

CONTENTS

Preface	xi
I. Waves and Interactions in Dusty Plasmas	
Physics of Dusty Plasmas: An Historical Overview <i>D. A. Mendis</i>	3
Waves and Instabilities in Dusty Plasmas <i>M. Rosenberg</i>	20
Laboratory Studies of Ion and Dust Acoustic Instabilities in Dusty Plasmas <i>A. Barkan, N. D'Angelo and R. L. Merlino</i>	30
MHD Phenomena in Dusty Plasmas <i>N. N. Rao</i>	41
Low-Frequency Electrostatic Waves in Dusty Plasma with Continuous Size Spectrum of Grains <i>V. V. Yaroshenko</i>	51
Nonlinear Wave Phenomena in Dusty Plasmas <i>F. Verheest</i>	61
Charging of Dust Grains in a Laboratory Device <i>Y. Nakamura and T. Ito</i>	71
The Role of Grain Size in Secondary and Photoelectric Emission from Dust Grains <i>V. W. Chow</i>	77
Numerical Simulation of Phase Transitions in Dense Dusty Plasmas <i>S. Hamaguchi and R. T. Farouki</i>	87
II. Dust Crystals	
Plasma Crystals — A Review <i>G. E. Morfill, H. M. Thomas and M. Zuzic</i>	99

Structure and Motions of Strongly Coupled Dusty Plasmas: From Crystal to Chaos	143
<i>Lin I, W. T. Juan, C. H. Chiang, C. H. Chu and J. M. Liu</i>	
Structures of Coulomb Crystals from Growing Particles in a Plasma	153
<i>Y. Hayashi, K. Takahashi and K. Tachibana</i>	
Particle Growth Kinetics in RF Discharges	163
<i>Y. Watanabe, T. Fukuzawa, H. Kawasaki and M. Shiratani</i>	
Heating and Phase Transitions of Dust Plasma Crystals in a Flowing Plasma	173
<i>F. Melandsø</i>	
Condensation of One-Component Plasmas and Plasma Dust	188
<i>X. H. Zheng and J. C. Earnshaw</i>	
Crystallization of Dusty Plasma in a Glow Discharge Positive Column	195
<i>V. E. Fortov, A. P. Nefedov, V. M. Torchinsky, V. I. Molotkov, O. F. Petrov, A. A. Samarian, A. M. Lipaev and A. G. Khrapak</i>	
Coulomb Crystalization in Dusty Plasma: Electrode Geometry Versus Crystal Parameters	205
<i>M. A. Smith, H. U. Rahman and U. Mohideen</i>	
Dust Attraction and Formation of Free Boundary Dust Crystal	212
<i>V. N. Tsytovich, R. Bingham, Ya. K. Khodataev and V. P. Tarakanov</i>	
III. Dust Dynamics	
Potassium-Fullerene Plasma	229
<i>N. Sato</i>	
Measuring Heavy Charged Particles in the Laboratory and the Ionosphere	244
<i>S. Robertson, J. Fernsler, B. Walch and M. Horányi</i>	
Radio-Frequency Dusty Discharges for Ceramic Particles Synthesis and Nanomaterial Deposition	253
<i>L. Boufendi, F. Vivet, J. Hu and A. Bouchoule</i>	
Transport of Highly Charged Particles in Magnetized Plasmas	263
<i>G. Fussmann</i>	

Nonlinear Dynamics of a Dust Grain in a Plasma	273
<i>D. P. Resendes, J. T. Mendonça and Y. Elskens</i>	
Dust Dynamics in Electrostatic Sheath of a Dusty Plasma	283
<i>J. X. Ma, J. Liu and M. Y. Yu</i>	
Self-Similar Expansion of Dust Grains in a Plasma	293
<i>M. Y. Yu and H. Luo</i>	
IV. Dusty Plasmas in the Atmosphere and Space	
Dusty Plasmas in Environmental Research: Mitigation of Ozone Depletion Using Charged Liquid Droplets	305
<i>A. Wong, A. Liebscher, A. Khan and R. Wuerker</i>	
Dust in the Jovian Magnetosphere: From the Smallest Moons to the Heaviest Plasma Species	313
<i>M. Horányi</i>	
Dynamics of Dust in the Photoelectron Sheath Above Surfaces in Space	323
<i>T. Nitter, O. Havnes and F. Melandsø</i>	
Role of Charged Dust in Star Formation	336
<i>T. Nakano</i>	
Dust Near the Sun	346
<i>I. Mann and H. Kimura</i>	
Structure and Dynamics of a Radially Expanding Negatively Charged Ionospheric Dust Cloud	352
<i>W. A. Scales, G. Ganguli, P. A. Bernhardt and M. Lampe</i>	
V. Other Topics	
Dusty Plasmas: Industrial Applications	365
<i>G. M. W. Kroesen</i>	
Simulation and Theory of Dusty Plasma: Structure and Correlation Characteristics in External Fields	377
<i>H. Totsuji, T. Kishimoto and C. Totsuji</i>	
Particulate Behavior in Magnetized Plasma	387
<i>H. Fujiyama, S. C. Yang, Y. Maemura, K. Tazoe and Y. Matsuda</i>	

