

# *Contents*

|   |           |
|---|-----------|
| <b>Preface . . . . .</b>  | <b>xi</b> |
| <b>Chapter 1. Historical background and outline of the contents . . . . .</b>   |           |
| 1 Introduction . . . . .  | 1         |
| 2 Historical background . . . . .   | 2         |
| 3 Outline of Chapter 2 . . . . .  | 11        |
| 4 Outline of Chapter 3 . . . . .  | 11        |
| 5 Outline of Chapter 4 . . . . .  | 13        |
| 6 Outline of Chapter 5 . . . . .  | 14        |
| 7 Outline of Chapter 6 . . . . .  | 15        |
| 8 Outline of Chapter 7 . . . . .  | 16        |
| 9 Outline of Chapter 8 . . . . .  | 17        |
| 10 Outline of Chapter 9 . . . . .   | 18        |
| <b>Chapter 2. Preliminaries from the spectral theory of operators . . . . .</b>   |           |
| 1 Introduction . . . . .  | 20        |
| 2 Distribution theory . . . . .   | 21        |
| 3 Hilbert spaces . . . . .  | 31        |
| 4 Linear functionals and linear operators . . . . .   | 40        |
| 5 Linear bounded functionals and linear bounded operators . . . . .   | 42        |
| 6 Linear unbounded operators . . . . .  | 47        |
| 7 Self-adjoint extensions of symmetric operators . . . . .  | 53        |
| 8 Spectral theorem for self-adjoint operators . . . . .   | 56        |
| 9 Rigged Hilbert spaces and expansions in terms of generalized eigenvectors of self-adjoint operators . . . . .         | 61        |
| 10 The stability investigation via the Energy Principle . . . . .   | 64        |
| 11 Preliminaries from the calculus of variations . . . . .  | 71        |
| 12 The eigenvalue problem for a system of two first-order ordinary differential equations on a finite segment . . . . . | 77        |

|  |     |
|--|-----|
| <b>Chapter 3. Basic equations and their main properties</b>                                    | 91  |
| 1 Introduction   | 91  |
| 2 Collisional Maxwell–Boltzmann equations  | 93  |
| 3 Macroscopic variables describing a plasma  | 96  |
| 4 The properties of the collisional integral   | 97  |
| 5 Two-fluid equations  | 98  |
| 6 Asymptotic simplification of two-fluid equations   | 103 |
| 7 Single-fluid MHD equations   | 105 |
| 8 Derivation of MHD equations for conducting fluid   | 109 |
| 9 Dimensionless parameters   | 110 |
| 10 Conservative form of the ideal MHD equations and local conservation laws                    | 112 |
| 11 Boundary and initial conditions for MHD equations   | 119 |
| 12 Global conservation laws and virial theorem   | 125 |
| 13 Lagrangian form of the ideal MHD equations.   | 129 |
| <br>   |     |
| <b>Chapter 4. Magnetohydrodynamical equilibrium</b>  | 132 |
| 1 Introduction   | 132 |
| 2 Basic equations  | 133 |
| 3 On equilibrium of a toroidal plasma with a surface current                                   | 136 |
| 4 Toroidal equilibrium configurations with nested magnetic surfaces                            | 138 |
| 5 Natural coordinates  | 142 |
| 6 Hamada coordinates   | 147 |
| 7 Equilibrium configurations with closed lines of force  | 152 |
| 8 Force-free equilibria  | 155 |
| 9 Structure of the general three-dimensional magnetic field                                    | 156 |
| 10 Equilibrium configurations with continuous symmetry   | 163 |
| 11 Homogeneous and piecewise inhomogeneous equilibria  | 163 |
| 12 One-dimensional inhomogeneous equilibrium plasma slabs                                      | 164 |
| 13 Radially inhomogeneous equilibrium plasma pinches   | 165 |
| 14 General properties of two-dimensional equilibrium configurations                            | 170 |
| 15 Translationally symmetric equilibrium configurations  | 174 |
| 16 Axisymmetric equilibrium configurations. The Grad-Shafranov equation                        | 176 |
| 17 Helically symmetric equilibrium configurations  | 181 |
| 18 Straight plasma column of elliptic cross-section with homogeneous current                   | 182 |
| 19 Toroidal equilibrium configuration of circular cross-section with quasi-homogeneous current | 185 |
| 20 Asymptotic approach to the axisymmetric equilibrium problem                                 | 189 |
| 21 The standard tokamak  | 192 |
| 22 The high- $\beta$ tokamak   | 194 |
| 23 The three-dimensional analogue of the Grad–Shafranov equation                               | 196 |
| 24 Stationary solutions of the resistive MHD equations.  | 199 |

