

Contents

Preface.....	v
I. Introduction.....	1
1. Scope of the Report.....	1
2. Characteristics of Neutron Radiation Fields.....	1
II. The Measurement of Thermal Neutron Flux Density (Neutron Fluence Rate).....	2
1. Definitions Relevant to Thermal Neutron Fluxes.....	3
2. Neutron Temperature.....	4
3. The Epi-Maxwellian Component.....	4
4. Techniques for Thermal Flux Density Determinations.....	5
5. Corrections in Thermal Flux Density Determinations.....	6
III. Specification of Fast and Intermediate Neutron Radiation Fields....	6
1. Measuring Techniques.....	7
a. Detectors Based on Proton Recoil Measurements.....	7
b. Threshold Detectors Including Cd and B Shielded Detectors.....	10
c. Resonance Detectors.....	12
d. Detectors Based on Reactions in ^3He , ^6Li and ^{10}B and on Fission in ^{235}U or ^{239}Pu	13
e. Moderating Detectors.....	15
f. Time of Flight Methods.....	18
2. Energy Spectra.....	19
a. Neutron Sources.....	19
b. Slowing Down Spectra.....	22
3. Neutron Flux Density Calibration.....	24
IV. Kerma.....	25
1. Definition of Kerma and Kerma Rate.....	25
2. Fluence and Kerma.....	25
3. Absorbed Dose and Kerma.....	26
4. Calculation of $(\mu_K/\rho)E$	27
5. Distribution of Kerma in Extended Media.....	35
6. Calculation of Kerma from Neutron Energy Spectra.....	36
7. Utilization of the Concept of Kerma.....	37
a. Theory of Instruments.....	37
b. Dose in Bone.....	39
c. Calculation of Radiation Field Quantities.....	40
d. The Kerma at a Point in Free Space.....	40
e. Specification of Source Output.....	41
8. Measurement of the Kerma at a Point in Free Space.....	41
V. Recommendations.....	42
1. Recommendations Arising from Chapter II.....	42
2. Recommendations Arising from Chapter III.....	42
a. Development of Sources and Determination of Characteristics of Sources....	42
b. Development and Improvement of Measuring Techniques.....	42
c. Measurement, Evaluation and Compilation of Cross Sections.....	42
d. Calculation of Spectra.....	42
3. Recommendations Arising from Chapter IV.....	42
References.....	44
ICRU Reports.....	53
Index.....	55
