

目 次

| | |
|---------------------------|----|
| 1. はじめに | 1 |
| 2. 核融合原型炉 | 1 |
| 2.1 原型炉の要件 | 1 |
| 2.2 原型炉用構造材料 | 2 |
| 3. ブランケット構造材料の開発計画 | 2 |
| 3.1 ブランケット構造材料に対する要求事項 | 2 |
| 3.2 候補材料と開発の方針 | 2 |
| 3.3 各材料の課題と開発計画 | 4 |
| 3.3.1 使用条件と材料課題 | 4 |
| 3.3.2 開発計画 | 7 |
| 3.3.3 チェック・アンド・レビュー | 10 |
| 3.4 その他の材料技術の適用 | 10 |
| 4. 照射施設 | 11 |
| 5. まとめ | 13 |
| 6. 材料開発計画の各論及び照射施設 | 15 |
| 6.1 低放射化フェライト鋼(先進材料) | 15 |
| 6.1.1 要求される性能 | 15 |
| 6.1.2 開発の課題及び考え方 | 16 |
| 6.1.3 開発の現状 | 26 |
| 6.1.4 開発計画 | 28 |
| 6.2 SiC/SiC 複合材料(次世代先進材料) | 36 |
| 6.2.1 核融合炉での使用環境 | 36 |
| 6.2.2 要求される性能 | 37 |
| 6.2.3 研究開発課題 | 39 |
| 6.2.4 研究開発の現状 | 42 |
| 6.2.5 開発計画 | 44 |
| 6.3 バナジウム合金(次世代先進材料) | 49 |
| 6.3.1 バナジウム合金の性能 | 49 |
| 6.3.2 バナジウム合金の課題 | 54 |
| 6.3.3 開発計画 | 55 |
| 6.4 照射施設 | 59 |
| 6.4.1 照射試験施設の重要性 | 59 |

| | | |
|------|--|----|
| | 6.4.2 照射損傷に影響を与える因子と 核融合材料照射用中性子源の必要性 ----- | 60 |
| | 6.4.3 照射施設に関する要求事項と現状との比較 ---- | 63 |
| | 6.4.4 照射施設等の整備と利用計画 ----- | 68 |
| | 6.4.5 材料の開発段階と照射場特性 ----- | 74 |
| | 6.4.6 照射施設 ----- | 79 |
| 付録 1 | 構造材料研究開発推進専門部会名簿 ----- | 85 |
| 付録 2 | フェライト鋼第一壁の構造強度に関する検討 ----- | 87 |

Contents

| | |
|---|----|
| 1. Introduction ----- | 1 |
| 2. Fusion Proto-type Reactors ----- | 1 |
| 2.1 Requirements for Proto-type Reactors ----- | 1 |
| 2.2 Structural Materials for Proto-type Reactors ----- | 2 |
| 3. Development Plan for Blanket Structural Materials ----- | 2 |
| 3.1 Requirements for Blanket Structural Materials ----- | 2 |
| 3.2 Candidate Materials and the Policy for Their Development ----- | 2 |
| 3.3 Candidate Materials Issues and Plans for Their Development ----- | 4 |
| 3.3.1 Usage Conditions and Candidate Materials Issues ----- | 4 |
| 3.3.2 Development Plans for Candidate Materials ----- | 7 |
| 3.3.3 Check and Reviews ----- | 10 |
| 3.4 Application of Other Materials ----- | 10 |
| 4. Irradiation Facilities ----- | 11 |
| 5. Summary ----- | 13 |
| 6. Details of Candidate Materials and Irradiation Facilities ----- | 15 |
| 6.1 Reduced Low Activation Ferritic/Martensitic Steel (Advanced Material) ----- | 15 |
| 6.1.1 Required Properties ----- | 15 |
| 6.1.2 Issues and Policy for Its Development ----- | 16 |
| 6.1.3 Present Status of the Material Development ----- | 26 |
| 6.1.4 Development Plan ----- | 28 |
| 6.2 SiC/SiC Composites (Next Generation Advanced Material) ----- | 36 |
| 6.2.1 Usage Conditions in Fusion Reactors ----- | 36 |
| 6.2.2 Required Properties ----- | 37 |
| 6.2.3 Issues of its Development ----- | 39 |
| 6.2.4 Present Status of the Material ----- | 42 |
| 6.2.5 Development Plan ----- | 44 |
| 6.3 Vanadium Alloys (Next Generation Advanced Material) ----- | 49 |
| 6.3.1 Properties of Vanadium Alloys ----- | 49 |
| 6.3.2 Issues of Vanadium Alloys ----- | 54 |
| 6.3.3 Development Plan ----- | 55 |
| 6.4 Irradiation Facilities ----- | 59 |
| 6.4.1 Importance of Irradiation Facilities ----- | 59 |
| 6.4.2 Influential Factors of Radiation Damage and Necessity of Neutron Source for Irradiating Fusion Materials ----- | 60 |
| 6.4.3 Comparison of Required Performance of Irradiation Facilities and the Present Status ----- | 63 |
| 6.4.4 Equipment of Irradiation Facilities and Utilization Plan ----- | 68 |
| 6.4.5 Materials Development Stages and Irradiation Characteristics ----- | 74 |
| 6.4.6 Irradiation Facilities ----- | 79 |

| | |
|---|----|
| Appendix 1. Name List of Members of Structural Materials Research and Development Subcommittee ----- | 85 |
| Appendix 2. A Preliminary Evaluation of the Strength of LAFM First Wall ----- | 87 |
