

# Contents

## Chapter 1. Introduction

1.1. General Description . . . . .	1
1.2. Objectives . . . . .	4
1.3. Topics . . . . .	5
1.4. Historical Background . . . . .	6
1.5. Extension of the ERDA Method in IBA Laboratories Worldwide . . . . .	11
1.6. Conclusion . . . . .	15
References . . . . .	15

## Chapter 2. Basic Physical Processes of Elastic Spectrometry

2.1. Introduction . . . . .	21
2.2. Kinematics of Elastic Collision . . . . .	22
2.2.1. Mechanics of the Collision . . . . .	22
2.2.2. Kinematic Factors . . . . .	26
2.3. Geometric Considerations . . . . .	28
2.4. Energy Loss . . . . .	29
2.5. Straggling . . . . .	33
2.5.1. Theories of Energy Straggling . . . . .	33
2.5.1.1. Very Low Fractional Energy Loss . . . . .	33
2.5.1.2. Medium Fractional Energy Loss . . . . .	34
2.5.1.3. Large Fractional Energy Loss . . . . .	36
2.5.2. Practical Straggling Evaluation . . . . .	37
2.6. Conclusion . . . . .	37
References . . . . .	38

## Chapter 3. Elastic Scattering: Cross-Section and Multiple Scattering

3.1. Introduction . . . . .	41
-----------------------------	----

3.2. Elastic Cross Section . . . . .	42
3.2.1. Rutherford Scattering . . . . .	43
3.2.2. Cross Section in the Laboratory System . . . . .	45
3.2.3. Rutherford Recoil Cross Section . . . . .	45
3.2.4. Rutherford Projectile Cross Section . . . . .	46
3.2.5. Limit of Rutherford Behavior: Threshold Energy . . . . .	48
3.2.6. Non-Rutherford Scattering . . . . .	49
3.2.7. Alpha-Proton Collisions up to 4 MeV . . . . .	50
3.2.7.1. Differential Cross-Section Calculation . . . . .	51
3.2.7.2. Phase Shift Analyses . . . . .	53
3.2.7.3. Data Selection . . . . .	54
3.2.7.4. Semiempirical Evaluation . . . . .	57
3.2.8. Alpha-Deuteron Collision up to 2.5 MeV . . . . .	58
3.2.8.1. Data Selection . . . . .	59
3.2.8.2. Semiempirical Evaluation . . . . .	61
3.2.9. Alpha-Triton Collision up to 3 MeV . . . . .	62
3.2.9.1. Data Selection . . . . .	62
3.2.9.2. Semiempirical Evaluation . . . . .	63
3.2.10. $^3\text{He}$ -Proton Collision up to 3 MeV . . . . .	64
3.2.10.1. Data Selection . . . . .	66
3.2.10.2. Semiempirical Evaluation . . . . .	66
3.2.11. Cross-Section Summary . . . . .	67
3.3. Multiple Scattering . . . . .	67
3.3.1. Basic Equations . . . . .	70
3.3.1.1. Neglected Energy Loss Effects . . . . .	71
3.3.1.2. Energy Loss Effects . . . . .	74
3.3.2. Multielemental Targets . . . . .	76
3.3.3. Practical Evaluation . . . . .	77
3.3.4. Combined Lateral–Angular Multiple Scattering . . . . .	80
3.3.5. Multiple Scattering Summary . . . . .	80
References . . . . .	81

## Chapter 4. Elastic Spectrometry: Fundamental and Practical Aspects

4.1. Introduction . . . . .	85
4.2. Fundamentals of Recoil Spectrometry . . . . .	86
4.2.1. Depth Scale . . . . .	87
4.2.2. Energy–Depth Relationship . . . . .	90
4.2.3. Forward Recoil Yield . . . . .	93
4.2.3.1. Thin Target Sample . . . . .	93
4.2.3.2. Thick Target Sample . . . . .	96
4.2.3.3. Influence of Energy Broadening on a Recoil Spectrum . . . . .	99
4.2.3.4. Statistical Fluctuations of the Recoil Yield . . . . .	100

4.2.4. Depth Resolution . . . . .	101
4.2.4.1. Theoretical Expression . . . . .	101
4.2.4.2. Practical Importance of Depth Resolution . . . . .	105
4.2.5. Mass Resolution . . . . .	108
4.2.6. Selectivity . . . . .	110
4.3. Practical Spectrometry of Real Targets . . . . .	110
4.3.1. Ideal and Real Targets . . . . .	110
4.3.2. Lateral Nonuniformity . . . . .	111
4.3.3. Deviations from Bragg's Rule . . . . .	115
4.3.4. Beam Damage . . . . .	117
4.3.5. Insulators . . . . .	119
4.3.6. Target Crystallinity . . . . .	121
4.3.7. Statistical Considerations . . . . .	122
References . . . . .	122

