| CONTRIBUTORS..... | xi |
| PREFACE | xiii |
| VOLUMES IN SERIES..... | xv |
| | |
| 1. Laser-Produced Plasmas as Short-Wavelength Incoherent Optical Sources by JAMES F. YOUNG | |
| 1.1. Introduction..... | 1 |
| 1.2. Black-Body Radiators..... | 6 |
| 1.3. Laser-Produced Plasmas..... | 7 |
| 1.4. Practical Considerations..... | 13 |
| References | 18 |
| | |
| 2. Synchrotron Radiation by PETER D. JOHNSON | |
| 2.1. Introduction..... | 23 |
| 2.2. Synchrotron Radiation Characteristics..... | 24 |
| 2.3. Light Monochromatization..... | 33 |
| 2.4. Applications..... | 40 |
| References | 42 |

| | |
|--|-----|
| 3. Continuous Wave Dye Lasers | |
| by ANDREW DIENES AND DIEGO R. YANKELEVICH | |
| 3.1. Introduction | 45 |
| 3.2. Basic Dye Laser Principles | 46 |
| 3.3. Simple CW Dye Laser Theory | 50 |
| 3.4. Actual CW Dye Lasers | 56 |
| 3.5. Alignment of a CW Dye Laser | 71 |
| References | 73 |
| | |
| 4. Semiconductor Diode Lasers | |
| by R. W. FOX, A. S. ZIBROV, AND L. HOLLBERG | |
| 4.1. Introduction | 77 |
| 4.2. General Characteristics of Diode Lasers | 77 |
| 4.3. Extended-Cavity Lasers | 84 |
| 4.4. Electronics | 89 |
| 4.5. Optical Coatings on Laser Facets | 95 |
| 4.6. Diode Laser Frequency Noise and Stabilization | 97 |
| 4.7. Extending Wavelength Coverage | 99 |
| References | 100 |
| | |
| 5. Frequency Stabilization of Tunable Lasers | |
| by MIAO ZHU AND JOHN L. HALL | |
| 5.1. Introduction | 103 |
| 5.2. Optical Frequency References | 106 |
| 5.3. Transducers | 121 |
| 5.4. Loop Filter | 124 |
| 5.5. Design Examples | 126 |
| 5.6. Summary | 134 |
| References | 134 |

| | |
|---|-----|
| 6. Pulsed Lasers | |
| by MICHAEL G. LITTMAN and XIAO WANG | |
| 6.1. Introduction | 137 |
| 6.2. Pulsed Lasers | 138 |
| 6.3. Buyer's Guide | 150 |
| 6.4. Builder's Guide | 153 |
| 6.5. Summary | 169 |
| References | 169 |
| | |
| 7. Techniques for Modelocking Fiber Lasers | |
| by IRL N. DULING III | |
| 7.1. Introduction | 171 |
| 7.2. Cavity Building | 171 |
| 7.3. Modelocking | 175 |
| 7.4. Diagnostics | 187 |
| References | 190 |
| | |
| 8. Characterization of Short Laser Pulses | |
| by T. FEURER AND R. SAUERBREY | |
| 8.1. Introduction | 193 |
| 8.2. Spatial Characterization and Focusing | 196 |
| 8.3. Conventional Detectors for nsec to psec Pulses | 198 |
| 8.4. Streak Camera | 199 |
| 8.5. Autocorrelation and Cross-Correlation Techniques | 203 |
| 8.6. Special Techniques for the VUV and X-Ray Regions | 223 |
| References | 227 |

| | |
|---|-----|
| 9. Nonlinear Optical Frequency Conversion Techniques by U. SIMON and F. K. TITTEL | |
| 9.1. Introduction | 231 |
| 9.2. Second-Harmonic Generation | 233 |
| 9.3. Sum- and Difference-Frequency Generation. | 247 |
| 9.4. Third-Harmonic Generation and Four-Wave Mixing | 252 |
| 9.5. Optical Parametric Amplifiers (OPAs) and Oscillators (OPOs). | 255 |
| 9.6. Raman Shifters. | 266 |
| 9.7. Up-Conversion Lasers | 268 |
| References | 270 |
| | |
| 10. Optical Wavelength Standards by JÜRGEN HELMCKE | |
| 10.1. Introduction | 279 |
| 10.2. Basic Scheme of an Optical Wavelength Standard | 280 |
| 10.3. Iodine-Stabilized Lasers | 288 |
| 10.4. Wavelength Standards Utilizing Narrow Resonances of Laser-Cooled Absorbers | 294 |
| 10.5. Optical Frequency Measurement | 303 |
| 10.6. Conclusions | 307 |
| References | 307 |
| | |
| 11. Precise Wavelength Measurement of Tunable Lasers by MIAO ZHU AND JOHN L. HALL | |
| 11.1. Introduction | 311 |
| 11.2. The λ -Meter (Scanning Michelson Interferometer) | 312 |

| | |
|--|-----|
| 11.3. The Fizeau Wavemeter. | 331 |
| 11.4. Plane-Parallel Interferometers with CCD Readout. | 337 |
| 11.5. Summary and Outlook. | 338 |
| References | 339 |
| | |
| 12. Optical Materials and Devices by SAMI T. HENDOW | |
| 12.1. Introduction | 343 |
| 12.2. Optical Materials and Performance | 343 |
| 12.3. Optical Components. | 347 |
| 12.4. Polarization-Controlling Components | 353 |
| 12.5. Passive Optical Devices | 358 |
| References | 366 |
| | |
| 13. Guided-Wave and Integrated Optics by LEON McCAUGHAN | |
| 13.1. Introduction | 369 |
| 13.2. Optical Waveguides | 369 |
| 13.3. Fibers | 371 |
| 13.4. Guided-Wave Integrated Optics. | 381 |
| 13.5. Concluding Points | 392 |
| References | 393 |
| | |
| INDEX | 397 |
