

# Contents

## Introduction

*Leo J. M. J. Blomen and Michael N. Mugerwa*

I.1.	Perspective . . . . .	1
I.2.	Feedstocks for Energy and the Chemical Industry . . . . .	1
I.3.	Emissions . . . . .	4
I.4.	World Energy . . . . .	6
I.5.	Role of Energy Technologies . . . . .	10
I.6.	Capacity Additions for Power Plants . . . . .	13
I.7.	Contents of This Book . . . . .	16

## 1. History

*J. A. A. Ketelaar*

1.1.	Introduction . . . . .	19
1.2.	The First 100 Years, 1839–1939 . . . . .	19
1.2.1.	W. R. Grove (1811–1896) Invents the Fuel Cell . . . . .	19
1.2.2.	Successors to Grove . . . . .	21
1.2.3.	The Direct Coal Fuel Cell . . . . .	21
1.2.4.	F. Haber and His Pupils . . . . .	22
1.2.5.	W. Nernst . . . . .	23
1.2.6.	E. Baur and His School . . . . .	24
1.3.	The Next 50 Years 1939–1989 . . . . .	26
1.3.1.	F. T. Bacon (1904–1992) . . . . .	27
1.3.2.	O. K. Davtyan (USSR, Moscow, Tiflis, Odessa) . . . . .	28
1.3.3.	E. W. Justi (Technical University at Braunschweig, Germany) . . . . .	28
1.3.4.	Molten Carbonate Fuel Cell . . . . .	29
1.3.5.	Solid Oxide Fuel Cell . . . . .	31
1.3.6.	Phosphoric Acid Fuel Cell . . . . .	31
1.3.7.	Solid Polymer Fuel Cell . . . . .	32
1.3.8.	Alkaline and Direct Methanol Fuel Cells . . . . .	32
1.3.9.	Methanol Fuel Cell . . . . .	33

## 2. Overview of Fuel Cell Technology

*S. Srinivasan, B. B. Davé, K. A. Murugesamoorthi, A. Parthasarathy, and A. J. Appleby*

2.1.	Fundamental Aspects of Fuel Cell Systems . . . . .	37
2.1.1.	Thermodynamic Aspects . . . . .	37
2.1.2.	Electrode Kinetics Aspects . . . . .	38
2.1.3.	Classification of Fuel Cells and Scope of This Chapter . . . . .	41
2.2.	Alkaline Fuel Cells . . . . .	42
2.2.1.	Background and Principles of Operation . . . . .	42
2.2.2.	Operating Conditions . . . . .	43
2.2.3.	Typical Cell Materials and Configurations . . . . .	43
2.2.4.	Methods for Cooling Electrochemical Cell Stacks . . . . .	47
2.2.5.	Acceptable Contaminant Levels . . . . .	47
2.2.6.	Applications and Economics . . . . .	47
2.3.	Phosphoric and Other Acid Electrolyte Fuel Cells . . . . .	48
2.3.1.	Background and Principles of Operation . . . . .	48
2.3.2.	Operating Conditions . . . . .	49
2.3.3.	Typical Cell Materials and Configurations . . . . .	50
2.3.4.	Methods for Cooling Electrochemical Cell Stacks . . . . .	51
2.3.5.	Acceptable Contaminant Levels . . . . .	52
2.3.6.	Applications and Economics . . . . .	52
2.3.7.	Research on Other Acid Electrolytes for Fuel Cells . . . . .	52
2.4.	Molten Carbonate Fuel Cells . . . . .	53
2.4.1.	Principles of Operation . . . . .	53
2.4.2.	Operating Conditions . . . . .	54
2.4.3.	Typical Cell Materials and Configurations . . . . .	54
2.4.4.	Methods for Cooling Electrochemical Cell Stacks . . . . .	56
2.4.5.	Acceptable Contaminant Levels . . . . .	57
2.4.6.	Applications and Economics . . . . .	57
2.5.	Solid Oxide Fuel Cells . . . . .	58
2.5.1.	Principles of Operation . . . . .	58
2.5.2.	Typical Cell Materials, Configurations, and Operational Conditions . . . . .	59
2.5.3.	Methods for Cooling Electrochemical Cell Stacks . . . . .	63
2.5.4.	Acceptable Contaminant Levels . . . . .	63
2.5.5.	Applications and Economics . . . . .	63
2.6.	Solid Polymer Electrolyte Fuel Cells . . . . .	63
2.6.1.	Principles of Operation . . . . .	63
2.6.2.	Operating Conditions . . . . .	64
2.6.3.	Typical Cell Materials . . . . .	65
2.6.4.	Acceptable Contamination Levels . . . . .	67
2.6.5.	Methods for Cooling Electrochemical Cell Stacks . . . . .	68
2.6.6.	Application and Economics . . . . .	68
2.7.	Direct Methanol Fuel Cells . . . . .	68
2.8.	Relative Advantages and Disadvantages of Different Types of Fuel Cells . . . . .	69