## Chapter 5. Conventional Recoil Spectrometry

*With Hans Hofsäas*

5.1. Introduction . . . . .	127
5.2. Mass–Depth and Recoil–Scattered Ion Ambiguities . . . . .	128
5.3. Glancing Geometry . . . . .	130
5.3.1. Experimental Reflection Configuration . . . . .	130
5.3.2. Analytical Capabilities of ERDA in Reflection . . . . .	131
5.3.2.1. Multielemental Analysis . . . . .	131
5.3.2.2. Depth Resolution . . . . .	131
5.3.2.3. Maximum Analyzable Depth . . . . .	134
5.4. Transmission Geometry . . . . .	135
5.4.1. Experimental Transmission Configuration . . . . .	135
5.4.2. Analytic Capabilities of ERDA in Transmission . . . . .	135
5.4.2.1. Surface Roughness and Thickness Heterogeneity . . . . .	136
5.4.2.2. Detection near Zero Degree . . . . .	136
5.4.2.3. Maximum Analyzable Depth . . . . .	136
5.4.2.4. Recoil–Projectile Ambiguity . . . . .	136
5.4.2.5. Depth Resolution . . . . .	137
5.4.2.6. Microbeam Capabilities . . . . .	137
5.5. Sensitivity . . . . .	137
5.6. Mass Resolution . . . . .	138
References . . . . .	139

## Chapter 6. Time of Flight ERDA

*With Nick Dytlewski*

6.1. Introduction . . . . .	143
-----------------------------	-----

6.2. General Considerations . . . . .	144
6.3. Time of Flight Detector . . . . .	146
6.4. Electrostatic Mirror Detector . . . . .	150
6.5. Efficiency and Resolution . . . . .	152
6.5.1. Efficiency . . . . .	152
6.5.2. Mass Resolution . . . . .	153
6.5.3. Depth Resolution . . . . .	156
6.6. Data Analysis Procedure . . . . .	158
6.7. Conclusion . . . . .	159
References . . . . .	159

## Chapter 7. Depth Profiling by Means of the ERDA *ExB* Technique

*With Guy Ross*

7.1. Introduction . . . . .	163
7.2. Physics and Properties of the <i>ExB</i> Filter . . . . .	164
7.3. Practical Considerations . . . . .	167
7.3.1. Correction for Undetected Charge Fractions . . . . .	167
7.3.2. Depth Resolution . . . . .	167
7.3.3. Depth Profiling in Low-Z Materials . . . . .	168
7.3.4. Ion-Beam-Induced Depletion . . . . .	168
7.4. Adjustments for a 350-keV Helium Beam . . . . .	171
7.4.1. Hydrogen Depth Profiling . . . . .	171
7.4.2. Deuterium Depth Profiling . . . . .	174
7.4.3. Tritium Depth Profiling . . . . .	176
7.4.4. $^3\text{He}$ Depth Profiling . . . . .	177
7.4.5. $^4\text{He}$ Depth Profiling . . . . .	178
7.5. Depth Profiling with a High-Energy (MeV) Beam . . . . .	179
7.5.1. $^4\text{He}$ 1-MeV Beam . . . . .	179
7.5.2. $^4\text{He}$ 2.5-MeV Beam . . . . .	179
7.5.3. $^{15}\text{N}$ 2.65-MeV Beam . . . . .	181
7.6. Modified <i>ExB</i> Filter for Heavier Elements . . . . .	182
7.6.1. The <i>B-ExB-B</i> Filter . . . . .	183
7.6.2. Filter Design . . . . .	184
7.6.3. Performance Evaluation . . . . .	185
7.7. Conclusion . . . . .	192
References . . . . .	193

