Foreword	v
Preface	vii
1. Introduction	1
2. Recording Methods and Cameras	1
2.1 Single-Exposure Fluorography	1
2.2 Serial Fluorography	1
2.3 Cine Fluorography	1
3. Basic Components of Cine Cameras	2
3.1 Lenses and Diaphragms	2
3.2 Shutter	2
3.3 Film Gate	2
3.4 Film Transport Mechanisms	2
3.5 Accessory Recordings	3
4. Timing Considerations	3
4.1 Radiation Frequency and Duty Cycle	3
4.1.1 Low-Ripple Continuous Radiation	3
4.1.2 High-Ripple Pulsating Radiation	3
4.1.3 Pulsed Radiation	3
4.2 Shutter and Film Transport	4
4.3 Phase Relationships	4
5. Geometry and Dimensions	4
5.1 Film Formats	4
5.1.1 Cinefluorographic Cameras	4
5.1.2 Single and Serial Film Cameras	4
5.2 Framing	4
5.2.1 Definitions	4
5.2.2 Applications—Single-Exposure and Serial Fluorography	5
5.2.3 Applications—Cinefluorography	5
a. 16 mm	6
b. 35 mm	6
5.3 Cine-Picture Stability	8
5.4 Cine-Film Perforations	8
5.4.1 16 mm film	8
5.4.2 35 mm film	8
ICRU Reports	9
