

# Table of Contents

## Chapter 1 Physics of Stationary Plasmas

1.1	Introduction	1
1.2	The Equation of Motion of a Charged Particle	2
1.3	The Vlasov Equation	4
1.4	Characteristic Scales in Plasmas	7
1.5	Conservation Laws	12
1.6	Magnetohydrodynamic Equations	16
1.7	Guiding Center Motions	24
1.8	Guiding Center Currents	30
1.9	Drift Kinetic Equation	34
1.10	Hydromagnetic Equilibrium	35
1.11	Adiabatic Invariants	45
1.12	Transport Coefficients	48
1.13	Particle Distribution Function	51

## Chapter 2 Small Amplitude Waves

2.1	Introduction	55
2.2	Waves in a Cold Plasma Without a Magnetic Field	57
2.3	Waves in a Cold Plasma with a Uniform Magnetic Field	60
2.4	Quasi-Electrostatic Waves	66
2.5	MHD Waves	67
2.6	Waves in Vlasov Plasmas	71
2.7	Surface Waves	80
2.8	Resonant Absorption and the Kinetic Alfvén Wave	84
2.9	Drift Wave	95
2.10	Effect of Magnetic Field Curvature	97
2.11	Wave Energy Density	101
2.12	Wave Kinetic Equation	104

## Chapter 3 Stationary Solar Plasma System

3.1	Introduction	109
3.2	Solar Plasma	110
3.3	Solar Wind	114
3.4	Earth's Magnetosphere	124
3.5	Ionosphere	155
3.6	Magnetosphere - Ionosphere Coupling	165
