

CONTENTS

FOREWORD	xi
PART I. THEORY AND INSTRUMENTATION	1
1 INTRODUCTION TO NEAR-FIELD OPTICS	3
1.1 Imaging / 3	
1.2 Spatial Resolution / 5	
1.3 The Development of Near-Field Microscopy / 8	
1.3.1 The Near-Field Scanning Optical Microscope / 9	
1.3.2 Optical Tunneling Microscopes / 15	
1.4 Definition of Near-Field Optics / 16	
1.5 Outline of the Volume / 16	
1.5.1 Theory and Instrumentation / 17	
1.5.2 Near-Field Microscopy in Practice / 17	
1.5.3 Applications / 17	
1.5.4 Related Instruments and Conclusions / 18	
References / 18	
2 IMAGING	21
2.1 Microscopic Imaging / 21	
2.2 Classical Treatment of Imaging / 22	
2.3 The NSOM as a Scanned Image Microscope / 24	
2.3.1 Illumination Mode / 25	
2.3.2 Collection Mode / 26	
2.4 The Scanning Process / 27	
2.5 Spatial Resolution and NSOM Imaging / 29	
References / 31	

3	THE TAPERED OPTICAL FIBER AND OTHER SENSING ELEMENTS	33
3.1	The Sensing Element as the Heart of the NSOM / 33	
3.2	Optics of the Tapered Optical Fiber / 34	
3.2.1	NSOM Fiber-Optics / 35	
3.2.2	NSOM Taper Optics / 46	
3.2.3	Dark-Field NSOM Optics / 53	
3.3	Taper Fabrication / 55	
3.3.1	Heating-and-Pulling / 55	
3.3.2	Etching / 57	
3.4	Alternative Probes / 59	
3.4.1	Other Waveguides / 60	
3.4.2	The AFM Cantilever / 61	
3.4.3	Semiconducting Structures / 62	
	References / 63	
4	NSOM THEORY	67
4.1	General Theoretical Issues / 67	
4.2	NSOM Imaging Theory / 69	
4.3	The Near-Field Profile / 79	
4.3.1	Near-Fields of Simple Structures / 80	
4.3.2	Near-Fields of NSOM-Related Structures / 81	
4.4	Prospects for the Future Developments in Near-Field Theory / 93	
	References / 94	
5	NSOM INSTRUMENTATION	97
5.1	Introduction to NSOM Instrumentation / 97	
5.2	General SPM Instrumentation / 98	
5.2.1	Vibration Isolation / 99	
5.2.2	Scanners / 103	
5.2.3	Control Electronics and Image Analysis / 106	
5.3	NSOM Instrumentation / 108	
5.3.1	Light Sources / 108	
5.3.2	Collection Optics / 111	
5.3.3	Detection / 113	
5.3.4	Scanner Design / 114	
5.4	Feedback / 117	
5.5	Coarse and Fine Tip Approach / 125	

5.6	Spectroscopy in the Near-Field /	127
5.7	Additional Design Considerations /	132
5.7.1	Inverted Microscope Design /	133
5.7.2	Dual Transmission/Reflection NSOM /	135
5.7.3	Low-Temperature NSOM /	137
	References /	140
6	OPTICAL TUNNELING MICROSCOPES	143
6.1	Optical Tunneling Microscopes as Near-Field Instruments /	143
6.2	The Development of Photon Tunneling in Optical Research /	144
6.3	Theory of Operation of the PTM /	146
6.4	Intrumentation and Operation of the PTM /	154
6.4.1	The Transducer and Sample Stage /	154
6.4.2	Illuminator and Objective /	156
6.4.3	Signal Detection, Calibration, and Imaging /	157
6.4.4	Sample Preparation /	158
6.5	Applications, Results, and Conclusions /	158
	References /	160
	PART II. PRACTICE	163
7	CONTRAST	165
7.1	The Notion of Contrast /	165
7.2	Information Transfer for Far-Field Incoherent Illumination /	166
7.3	Information Transfer for the NSOM /	169
7.4	Modulation and Contrast Mechanisms /	172
	References /	174
8	INTENSITY	175
8.1	Introduction to Intensity Measurements /	175
8.2	Early Demonstrations of Super Resolution Imaging /	176
8.3	The Tip-Sample Interaction /	186
8.4	Resolution: A Reprise /	192
8.5	Conclusion /	201
	References /	201

