Image States on Single-Crystal Metal Surfaces

RICHARD M. OSGOOD, JR., AND XIAOYI WANG

I. Introduction	2
II. Our Theoretical Understanding of Image States	6
III. Experimental Probes of Image-State Properties	24
IV. Experimental Measurements of the Stationary Properties of Image States on Bare, Single-Crystal Surfaces	35
V. Measurements of the Dynamic Properties of Image States	43
VI. Image States on Ferromagnetic Surfaces	46
VII. Image States and Surface Conditions	50
VIII. Lateral Quantum Confinement of Surface Electrons	63
IX. Summary	78

Good Thermoelectrics

G. D. MAHAN

I. Introduction	82
II. Devices	85
III. Bulk Semiconductors	91
IV. Review of Materials	111
V. Narrow-Gap Semiconductors	119
VI. Metals	130
VII. Summary	152

Theory of Electromigration

RICHARD S. SORBELLO

I. Introduction	159
II. Driving Force for Electromigration	163
III. Theoretical Calculations	181
IV. Beyond the Adiabatic Picture	224
V. Conclusions	228

Fracture Toughness of Materials: From Atomistics to Continuum Theory

ANDERS E. CARLSSON AND ROBB M. THOMSON

I. Introduction	233
II. Levels of Description Materials	237
III. Calculations of Fracture Toughness	250
IV. Connections Between Different Approaches	264
V. Key Calculations	278

Displacement Damage in Irradiated Metals and Semiconductors

R. S. AVERBACK AND T. DIAZ DE LA RUBIA

I. Introduction	282
II. Binary Collision and Thermal Spike Models	293
III. Defect Production near Threshold Energies	306
IV. Dynamics of Collision Cascades: Beyond BCA Models	325
V. Ion-Beam Mixing	335
VI. Defect Production in Cascades	352
VII. Primary State of Damage	361
VIII. Effects of Surfaces and Applied Stresses on Cascades	377
IX. Freely Migrating Defects	393
X. Conclusions	401
AUTHOR INDEX	403
SUBJECT INDEX	415