## Chapter 8. Recoil Spectrometry with a $\Delta E$ - $E$ Telescope

8.1. Introduction . . . . .	195
8.2. Experimental Considerations . . . . .	196
8.3. Performances . . . . .	199

8.3.1. Mass and Charge Separation . . . . .	199
8.3.2. Depth Resolution . . . . .	199
8.3.3. Sensitivity . . . . .	201
8.4. Examples . . . . .	202
8.5. Conclusion . . . . .	205
References . . . . .	206
Chapter 9. Coincidence Techniques	
<i>With Hans Hofsä</i>	
9.1. Introduction . . . . .	209
9.2. Transmission Geometry and Coincidence Techniques . . . . .	211
9.3. Single-Element Analysis with CERDA . . . . .	212
9.3.1. Scattering Kinematics . . . . .	214
9.3.2. Experimental Set-up and Coincidence Measuring Systems . . . . .	217
9.3.3. Multiple Scattering . . . . .	219
9.4. Multiple-Element Analysis with CERDA . . . . .	220
9.5. Scattering Recoil Coincidence Spectroscopy . . . . .	227
9.6. Elastic Recoil Coincidence Spectroscopy . . . . .	230
9.6.1. Basic Considerations . . . . .	231
9.6.2. Application: Profiling Carbon and Oxygen in Polycarbonate . . . . .	232
9.6.3. Data Analysis . . . . .	235
9.7. Position-Sensitive Detectors for Coincidence ERDA Techniques . . . . .	239
9.8. Conclusion . . . . .	242
References . . . . .	243
Chapter 10. Instrumental Equipment	
10.1. Introduction . . . . .	247
10.2. Accelerator and Related Equipment . . . . .	247
10.2.1. Accelerator . . . . .	247
10.2.2. Related Equipment . . . . .	248
10.3. Beam Line . . . . .	249
10.4. Analysis Chamber . . . . .	249
10.4.1. Target Holder . . . . .	250
10.4.2. Beam Current Measurement . . . . .	251
10.4.3. Vacuum and Trapping of Contaminants . . . . .	251
10.5. Detection Devices . . . . .	252
10.5.1. Description . . . . .	252
10.5.1.1. Silicon Barrier Detectors . . . . .	252
10.5.1.2. Energy Calibration of the Detection System . . . . .	253
10.5.1.3. Detection Collimators and Absorber Foil . . . . .	254
10.5.1.4. Other Detection Devices . . . . .	255

10.5.2 Usual Performances . . . . .	258
10.6. Conclusion . . . . .	258
References . . . . .	259

## Chapter 11. Numerical Methods for Recoil Spectra Simulation and Data Processing

11.1. Introduction . . . . .	263
11.2. Simulation Process: Basic Method . . . . .	265
11.2.1. Energy Loss of the Incident Ion . . . . .	266
11.2.2. Collision Events and Recoil Yields . . . . .	267
11.2.3. Energy Loss of Recoils . . . . .	268
11.2.4. Total Spectrum . . . . .	268
11.2.5. Energy Straggling . . . . .	269
11.2.6. Multiple Scattering . . . . .	269
11.2.7. Total Energy Dispersion . . . . .	270
11.3. Alternative Simulation Process: Retrograde Method . . . . .	271
11.3.1. Principle . . . . .	271
11.3.2. Energy Loss and Collision Kinematics . . . . .	273
11.3.3. Recoil Yields . . . . .	273
11.4. Profile Extraction from Experimental Spectra . . . . .	274
11.4.1. Methods . . . . .	274
11.4.1.1. Interactive Modification Method . . . . .	274
11.4.1.2. Multiparametric Fit . . . . .	275
11.4.1.3. Spectrum-Scaling Method . . . . .	275
11.4.1.4. Iterative Profile Reconstitution Method . . . . .	276
11.4.2. Converting into Depth Profiles . . . . .	277
11.4.3. Experimental Parameters . . . . .	278
11.4.4. Counting Statistics . . . . .	280
11.4.4.1. Counting Noise . . . . .	280
11.4.4.2. Noise Filtering . . . . .	281
11.4.5. Particular Target Behaviors . . . . .	282
11.4.5.1. Lateral Nonuniformity . . . . .	282
11.4.5.2. Charge Accumulation in Insulators . . . . .	284
11.4.6. Mass-Depth Ambiguity . . . . .	285
11.5. Algorithms and Programs . . . . .	286
11.5.1. Typical Software . . . . .	286
11.5.1.1. RUMP Simulation Algorithm . . . . .	286
11.5.1.2. RBX Simulation and Analysis Program . . . . .	287
11.5.1.3. LORI Analysis Program . . . . .	288
11.5.1.4. GABY Simulation and Profile Optimization Algorithm . . . . .	288
11.5.1.5. GISA Simulation and Analysis Program . . . . .	289
11.5.2. Hardware . . . . .	289

