1. The Plasma State	1
1.1. Preliminary Definition of the Plasma State	1
1.1.1. What Is a Plasma?	1
1.1.2. Temperature in a Plasma	2
1.1.3. Different Types of Plasmas	5
1.2. Generation of Thermal Plasmas	8
1.2.1. High-Intensity Arcs	9
1.2.2. Thermal RF Discharges	16
1.2.3. Microwave Discharges	19
1.3. Properties of Thermal Plasmas	22
1.3.1. Plasma Composition	22
1.3.2. Thermodynamic Properties	25
1.3.3. Fluxes and Transport Properties	28
1.4. Thermal Plasma Technology	33
1.4.1. Plasma Deposition	34
1.4.2. Plasma Synthesis of Fine Powders	37
1.4.3. Thermal Plasma Decomposition	37
1.4.4. Plasma Metallurgy	38
1.4.5. Plasma Densification	41
1.4.6. Plasma Welding and Cutting	43
List of Symbols	43
General Bibliography	45
References	46

2. Basic Atomic and Molecular Theory	49
2.1. Atomic Models	49
2.1.1. Bohr's Model	50
2.1.2. Line Emission	51
2.1.3. Line Absorption	55
2.1.4. Franck–Hertz Experiment	56
2.2. The Hydrogen Atom and Its Eigenfunctions	57
2.2.1. The Schrödinger Equation	57
2.2.2. Solution of the Schrödinger Equation	59
2.2.3. Quantum Numbers	60
2.2.4. Probability Distribution	61
2.3. The Structure of More Complex Atoms	63
2.3.1. Atomic Structure	63
2.3.2. Electronic States of Atoms	67
2.3.3. Designation of Electron Configurations	69
2.4. Excited States of Diatomic Molecules	77
2.4.1. Energy States	77
2.4.2. Classification of the Electronic States of Diatomic Molecules	80
2.4.3. General Remarks about Molecular Spectra	85
2.4.4. The N ₂ ⁺ (1-) Spectra	86
List of Symbols	95
General Bibliography	97
References	98
3. Kinetic Theory	99
3.1. Particles and Collisions	99
3.2. Cross Sections and Collision Frequencies	101
3.2.1. Collision Probabilities	101
3.2.2. Collision Cross Sections	102
3.2.3. Collision Frequencies and Scattering Cross Sections	104
3.2.4. Mean Free Paths	105
3.2.5. Total Effective Cross Section $Q_i(v)$ for Collision Processes	107

3.3. Elementary Processes for Elastic Collisions	107
3.4. Elementary Processes for Inelastic Collisions	109
3.4.1. Excitation	109
3.4.2. Ionization	111
3.4.3. Inelastic Collisions of the Second Kind	114
3.5. Distribution Functions	115
3.5.1. Definition	116
3.5.2. Particle Fluxes	116
3.5.3. The Boltzmann Equation	118
3.5.4. The Maxwellian Distribution	121
3.5.5. Collision Probabilities and Mean Free Paths in a Particle Ensemble	123
3.6. Reaction Rates	124
3.6.1. Binary Reactions	124
3.6.2. Three-Body Reactions	127
3.6.3. Recombination	128
List of Symbols	129
General Bibliography	132
References	132
4. Fundamental Concepts in Gaseous Electronics	133
4.1. Generation of Charge Carriers	133
4.1.1. Direct Ionization	134
4.1.2. Indirect Ionization	134
4.2. Loss of Charge Carriers	134
4.3. Motion of Charge Carriers	135
4.3.1. Drift in Electric Fields	135
4.3.2. Diffusion of Charge Carriers	140
4.3.3. Motion of Charge Carriers in Magnetic Fields	144
4.4. Thermal Excitation and Ionization	151
4.4.1. Boltzmann Distribution	151
4.4.2. Saha Equilibrium	158
4.4.3. Complete Thermal Equilibrium (CTE)	162
