

TABLE OF CONTENTS

Preface	v
Photo	vii
Committees	viii
Opening address S. Nakajima	1
Welcome address S. Asai	3
QUANTUM OPTICS	
Dressed fermion vs. dressed boson: Semiconductor cavity QED in high-Q regimes Y. Yamamoto, J.M. Jacobson, S. Pau, H. Cao and G. Björk	5
Two-photon ‘ghost’ image and interference-diffraction Y.H. Shih, A.V. Sergienko, T.B. Pittman, D.V. Strekalov and D.N. Klyshko	11
Femtosecond coherent control and decoherence of excitons A.P. Heberle, J.J. Baumberg, K. Köhler and K. Ploog	19
Coherence in two-particle interferometry N. Imoto and B. Huttner	23
Quantum theory of an exciton boson A. Imamoglu and R.J. Ram	27
The unknown wave function of a single system cannot be inferred using a series of quantum measurements O. Alter and Y. Yamamoto	31
Nonlinear optical response of cold atoms T. Hiroshima and Y. Yamamoto	35
Decoherence in localized photon emission H.F. Hofmann	39

Phase operator for the photon, an index theorem, and quantum anomaly K. Fujikawa	43
PRECISE MEASUREMENTS	
Applications of laser cooling and trapping to precision measurements and polymer physics B. Young, M. Weitz, J. Hensley, T. Perkins, D. Smith, S. Quake and S. Chu	47
Cooling and detection of molecules using laser-cooled atoms T. Baba and I. Waki	53
The quantum mechanics of trapped ions R.J. Glauber	57
Dynamic observation of vortices interacting with pinning centers through a coherent electron beam technique A. Tonomura, K. Harada, H. Kasai and T. Matsuda	63
A biprism interferometer for ions and some of its future applications F. Hasselbach and U. Maier	69
Fundamental physics with very low energy neutrons A. Msaïke	73
Novel interferometer for cold neutrons using multilayer mirrors H. Funahashi, T. Ebisawa, Y. Otake and S. Tasaki	81
Quantum nondemolition detection via successive back-action-evasion measurements: A step towards the experimental demonstration of quantum state reduction S.R. Friberg, S. Machida, N. Imoto, K. Watanabe and T. Mukai	85
An experimental scheme to monitor and control a macroscopic quantum state coherence W.-T. Ni and K. Kuroda	89

MACROSCOPIC QUANTUM PHENOMENA

Quantum nucleation T. Satoh and S.N. Burmistrov	93
Theory of macroscopic quantum nucleation in quantum fluids Y. Kanno, T. Nakamura and S. Takagi	99
Dynamics of vortices G. Blatter	103
From flux pinning to DNA sequence alignment: Novel applications of localization in a random environment T. Hwa	109
Quantum effects to the frictional behaviors in solids H. Matsukawa	115
Quantum depinning of charge density wave H. Miyake and H. Matsukawa	121

SINGLE ELECTRONICS

Single electron charging effects in mesoscopic systems S. Kobayashi	125
Synchronous single-electron transfer at room temperature K. Yano, T. Ishii, T. Sano, T. Mine, F. Murai and K. Seki	131
Metal-insulator transition induced by the field effect of control gates K. Katayama, D. Hisamoto, Y. Nakamura and M. Aoki	135
Theory on the Coulomb blockade on ultrasmall Josephson double junctions with external circuits S. Iwabuchi	139

MESOSCOPIC SEMICONDUCTORS

Coherent phonon dephasing in semiconductor heterostructures D.A. Williams and J.J. Baumberg	143
--	-----

Coherent destruction of tunneling in resonant tunneling diodes driven by a strong electric laser field M. Wagner	147
Energy-recovery in field-coupled quantum dot resistors F. Yamaguchi, K. Kawamura and A. Hübler	151
Electron transport through double quantum dots T. Aono, K. Kawamura, F. Yamaguchi and T. Mizuno	155
Numerical studies on current-voltage characteristics in an array of disordered tunnel junctions M. Eto, M. Katagi and K. Kawamura	159
Quantum properties of electron and hole systems in modulation- doped corrugated heterojunctions K. Vacek and T. Usagawa	163
Quantum coherence of edge states in the quantum Hall effect -Topological invariants and edge state mixing- Y. Hatsugai	167
SUPERCONDUCTORS AND SQUID	
Direct demonstration of Heisenberg's uncertainty principle in a mesoscopic superconductor M. Matters, W.J. Elion, U. Geigenmüller and J.E. Mooij	171
Macroscopic quantum tunneling in a superconductor-normal metal-superconductor junction H. Takayanagi and H. Nakano	175
Photon assisted resonant tunneling between macroscopically distinct quantum states of a SQUID R. Rouse, S.-Y. Han and J.E. Lukens	179
Theory of tunneling effect of d-wave superconductors Y. Tanaka and S. Kashiwaya	183
Squeezed phonons in the Fröhlich model V.A. Ivanov, M.Ye. Zhuravlev, Y. Murayama and S. Nakajima	187