### 3. Electrochemistry of Fuel Cells

*Embrecht Barendrecht*

3.1. Introduction . . . . .	73
3.2. General . . . . .	73
3.2.1. General Characteristics of the Principal Types of Fuel Cells . . . . .	73
3.2.2. The Thermodynamics and Electrode Kinetics of Fuel Cells . . . . .	74
3.2.3. Elements of a Fuel Cell . . . . .	84
3.3. The Alkaline Fuel Cell . . . . .	88
3.3.1. General Characteristics . . . . .	88
3.3.2. The Electrode Reactions . . . . .	90
3.3.3. Alternative Types . . . . .	93
3.3.4. Future Research and Development . . . . .	93
3.4. The Phosphoric Acid Fuel Cell . . . . .	93
3.4.1. General Characteristics . . . . .	93
3.4.2. The Electrode Reactions . . . . .	94
3.4.3. Alternative Types of Acid Fuel Cells . . . . .	97
3.4.4. Future Research and Development . . . . .	97
3.5. The Molten Carbonate Fuel Cell . . . . .	97
3.5.1. General Characteristics . . . . .	97
3.5.2. The Electrode Reactions; Electrolyte . . . . .	99
3.5.3. The Internal Reforming MCFC (IR MCFC) . . . . .	104
3.5.4. Future Research and Development . . . . .	105
3.6. The Solid Oxide Fuel Cell . . . . .	105
3.6.1. General Characteristics . . . . .	105
3.6.2. The Electrode Reactions; Electrolyte . . . . .	106
3.6.3. Future Research and Development . . . . .	109
3.7. Other Types of Fuel Cells . . . . .	110
3.7.1. Introduction . . . . .	110
3.7.2. The Solid Polymer Electrolyte Fuel Cell . . . . .	110
3.7.3. The Redox Fuel Cell . . . . .	112
3.7.4. The Fuel Cell as a Chemical Reactor . . . . .	113
3.8. Problem Areas in Research and Development . . . . .	114
3.8.1. New Materials . . . . .	114
3.8.2. Diagnostic Tools . . . . .	115

### 4. Fuel Processing

*Pietrogrande and Maurizio Bezzeccheri*

4.1. Introduction . . . . .	121
4.2. Raw Material Options for Hydrogen . . . . .	122
4.3. Industrial Hydrogen Production . . . . .	125
4.4. Steam Reforming of Hydrocarbons . . . . .	129
4.5. Partial Oxidation of Heavy Hydrocarbons . . . . .	144
4.6. Coal Gasification . . . . .	145
4.7. Methanol Steam Reforming . . . . .	150
4.8. Materials for Hydrogen Services . . . . .	151

## 5. Characteristics of Fuel Cell Systems

*A. J. Appleby*

5.1.	Background . . . . .	157
5.2.	Efficiency . . . . .	157
5.2.1.	General Thermodynamics . . . . .	157
5.2.2.	Fuel Utilization . . . . .	158
5.2.3.	Cell Efficiency . . . . .	160
5.2.4.	Carnot Machines and Fuel Cells . . . . .	163
5.2.5.	Overall System Efficiencies . . . . .	172
5.2.6.	Efficiencies of Utility Fuel Cell Systems . . . . .	172
5.3.	Part-Load Characteristics . . . . .	179
5.4.	Response Time, Spinning Reserve Capability . . . . .	180
5.5.	Emissions . . . . .	181
5.5.1.	Chemical Emissions . . . . .	181
5.5.2.	Acoustic Emissions . . . . .	183
5.5.3.	Thermal Emissions . . . . .	183
5.5.4.	Esthetics . . . . .	184
5.5.5.	Conclusion . . . . .	184
5.6.	Modularity . . . . .	184
5.7.	Siting Flexibility . . . . .	187
5.8.	Lifetime . . . . .	188
5.9.	Waste Disposal of Materials on Dismantling of Plant . . . . .	189
5.10.	On-line Availability . . . . .	189
5.11.	Reliability . . . . .	190
5.12.	Start-up and Shutdown . . . . .	191
5.13.	Control . . . . .	191
5.14.	Power Conditioning . . . . .	191
5.15.	Safety . . . . .	192
5.16.	Materials . . . . .	192
5.17.	Multifuel Capability . . . . .	192
5.17.1.	General . . . . .	192
5.17.2.	Fuel Cells and Pure Hydrogen Fuel . . . . .	194
5.18.	Fuel Cell Power Plant Economics . . . . .	196
5.19.	Conclusions . . . . .	197