11.6. Adaptation to Other ERDA Variants . . . . .	289
11.6.1. Time of Flight ERDA . . . . .	290
11.6.2. ERDA with <i>ExB</i> Filters . . . . .	291
11.6.3. ERDA with $\Delta E$ -E Telescopes . . . . .	292
11.6.4. Coincidence ERDA . . . . .	293
11.7. Conclusion . . . . .	293
References . . . . .	295
Chapter 12. Applications of Elastic Recoil Spectrometry to Hydrogen Determination in Solids	
12.1. Introduction . . . . .	299
12.2. Applications in Polymer Sciences . . . . .	300
12.2.1. Surface Properties . . . . .	300
12.2.2. Polymer Blends . . . . .	301
12.2.3. Polymer Irradiation . . . . .	301
12.3. Applications to Semiconductor Materials . . . . .	302
12.3.1. Silicon-Based Media . . . . .	303
12.3.2. Germanium-Based Media . . . . .	305
12.3.3. Other Media . . . . .	305
12.4. Applications to Thin Films . . . . .	305
12.4.1. Metal and Inorganic Compound Layers . . . . .	306
12.4.2. Amorphous Carbon Films and Diamondlike Carbon Layers . . . . .	308
12.5. Study of Interface Reactions . . . . .	312
12.5.1. Surface Corrosion Mechanisms . . . . .	312
12.5.2. Wear Transfer Process . . . . .	312
12.6. Other Application Fields . . . . .	315
12.7. Study of Hydrogen Behavior under Irradiation . . . . .	316
12.8. Conclusion . . . . .	317
References . . . . .	317
Bibliography . . . . .	323
Chapter 13. Elastic Recoil Spectrometry Using High-Energy Ions for Hydrogen and Light Element Profiling	
13.1. Introduction . . . . .	325
13.2. General Considerations . . . . .	326
13.2.1. Kinematics . . . . .	326
13.2.2. Rutherford Cross Section for Recoil Scattering with High-Energy Heavy Ions . . . . .	327
13.2.3. Cross Section for Recoil Scattering with High-Energy $^4\text{He}$ Ions . . . . .	329
13.3. Experimental Arrangement for HI-ERDA . . . . .	330

13.4. Detection Capabilities . . . . .	331
13.4.1. Energy Resolution . . . . .	331
13.4.2. Depth Resolution . . . . .	333
13.4.3. Limitations . . . . .	335
13.5. Application Examples . . . . .	337
13.5.1. ERDA Using High-Energy $^4\text{He}$ Ions . . . . .	337
13.5.2. ERDA Using High-Energy Heavy Ions . . . . .	337
13.6. Conclusion . . . . .	348
References . . . . .	349
Bibliography . . . . .	351

## Chapter 14. Ion-Beam Damaging Effects

14.1. Introduction . . . . .	353
14.2. Basic Considerations on Ion-Beam Damaging . . . . .	355
14.2.1. Thermal Effects . . . . .	355
14.2.2. Electronic Defects and Bond Breaking . . . . .	358
14.2.3. Ballistic Damage . . . . .	361
14.2.4. Charge Accumulation Effects . . . . .	362
14.3. Elemental Losses . . . . .	363
14.3.1. Hydrogen Loss from Polymers . . . . .	363
14.3.2. Irradiation-Enhanced Diffusion of Hydrogen in Solids . . . . .	365
14.3.3. Irradiation-Enhanced Hydrogen Desorption . . . . .	367
14.3.4. Behavior of Other Elements . . . . .	370
14.4. Reduction of Radiation Damage . . . . .	376
14.5. Choice, Preparation, and Stability of Standard Samples . . . . .	377
14.5.1. Introduction . . . . .	377
14.5.2. Hydrogen Standard Samples . . . . .	377
14.5.3. Other Standards . . . . .	379
14.6. Conclusion . . . . .	380
References . . . . .	381
Bibliography . . . . .	385

## Chapter 15. Hydrogen Determination by Nuclear Resonance

15.1. Introduction . . . . .	387
15.2. General Considerations . . . . .	392
15.2.1. Resonance Occurrence . . . . .	392
15.2.2. Physical Effects . . . . .	392
15.2.2.1. Energy Straggling . . . . .	393
15.2.2.2. Recoil . . . . .	395
15.2.2.3. Doppler Broadening . . . . .	395
15.2.2.4. Lewis Effect . . . . .	396

15.3. Hydrogen Profiling by Nuclear Resonance . . . . .	396
15.3.1. Basic Principle . . . . .	396
15.3.2. Analytic Characteristics . . . . .	398
15.4. Comparison with Elastic Recoil Spectrometry . . . . .	399
15.4.1. Introduction . . . . .	399
15.4.2. Technical Comparison . . . . .	400
15.4.3. Arguments for a Practical Choice . . . . .	401
15.5. Conclusion . . . . .	401
References . . . . .	402
Bibliography . . . . .	404
General Conclusion . . . . .	407
Acknowledgments . . . . .	411
Appendix A. Basic Data References . . . . .	413
Appendix B. Calculation of the Detection Solid Angle . . . . .	423
Appendix C. Specific Units, Physical Constants, and Conversion Factors . . . . .	429
Appendix D. Recent References . . . . .	431
Appendix E. Acronyms . . . . .	433
Index . . . . .	435