|  |            |
|--|------------|
| <b>Chapter 5. The linearized MHD equations and their general properties . . . . .</b>          | <b>203</b> |
| 1 Introduction . . . . .   | 203        |
| 2 The linearized ideal MHD equations . . . . .   | 204        |
| 3 Spectral problems corresponding to evolutionary problems . . . . .                           | 211        |
| 4 Stability of equilibrium configurations and the Energy Principle . . . . .                   | 215        |
| 5 Alternative forms of the plasma potential energy . . . . .                                   | 220        |
| 6 Minimization of the potential energy with respect to a parallel displacement . . . . .       | 222        |
| 7 Classification of ideal MHD instabilities . . . . .  | 224        |
| 8 The linearized non-ideal MHD equations . . . . .   | 226        |
| <br>   |            |
| <b>Chapter 6. Homogeneous and discretely structured plasma oscillations . . . . .</b>          | <b>229</b> |
| 1 Introduction . . . . .   | 229        |
| 2 Alfvén waves in an incompressible ideal plasma . . . . .                                     | 230        |
| 3 Cold ideal plasma oscillations . . . . .   | 233        |
| 4 Compressible hot plasma oscillations . . . . .   | 236        |
| 5 Finite resistivity effects . . . . .   | 239        |
| 6 Propagation of waves generated by a local source . . . . .                                   | 240        |
| 7 Stratified plasma oscillations . . . . .   | 247        |
| 8 Oscillations of a plasma slab . . . . .  | 254        |
| 9 Instabilities of an ideal stratified gravitating plasma . . . . .                            | 256        |
| 10 Instabilities of a resistive stratified gravitating plasma. . . . .                         | 262        |
| <br>   |            |
| <b>Chapter 7. MHD oscillations of a gravitating plasma slab . . . . .</b>                      | <b>265</b> |
| 1 Introduction . . . . .   | 265        |
| 2 Gravitating slab equilibrium . . . . .   | 266        |
| 3 Oscillations of a hot compressible plasma slab . . . . .                                     | 267        |
| 4 Investigation of the slab stability via the Energy Principle . . . . .                       | 270        |
| 5 On the discrete spectrum of the operator $K_k$ . . . . .                                     | 274        |
| 6 On the essential spectrum of the operator $K_k$ . . . . .                                    | 279        |
| 7 On the discrete spectrum embedded in the essential spectrum . . . . .                        | 282        |
| 8 The eigenfunction expansion formula . . . . .  | 285        |
| 9 Excitation of plasma oscillations by an external power source . . . . .                      | 288        |
| 10 The linearized equations governing resistive gravitating plasma slab oscillations . . . . . | 290        |
| 11 Heuristic investigation of resistive instabilities . . . . .                                | 294        |
| 12 Analytic evaluation of increments of resistive instabilities . . . . .                      | 299        |
| 13 Investigation of the slab stability via the Resistive Energy Principle . .                  | 312        |
| 14 Global resistive interchange quasi-modes . . . . .  | 316        |
| 15 On stable resistive modes eigenfrequencies. . . . .   | 319        |
| <br>   |            |
| <b>Chapter 8. Oscillations of a plasma pinch . . . . .</b>                                     | <b>331</b> |
| 1 Introduction . . . . .   | 331        |
| 2 General cylindrical equilibrium configuration . . . . .                                      | 333        |
| 3 Cylindrical force operator . . . . .   | 334        |
| 4 The Energy Principle for the pinch stability . . . . .                                       | 340        |

|  |            |
|--|------------|
| 5 Criterion of the general screw-pinch stability . . . . .                                       | 343        |
| 6 Spectral properties of the cylindrical force operator . . . . .                                | 346        |
| 7 Secondary heating of a pinch by an external antenna . . . . .                                  | 352        |
| 8 Stability of the straight tokamak . . . . .  | 355        |
| 9 Resistive equations governing general screw-pinch oscillations . . . . .                       | 362        |
| 10 Resonant resistive instabilities of the general screw-pinch . . . . .                         | 365        |
| 11 Resistive instabilities of the straight tokamak . . . . .                                     | 374        |
| 12 The stable resistive spectrum structure. . . . .  | 377        |
| <b>Chapter 9. MHD oscillations of two- and three-dimensional configurations</b>                  | <b>384</b> |
| 1 Introduction . . . . .   | 384        |
| 2 Two- and three-dimensional equilibrium configurations . . . . .                                | 386        |
| 3 Basic equations . . . . .  | 387        |
| 4 The Mercier criterion . . . . .  | 390        |
| 5 The ballooning stability criterion . . . . .   | 395        |
| 6 Axisymmetric ( $n = 0$ ) instabilities of the free-boundary plasma . . . . .                   | 403        |
| 7 Spectral properties of the force operators $K_{I_n}$ and $K_{II_n}$ . . . . .                  | 406        |
| 8 On the essential spectrum of the force operator $K$ . . . . .                                  | 416        |
| 9 Natural oscillations of three-dimensional configurations . . . . .                             | 421        |
| 10 Natural oscillations of three-dimensional configurations with closed magnetic lines . . . . . | 422        |
| 11 Resonant resistive instabilities of axisymmetric toroidal configurations.                     | 426        |
| <b>References</b> . . . . .  | <b>433</b> |