## 6. System Design and Optimization

*Michael N. Mugerwa and Leo J. M. J. Blomen*

6.1.	Introduction . . . . .	201
6.2.	The Importance of Fuel Cell System Integration . . . . .	203
6.3.	The Design of a Fuel Cell System . . . . .	206
6.3.1.	Types of Fuel Cells . . . . .	206
6.3.2.	Phosphoric Acid Fuel Cell System Design . . . . .	206
6.3.3.	Molten Carbonate Fuel Cell System Design . . . . .	211

6.3.4. Trends in Fuel Cell System Design . . . . .	214
6.3.5. Other Fuel Cell Systems . . . . .	215
6.4. The Optimization of Fuel Cell Systems . . . . .	216
6.4.1. Process Parameters . . . . .	216
6.4.2. Fuel Cell Cooling . . . . .	225
6.4.3. Reformer Geometry . . . . .	226
6.4.4. Heat and Power Integration . . . . .	228
6.5. Process Options . . . . .	232
6.5.1. Oxygen Enrichment . . . . .	232
6.5.2. Cathode Air as Combustion Air . . . . .	233
6.5.3. Carbon Dioxide Removal . . . . .	234
6.6. Feedstocks . . . . .	235
6.7. Effect of Scale . . . . .	237
6.8. Load Response . . . . .	238
6.9. Cogeneration . . . . .	239
6.10. Reliability . . . . .	240
6.11. Emissions . . . . .	240
6.12. Conclusions . . . . .	242

## 7. Research, Development, and Demonstration of Alkaline Fuel Cell Systems

*Hugo Van den Broeck*

7.1. Introduction . . . . .	245
7.2. Manufacturing Techniques and Materials . . . . .	246
7.2.1. Electrodes and Catalysts . . . . .	246
7.2.2. Electrolytes . . . . .	247
7.2.3. Alkaline Fuel Cell Stacks . . . . .	248
7.2.4. Alkaline Fuel Cell Systems . . . . .	249
7.3. Electrochemical Performance . . . . .	250
7.3.1. General Considerations . . . . .	250
7.3.2. Influence of Oxidant . . . . .	250
7.3.3. Influence of Pressure . . . . .	250
7.3.4. Influence of Temperature . . . . .	251
7.3.5. Some Examples of Performance Data . . . . .	251
7.3.6. Endurance . . . . .	252
7.4. Fuel Cell Operation . . . . .	252
7.4.1. Introduction . . . . .	252
7.4.2. Gas Feeding . . . . .	252
7.4.3. Current Collection . . . . .	253
7.4.4. Water Removal . . . . .	253
7.4.5. Waste Heat Cooling . . . . .	253
7.4.6. Fuel Cell System Controller . . . . .	254
7.5. Activities and Development Status in the World . . . . .	254
7.5.1. Introductory Remarks . . . . .	254
7.5.2. Alkaline Fuel Cells in Europe . . . . .	254
7.5.3. Alkaline Fuel Cells in the United States . . . . .	259
7.5.4. Alkaline Fuel Cells in Japan . . . . .	260

7.6.	Application Areas for Alkaline Fuel Cells . . . . .	261
7.6.1.	Introduction . . . . .	261
7.6.2.	Space Applications of Alkaline Fuel Cells . . . . .	261
7.6.3.	Defense Applications of Alkaline Fuel Cells . . . . .	262
7.6.4.	Electric Vehicle Applications of Alkaline Fuel Cells . . . . .	263
7.6.5.	Stationary Applications of Alkaline Fuel Cells . . . . .	264
7.7.	Demonstration and Commercialization . . . . .	265
7.7.1.	Introduction . . . . .	265
7.7.2.	Specific Markets . . . . .	266
7.7.3.	Vehicle Markets . . . . .	266
7.7.4.	Stationary Markets . . . . .	267
7.7.5.	Competition with Other Fuel Cell Types . . . . .	267
7.7.6.	Further Improvements Needed . . . . .	268