MESOSCOPIC NORMAL METALS

New measurements of the magnitude of the persistent current in normal metal systems P. Mohanty, E.M.Q. Jariwala, M.B. Ketchen and R.A. Webb	191
Electron systems at the borderline to magnetism G. Bergmann and H. Beckmann	197
Dephasing and population relaxation of hot-electrons at metal surfaces S. Ogawa and H. Petek	203
Localization of tunneling electron in a potential barrier with alternating height O.A. Tkachenko, V.A. Tkachenko, D.G. Baksheyev and H. Nejo	207
Inter-Landau level scattering in a self-consistent potential M. Stopa, C. Barnes, T. Iitaka, Y. Aoyagi and T. Sugano	211
Coupling between a metallic system and an Anderson insulator Y. Aoyagi, M. Stopa, H. Hofmann and T. Sugano	215
Kondo resonance in the cases of strong Coulomb screening V.V. Ponomarenko	219

MESOSCOPIC MAGNETS

Mesoscopic effects in magnetism: Single particle measurements B. Barbara, W. Wernsdorfer, L. Thomas, K. Hasselbach, A. Benoit and D. Mailly	223
Decoherence in macroscopic quantum phenomena in magnetic particles A. Garg	229
Metallic magnetism in mesoscopic scales H. Fukuyama and G. Tatara	235
Environment-induced tunneling of magnetic grains P.C.E. Stamp and G. Tatara	241

COMPLEX SYSTEMS

Universal correlations in random Hamiltonians A. Zee	245
Nature of coherence in globally coupled chaotic systems - An extended abstract K. Kaneko	251
A study of the atom and field dynamics in some Jaynes-Cummings models B. Nagel	257
Dynamic behavior of multi-photon Jaynes-Cummings model by Heisenberg picture H. Iwasawa and K. Matsuo	261
Quantum dynamics of the dissipative Jaynes-Cummings model toward thermal equilibrium: Analysis of the Q-function M. Murao and F. Shibata	265
Decoherence, dissipation and exponential decay S. Pascazio	269

QUANTUM INFORMATION AND GRAVITY

Quantum information and information loss in general relativity G. 't Hooft	273
Quantum landscape of a black hole A. Hosoya	281
Decoherence in chaos and quantum cosmology M. Sakagami, T. Okamura and H. Kubotani	287
Testing a dynamical model of wavefunction collapse in the cosmological scenario D. Home and A.S. Majumdar	291
Observables in perturbative quantum gravity N.D. Hari Dass	295

Decoherence and a simple quantum computer I.L. Chuang, R. Laflamme and Y. Yamamoto	299
Coherency in view of quantum estimation theory A. Fujiwara and H. Nagaoka	303
FUNDAMENTAL PROBLEMS	
Vector potential, gauge field and connection on a fiber bundle C.N. Yang	307
Varieties of quantum measurement W.G. Unruh	315
Real-time functional-integral approach to quantum-statistical decay M. Ueda	323
Von Neumann's chain, decoherence and limit of validity of the probability rule in quantum mechanics Z. Maki	327
Generalized Hepp-Coleman models for quantum decoherence as a quantum dynamic processes C.-P. Sun	331
Quantum decoherence in non-Hamiltonian total dynamics L.P. Godenko and V.S. Mashkevich	335
Quantum decoherence and an adiabatic process in macroscopic and mesoscopic systems S.V. Mashkevich and V.S. Mashkevich	339
The WKB-exactness in quantum mechanics of spin and other cases K. Funahashi, T. Kashiwa, K. Fujii and S. Sakoda	343
Testing the non-locality of quantum theory in two neutral Kaon systems F. Uchiyama and P.H. Eberhard	347
Constructive division and adiabatic division of quantum systems A. Tanaka	351

CLOSING ADDRESS

Closing address S. Nakajima	355
List of participants	357
Author index	369
