polyatomic Gases	473
10-4	Effect of Temperature on the Low-Pressure Thermal Conductivity of Gases	499
10-5	Effect of Pressure on the Thermal Conductivity of Gases	499
10-6	Thermal Conductivities of Low-Pressure Gas Mixtures	507
10-7	Effect of Temperature and Pressure on the Thermal Conductivity of Gas Mixtures	513
10-8	Thermal Conductivity of Liquids	516
10-9	Estimation of the Thermal Conductivity of Pure Liquids	518
10-10	Effect of Temperature on the Thermal Conductivity of Liquids	527
10-11	Effect of Pressure on the Thermal Conductivity of Liquids	529
10-12	Thermal Conductivity of Liquid Mixtures	531
	Notation	537
	References	538
11.	DIFFUSION COEFFICIENTS	544
11-1	Scope	544
11-2	Basic Concepts and Definitions	545
11-3	Diffusion Coefficients for Binary Gas Systems at Low Pressures: Prediction from Theory	548
11-4	Diffusion Coefficients for Binary Gas Systems at Low Pressures: Empirical Correlations	553
11-5	Comparison of Estimation Methods for Binary-Gas Diffusion Coefficients at Low Pressures	555
11-6	The Effect of Pressure on Diffusion in Gases	560
11-7	The Effect of Temperature on Diffusion in Gases	564
11-8	Diffusion in Multicomponent Gas Mixtures	565
11-9	Diffusion in Liquids: Theory	566
11-10	Estimation of Binary-Liquid Diffusion Coefficients at Infinite Dilution	567
11-11	Concentration Dependence of Binary-Liquid Diffusion Coefficients	582
11-12	The Effect of Temperature on Diffusion in Liquids	586
11-13	Diffusion in Multicomponent Liquid Mixtures	588
11-14	Diffusion in Electrolyte Solutions	590
	Notation	594
	References	596
12.	SURFACE TENSION	602
12-1	Scope	602
12-2	Introduction	602
12-3	Estimation of the Surface Tension of a Pure Liquid	603
12-4	Variation of Surface Tension with Temperature	612
12-5	Surface Tensions of Nonaqueous Mixtures	613
12-6	Surface Tensions of Aqueous Solutions	621
	Notation	624
	References	625
Appendix A	PROPERTY DATA BANK	629

Appendix B	COMPOUND DICTIONARY	666
Appendix C	LENNARD-JONES POTENTIALS AS DETERMINED FROM VISCOSITY DATA	678
Index of Recommendations		681
Subject Index		683