9	POLARIZATION	203
9.1	Introduction / 203	
9.2	Polarization in the Near-Field / 203	
9.3	Obtaining a Linear Polarized State with a Near-Field Probe / 205	
9.4	Reflection Mode Polarization NSOM / 207	
9.5	Transmission Mode Polarization NSOM / 212	
9.6	Conclusion / 217	
	References / 218	
10	WAVELENGTH	219
10.1	What is Wavelength Spectroscopy? / 219	
10.1.1	Optical Spectroscopy of Chemical Systems / 221	
10.1.2	Optical Spectroscopy of Solid-State Materials / 222	
10.1.3	Optical Spectroscopy of Biological Systems / 223	
10.2	Near-Field Spectroscopy Effects / 223	
10.3	Early Demonstrations of NSOM Spectroscopy / 224	
10.4	Summary / 230	
	References / 230	
11	AMPLITUDE AND PHASE	231
11.1	Amplitude and Phase Measurements / 231	
11.2	Interferometric Imaging / 231	
11.3	Experimental Setup / 234	
11.4	Amplitude and Phase Contrast Images / 234	
	References / 237	
12	TIME	239
12.1	Time as a Contrast Mechanism / 239	
12.2	Carrier Lifetimes in Semiconductors / 241	
12.3	Single-Molecule Dynamics / 245	
12.4	Single-Molecule Lifetimes / 247	
12.5	Temporal Effects of Near-Field Fiber Probes / 247	
	References / 248	
13	PLASMONS	249
13.1	The Use of a Plasmon Resonance to Increase Contrast / 249	
13.2	Plasma Oscillations and Plasmons / 249	

- 13.3 Surface Plasmon Resonances of Small Features / 250
 - 13.3.1 Protrusions on a Film / 250
 - 13.3.2 The Tetrahedral Tip / 251
 - 13.3.3 The Magneto-Optic Kerr Effect NSOM / 252
- 13.4 Surface Plasmon Resonances of Films / 253
 - References / 254

PART III. APPLICATIONS 257

14 SURFACE CHEMISTRY 259

- 14.1 Introduction / 259
- 14.2 Liquid Crystals / 260
- 14.3 Single-Molecule Detection / 264
 - 14.3.1 Instrumentation for Single-Molecule Detection / 266
 - 14.3.2 Interaction of NSOM Aperture with Molecular Electric Dipole / 268
 - 14.3.3 Dynamic Investigations of Single Molecules / 269
 - 14.3.4 Spectroscopy of Single Molecules / 276
- 14.4 Fluorescence of Polymer Films / 282
- 14.5 Summary / 284
 - References / 285

15 BIOLOGY 287

- 15.1 Introduction / 287
- 15.2 Early Biological Near-Field Imaging / 289
- 15.3 NSOM Imaging of Single Proteins and Photosynthetic Membranes / 291
- 15.4 NSOM Chemical Fiber Sensors / 293
 - References / 295

16 MATERIALS SCIENCE 297

- 16.1 Materials Science and NSOM / 297
- 16.2 Low-Temperature NSOM / 297
- 16.3 Self-Luminous Device and Waveguide Analysis Using NSOM / 304
- 16.4 Photoconductivity Measurements Using NSOM / 309
 - References / 311

17	INFORMATION STORAGE	313
17.1	NSOM Data Storage / 313	
17.2	Magneto-Optics Data Storage / 313	
17.3	Solid Immersion Lens / 318	
	References / 321	
18	NONVISIBLE WAVELENGTH INSTRUMENTS	323
18.1	Broadening the Perspective / 323	
18.2	Microwave / 324	
18.3	Infrared / 325	
18.4	Ultraviolet / 331	
18.5	x-Rays / 331	
	References / 333	
PART IV.	RELATED TECHNIQUES AND CONCLUSION	335
19	RELATED TECHNIQUES AND UNUSUAL CONFIGURATIONS	337
19.1	Complementary Developments / 337	
19.2	Unusual NSOM Configurations / 338	
19.2.1	The Tunnel NSOM / 338	
19.2.2	Vibrating Metallic Tip NSOM / 339	
19.2.3	The Wiener Fringe Microscope / 340	
19.3	Related Techniques / 341	
19.3.1	Near-Field Acoustic Microscopy / 341	
19.3.2	Scanning Near-Field Ellipsometric Microscope / 343	
19.3.3	The Trapped-Particle Optical Microscope / 344	
	References / 344	
20	CONCLUSIONS AND FUTURE DIRECTIONS	347
	INDEX	351