## **8. Research, Development, and Demonstration of Phosphoric Acid Fuel Cell Systems**

*Rioji Anahara*

8.1.	Introduction . . . . .	271
8.2.	Historical Review of PAFC Developments . . . . .	273
8.2.1.	Review of PAFC Technology Developments . . . . .	273
8.2.2.	PAFC Demonstration Programs in the United States . . . . .	274
8.2.3.	PAFC Demonstration Programs in Japan . . . . .	280
8.2.4.	PAFC Demonstration Programs in Europe . . . . .	283
8.3.	PAFC Cell Performance and Stack Components . . . . .	284
8.3.1.	Key Features of PAFC Stacks . . . . .	284
8.3.2.	Factors Affecting Stack Performance . . . . .	287
8.3.3.	Cooling Method . . . . .	293
8.3.4.	Structure of Cell Stacks . . . . .	298
8.3.5.	Cell Life . . . . .	310
8.3.6.	Cell Stack Design Configuration . . . . .	313
8.4.	Key Components of PAFC Systems . . . . .	316
8.4.1.	Fuel Processing System (Reforming System) . . . . .	316
8.4.2.	Inverter . . . . .	318
8.4.3.	Control System . . . . .	322
8.4.4.	Overall Plant Efficiency and Utilization Factor . . . . .	325
8.5.	Application and Operation of PAFC Plants . . . . .	326
8.5.1.	Available Fuels (Comparison of Natural Gas, LPG, and Methanol) . . . . .	326
8.5.2.	Grid-Connected and Grid-Independent Configuration . . . . .	328
8.5.3.	Application of PAFC Plants . . . . .	329
8.5.4.	Operation of PAFC Plants . . . . .	332
8.5.5.	Applicable Heat Source in On-site Plants . . . . .	336
8.6.	PAFC System Development in the World . . . . .	337
8.6.1.	General . . . . .	337

8.6.2. Development Organizations in the United States . . . . .	338
8.6.3. Development Organizations in Japan . . . . .	339
8.6.4. Development Organizations in Europe . . . . .	341
8.7. Future Improvements and Commercialization Forecast . . . . .	341

## 9. Research, Development, and Demonstration of Molten Carbonate Fuel Cell Systems

*J. R. Selman*

9.1. Introduction . . . . .	345
9.2. Concept and Components . . . . .	346
9.2.1. Cell Chemistry . . . . .	346
9.2.2. Electrodes and Electrolyte . . . . .	348
9.2.3. Cell Structure . . . . .	349
9.2.4. Electrolyte Distribution . . . . .	352
9.2.5. Internal Reforming . . . . .	354
9.2.6. Stack Structure . . . . .	357
9.3. Cell Design and Performance . . . . .	359
9.3.1. Gas Utilization . . . . .	359
9.3.2. Cell Voltage . . . . .	361
9.3.3. Efficiency . . . . .	366
9.3.4. Electrode-Electrolyte Structure and Fabrication . . . . .	368
9.3.5. Electrolyte Management . . . . .	370
9.3.6. Electrode Microstructure and Polarization . . . . .	372
9.3.7. Current and Temperature Distribution . . . . .	376
9.3.8. State-of-the-Art Performance . . . . .	379
9.3.9. Corrosion and Cathode Dissolution . . . . .	383
9.3.10. Contaminant Effects . . . . .	388
9.3.11. Electrolyte Optimization . . . . .	391
9.3.12. Long-Term Performance . . . . .	394
9.4. Stack Design and Development . . . . .	398
9.4.1. Stack Configuration and Sealing . . . . .	398
9.4.2. Separator Plate . . . . .	404
9.4.3. Manufacturing Issues . . . . .	409
9.4.4. Thermal Management and Internal Reforming in MCFC Stacks . . . . .	415
9.4.5. Gas Recycling and MCFC System Design . . . . .	428
9.4.6. Electrolyte Migration and Loss . . . . .	436
9.4.7. Stack Performance Data . . . . .	442
9.5. Status . . . . .	453
9.5.1. Research Goals . . . . .	453
9.5.2. R&D Programs and Demonstration Projects . . . . .	454
9.5.3. Commercialization . . . . .	456
9.6. Concluding Remarks . . . . .	456