Computer Simulation Studies of the Dust Charging and Coagulation Processes in Dusty Plasmas <i>K. Watanabe, K. Nishimura and T. Sato</i>	394
Functional Differential Equation Approach to Strongly Correlated Systems <i>C. K. Kim, S. K. You and H. S. Noh</i>	403
VI. Poster Papers	
Experiment to Detect Charged Dust in the Earth's Mesosphere <i>L. J. Gelinás and K. A. Lynch</i>	415
Charging of Dust Grains by a Flowing Plasma <i>S. B. Banerjee, R. K. Varma and A. M. Punithavelu</i>	419
Behavior of Smoke Particles in Electrical Corona <i>D. K. Gupta, S. V. Kulkarni and P. I. John</i>	423
Experimental Investigations on the Melting Transition of the Plasma Crystal <i>A. Melzer, A. Homann, S. Peters and A. Piel</i>	429
Dynamical Aspects of the Plasma Crystal: Self-Excited Oscillations <i>A. Homann, A. Melzer, S. Peters, A. Piel, V. A. Schweigert and I. V. Schweigert</i>	433
Diagnostics of Strongly Coupled Dust Particles in a Thermal Plasma <i>O. S. Vaulina, A. P. Nefedov, O. F. Petrov, A. A. Samarian and A. V. Chernyshev</i>	437
Emission Properties and Structural Ordering of Strongly Coupled Dust Particles in a Thermal Plasma <i>V. E. Fortov, A. P. Nefedov, O. F. Petrov, A. A. Samarian and A. V. Chernyshev</i>	441
Experimental Observation of Coulomb-Ordered Structures in a Classical Dusty Thermal Plasma <i>V. E. Fortov, A. P. Nefedov, O. F. Petrov, A. A. Samarian, A. V. Chernyshev and A. M. Lipaev</i>	445
Superconductor Model of Attractive Forces in Dusty Plasmas <i>M. Nambu, S. V. Vladimirov and P. K. Shukla</i>	449

Brownian Motion of a Dusty Particle in a Plasma <i>J. T. Mendonça, A. M. Martins and P. K. Shukla</i>	453
Formation of Self-Organised Structures in a Plasma Material Synthesis Experiment <i>M. Venkataramanan and P. I. John</i>	457
Production of a C ₆₀ Plasma in a Q-Machine <i>D. Strele, C. Winkler, P. Krumm and R. Schrittwieser</i>	462
Macroscopic Condition to Self-Organize Various Fullerenes in an Arc Discharge <i>T. Mieno and D. Yamane</i>	466
Nanotube and Fullerene Formation in Cathodic Arc Deposition <i>M. Chhowalla, G. A. J. Amaratunga and R. Aharonov</i>	470
Characteristics of Fullerenes-Argon Mixture Plasma <i>N. Y. Sato, J. Tanaka, T. Yoshida, T. Ikehata, T. Watanabe and H. Mase</i>	477
A Possibility of the Formation of Silicon-Endohedral Fullerenes <i>R. Hatakeyama, T. Hirata, T. Hayashi, T. Mieno, N. Y. Sato, H. Mase, M. Niwano, N. Miyamoto and N. Sato</i>	481
Control of Dust Particles' Behavior by Using Ion Flow <i>S. Nunomuro, M. Nakamura, N. Ohno and S. Takamura</i>	485
Electron Oscillation in Bounded Non-neutral Plasmas with Dust Particles <i>Yu. I. Chutov, A. Yu. Kravchenko, P. P. J. M. Schram and R. D. Smirnov</i>	489
Relaxation Phenomena in Plasmas with Dust Particles <i>Yu. I. Chutov, A. Yu. Kravchenko and P. P. J. M. Schram</i>	493
Low-Frequency Waves in a Magnetized Dusty Plasma <i>N. F. Cramer and S. V. Vladimirov</i>	497
Radiation-Condensation Instability of a Dusty Plasma <i>P. K. Shukla and Yu. A. Shchekinov</i>	501
Two-Stream Instability in the F Ring of Saturn <i>G. Urquijo, K. Avinash and R. Singh</i>	505

Stimulated Scattering of Electromagnetic Waves in Dusty Plasmas <i>R. Guerra, J. T. Mendonça and P. K. Shukla</i>	510
Steady One-Dimensional Flows in Dusty Plasmas <i>Yu. A. Shchekinov</i>	514
Self-Similar Expansion of a Dusty Plasma <i>S. R. Pillay, S. V. Singh, R. Bharuthram and M. Y. Yu</i>	518
Solitary Waves in Dusty Plasmas with Nonthermal Ions <i>A. A. Mamun, R. A. Cairns, P. K. Shukla and R. Bingham</i>	522
Nonlinear Magnetosonic Modes in Multi-species Dusty Plasmas <i>P. Meuris</i>	529
Shock-like Structure in an Expanding Dusty Plasma <i>M. K. Srivastava</i>	533
Large Electric Fields in Acoustic Waves in the Presence of Charged Dust Grains <i>L. Iyer and V. H. Kulkarni</i>	536
Electronic Density Fluctuation of Low Frequency in a Dusty Plasma <i>L. Fang</i>	539
Multi-dimensional Soliton and Its Experimental Stability <i>I. Mori, T. Morimoto, R. Kawakami and K. Tominaga</i>	543
