Contents

1. Introduction 1

	1.3.	Current Projects and Applications For Fuel Cells 2
		1.3.1. Fuel Cell Technology Programs in the USA and Canada 2
		1.3.2. Fuel Cell Activities in Japan 4
		1.3.3. Fuel Cell Programs in Europe 4
	1.4.	Fuels for Fuel Cells: More Reformer Development 5
		Fuel Cell Operated Electric Vehicles 6
		Outlook for Fuel Cell Technology 7
2.	Gen	eral Aspects of Fuel Cell Systems 9
	2.1.	Introduction "Fuel Cells as Energy Converter" 9
	2.2.	Classification of Fuel Cell Systems 10
	2.3.	Characteristics of Fuel Cell Systems 11
		2.3.1. High Efficiency and Reliability 11
		2.3.2. Unparalleled Environmental Performance 12
		2.3.3. Unique Operating Characteristics 13
		2.3.4. Planning Flexibility 14
		2.3.5. Future Potential 15
	2.4.	Economic Benefits of Fuel Cell Systems 15
	2.5.	The Potential Fuel Cell Market, Production Volume and Estimated Costs 18
3.	Bas	ic Principles 23
	3.1.	Thermodynamics of Chemical Reactions 23
		3.1.1. Free-Energy Change of a Chemical Reaction 23
		3.1.2. Standard Free-Energy Change of a Chemical Reaction 24
		3.1.3. Relation between Free-Energy Change in a Cell Reaction and Cell Potential 24
		3.1.4. Temperature and Pressure Coefficients of Thermodynamic Reversible

Cell Potentials 26

1.1. Fuel Cell Technology: a Dream, Challenge or a Necessity?1.2. The Historic Trends in Fuel Cell System Developments1

4.

3.2.	Some Electrode Kinetic Aspects of Electrochemical Energy Conversion 27
	3.2.1. Electrode Polarization (Overvoltage) – Nomenclature 27
	3.2.2. Types of Overvoltage 27
	3.2.3. Electrode Characteristics 30
3.3.	The Electrode Mechanism of Fuel Cells 32
	3.3.1. Anode Process 33
	3.3.2. Cathode Process 36
	Theory of the Gas Diffusion Electrode 38
3.5.	Electrocatalysts 40
3.6.	Fuel Cell Efficiency 42
	3.6.1. General Theoretical Efficiency of the Conversion of Heat Liberated from a
	Chemical Reaction into other Forms of Energy (Mechanical, Electrical) 42
	3.6.2. Thermodynamic Derivation of the Theoretical Efficiency
	of a Heat Engine 44
	3.6.3. Thermodynamic Efficiency 45
	3.6.4. Electrochemical Efficiency 47
	3.6.5. Practical Efficiency 47
	3.6.6. Faradaic Efficiency 48
	3.6.7. Total Efficiency 48
3.7.	Monopolar and Bipolar Electrode Constructions 49

rue	l Cell Systems 51
	Introduction 51
4.2.	Alkaline Fuell Cells (AFC) 54
	4.2.1. General Principle 54
	4.2.2. Early Developments of Alkaline Fuel Cell Systems 58
	4.2.3. Further Developments 69
4.3.	Polymer-Electrolyte Fuel Cells (PEFCs) 72
	4.3.1. Introduction 72
	4.3.2. History of Development 73
	4.3.3. Operating Principles of PEFCs 75
	4.3.3.1. General 75
	4.3.3.2. Electrodes 76
	4.3.3.3. Electrolytes-Membranes 78
	4.3.3.4. Heat and Water Management 84
	4.3.4. Performance of Polymer-Electrolyte Fuel Cells (PEFCs) 86
	4.3.4.1. Influence of Temperature 87
	4.3.4.2. Influence of Cathodic Reactant Composition and Pressure 87
	4.3.4.3. Influence of CO in the Fuel Gas 89
	4.3.5. Solid-Polymer Fuel Cell Stacks 90
4 4	4.3.6. Regenerative Fuel Cell Systems 92
4.4.	Phosphoric Acid Fuel Cells (PAFC) 93
	4.4.1. Introduction 934.4.2. Reaction Principle of the Phosphoric Acid Fuel Cell 94
	4.4.2. Reaction Principle of the Phosphoric Acid Fuel Cell 94

		4.4.3. Electrodes and Manufacturing 96
		4.4.4. The Electrode Materials 100
		4.4.5. Carbon Corrosion and Cathode-Catalyst Stability in the PAFC 105
		4.4.6. Performance 106
		4.4.7. Stacks and Systems 108
	4.5.	Molten Carbonate Fuel Cells (MCFC) 111
		4.5.1. Introduction 111
		4.5.2. Operating Principle 114
		4.5.3. Cell Components 117
		4.5.3.1. Matrix Support Material 117
		4.5.3.2. Cathode 118
		4.5.3.3. Anode 121
		4.5.4. Internal Reforming Concept 122
		4.5.5. Performance of MCFCs 125
		4.5.6. MCFC R & D Programs 129
	4.6.	Solid Oxide Fuel Cells (SOFC) 133
		4.6.1. Introduction 133
		4.6.2. Reactions, Electrolyte and Cell Materials of SOFCs 134
		4.6.3. Variations of SOFC Developments 138
		4.6.4. Performance of SOFCs 140
		4.6.5. SOFC Programs 141
		4.6.6. Processing Techniques of SOFC Components 143
	4.7.	Direct Methanol Fuel Cells (DMFC) 151
	4.8.	Hybrid Cells 157
		4.8.1. Metal-Air Batteries 158
		4.8.2. Zinc-Air Batteries 159
		4.8.3. Iron-Air Batteries 162
		4.8.4. Metaloxide-Hydrogen Batteries 165
		4.8.5. Metaloxide-Metalhydride Batteries 166
5.	Fue	Cells and Their Applications in Dispersed Energy Systems (Utility Use) 181
	<i>5</i> 1	Utility Interest in Fuel Cells 181
		Utility Interest in Fuel Cells 181 Integrated Resource Planning (IRP) 182
	3.2.	5.2.1. Least Cost Planning (LCP) 183
		5.2.2. Demand-Side Management (DSM) 183
	5 2	Utility Phosphoric Acid Fuel Cell Plants 185
	5.5.	5.3.1. History 185