## **10. Research, Development, and Demonstration of Solid Oxide Fuel Cell Systems**

*K. A. Murugesamoorthi, S. Srinivasan, and A. J. Appleby*

10.1. Introduction . . . . .	465
10.1.1. Principles: Technological Merits . . . . .	465
10.1.2. History . . . . .	466
10.1.3. Recent Advances in SOFC Technology . . . . .	467
10.2. Cathode Development . . . . .	467
10.2.1. Materials Selection Criteria . . . . .	467
10.2.2. Metal Cathodes . . . . .	468
10.2.3. Oxide Current Collector Cathodes . . . . .	468
10.2.4. Electronically Conducting Oxide Cathodes . . . . .	469
10.2.5. Oxides with Mixed Conduction . . . . .	471
10.3. Anode Development . . . . .	472
10.4. Electrolyte Development . . . . .	473
10.5. Interconnect Development . . . . .	474
10.6. Design and Development of Multicell Stacks . . . . .	475
10.6.1. SOFC Design . . . . .	475
10.6.2. Tubular Design . . . . .	476
10.6.3. Monolithic Design . . . . .	481
10.6.4. Planar Design . . . . .	483
10.7. System Development . . . . .	485
10.7.1. Cell Cooling . . . . .	485
10.7.2. Contaminant Levels . . . . .	485
10.7.3. Research and Development Activities in the United States, Japan, and Europe . . . . .	486
10.8. Applications and Economics . . . . .	486
10.8.1. Potential Applications . . . . .	486
10.8.2. Research and Development Funding Structures . . . . .	487
10.8.3. Estimates of Research, Development, and Demonstration Costs . . . . .	488
10.8.4. Projected Capital Cost and Cost of Electricity . . . . .	489

## **11. Research, Development, and Demonstration of Solid Polymer Fuel Cell Systems**

*David S. Watkins*

11.1. Introduction . . . . .	493
11.2. History . . . . .	495
11.2.1. 1959–1982 . . . . .	495
11.2.2. 1982–Present . . . . .	498
11.3. Recent Research . . . . .	500
11.3.1. Tolerance to Reformed Fuels . . . . .	501
11.3.2. Membranes . . . . .	503
11.3.3. Catalyst Reduction . . . . .	506

11.4. Development and Demonstration . . . . .	508
11.4.1. Systems under Development . . . . .	509
11.4.2. Current Applications . . . . .	513

## 12. Fuel Cell System Economics

*Michael N. Mugerwa and Leo J. M. J. Blomen*

12.1. Introduction . . . . .	531
12.2. Installed Cost Estimating and Cost Reduction . . . . .	532
12.3. Costs of Power Production . . . . .	536
12.4. Sensitivity Analyses and Comparisons with Conventional Power Generation Technologies . . . . .	544
12.5. Cogeneration . . . . .	551
12.5.1. Introduction . . . . .	551
12.5.2. Basis of Calculation . . . . .	553
12.5.3. Effect of Cogeneration on the Cost of Electricity of Fuel Cell and Conventional Technologies . . . . .	554
12.5.4. Discussion . . . . .	557
12.6. Composite Systems . . . . .	558
12.7. Expected Technology Improvements . . . . .	558
12.8. Conclusions . . . . .	561

## 13. Market

*Diane Traub Hooie*

13.1. Introduction . . . . .	565
13.2. Market Segments . . . . .	565
13.2.1. Generation Industry . . . . .	567
13.2.2. On-site Cogeneration and Generation . . . . .	569
13.2.3. Portable and Mobile . . . . .	570
13.2.4. Vehicular . . . . .	570
13.3. Fuel Cell Applications . . . . .	571
13.4. Market Opportunity . . . . .	573
13.4.1. Market Model Algorithms . . . . .	573
13.4.2. Equipment and Market Readiness . . . . .	575
13.4.3. Market–Price Relationship . . . . .	576
13.4.4. Worldwide Market Potential . . . . .	576
13.4.5. Market Penetration . . . . .	578
13.5. Fuel Cell Readiness . . . . .	579
13.6. Conclusions . . . . .	579

<b>Epilogue . . . . .</b>	<b>583</b>
---------------------------	------------

*Leo J. M. J. Blomen and Michael N. Mugerwa*

<b>Index . . . . .</b>	<b>589</b>
------------------------	------------
