

Contents

Preface	iii
1. Introduction	1
2. Definitions of Terms and Concepts Currently Used in Radiotherapy	3
2.1 Volumes	3
2.1.1 Aim of Therapy	3
2.1.2 Target Volume	3
2.1.3 Treatment Volume	4
2.1.4 Irradiated Volume	4
2.1.5 Organs at Risk	4
2.2 Absorbed Dose Pattern	4
2.2.1 Representation of a Spatial Dose Distribution by a Set of Planar Dose Distributions	4
2.2.2 Maximum Target Absorbed Dose	5
2.2.3 Minimum Target Absorbed Dose	5
2.2.4 Mean Target Absorbed Dose	5
2.2.5 Median Target Absorbed Dose	5
2.2.6 Modal Target Absorbed Dose	5
2.2.7 Hot Spots	5
3. Recommendations for Reporting Absorbed Dose in External Beam Therapy	10
3.1 Introduction	10
3.2 Description of Technique	10
3.3 Specification of Target Absorbed Dose	11
3.3.1 Stationary Beams of Photons	11
3.3.2 Moving Beam Therapy	13
3.3.3 Electron Therapy	14
3.3.4 Complex Treatments: General Recommendations	14
3.3.5 Additional Recommendations	14
4. Factors Influencing the Biological Effect	17
4.1 Radiation Quality	17
4.2 Time-Dose Pattern	17
References	18
ICRU Reports	19
Index	21
