

Contents of Part I (Poster Session 1)

Title	Presenting Author	Page
• Discharge optimisation and the control of MHD modes	Nave, M.F.F.	1
• Investigation of impurity equilibrium at JET	Romanelli, M.	5
• A comparison of soft X-ray activity in high performance JET discharges	Alper, B.	9
• An interpretive/predictive study of the JET Mark II divertors for ELMy H-modes in JET	Simonini, R.	13
• Power step-down experiments in the JET MkII divertor configuration	Marcus, F.B.	17
• MHD stability analysis of optimised shear discharges in JET	Huysmans, G.T.A.	21
• Modelling of Alfvén eigenmodes in high performance discharges on JET	Kerner, W.	25
• Identification of outer modes in JET	Hender, T.C.	29
• JET discharges with low geodesic curvature	Crisanti, F.	33
• Modelling neutral particle analyzer measurements of high energy fusion alpha-particle distributions in JET	McClements, K.G.	37
• The influence of fast ions on the MHD stability of negative shear profiles	McClements, K.G.	41
• Experiments on plasma fuelling and ELM control by pellet injection on JET	Kupschus, P.	45
• Steady state H-modes at high plasma density in JET	Saibene, G.	49
• Impurity transport studies for JET hot-ion H-mode and optimised shear discharges	Giannella, R.	53
• Studies of impurity production mechanisms in the JET divertors	McCracken, G.M.	57
• ELM dynamics and power deposition in the JET divertor	Gauthier, E.	61
• Overview of JET Mark IIA divertor performance in ITER-relevant modes of operation	Horton, L.D.	65
• Plasma-edge gradients and transport barrier widths in L- and H-mode JET plasmas	Breger, P.	69
• Confinement and performance of high current steady state ELMy H-modes with the JET MarkII divertor	Sartori, R.	73
• A comparison of ELMs characteristics between ICRH and NBI heated H-mode discharges in JET	Bhatnagar, V.P.	77
• Modelling of JET optimised shear discharges	Cottrell, G.A.	81

Title	Presenting Author	Page
• High fusion performance with combined heating in ELM-free H-mode in JET	Rimini, F.G.	85
• β scaling of confinement time	Christiansen, J.P.	89
• The role of edge parameters in the H-mode transition on JET	Righi, E.	93
• Operation at high performance in optimised shear plasmas in JET	Sips, A.C.C.	97
• Statistical analysis of type I ELMs at JET	Mohanti, R.	101
• Plasma response to edge cooling in JET and relation to plasma confinement	Mantica, P.	105
• Turbulence studies in the JET scrape-off layer plasmas	Garcia-Cortés, I.	109
• Radiation distribution and neutral-particle loss in the JET MkI and MkIIA divertors	Ingesson, L.C.	113
• The effect of divertor closure on detachment in JET	Monk, R.D.	117
• Dimensional scalings for the heat transport in the scrape-off layer of JET and Alcator C-MOD	Erents, S.K.	121
• Fluid modelling with drift fluxes of magnetic field reversal experiments in JET	Radford, G.J.	125
• Measurement of interaction of MeV energy protons with lower hybrid waves in JET plasma	Testa, D.	129
• Analysis of a wide band matching system for ICRH of ELMy JET plasmas	Lamalle, P.U.	133
• Analysis of ICRF heating in JET at harmonics of the ion cyclotron frequency	Mantsinen, M.	137
• Bulk ion heating with ICRH on the ITER path to ignition	Start, D.F.H.	141
• Plasma viewing in JET using endoscopes and a detailed design for ITER	Coad, J.P.	145
• Parallel electric resistivity in the Tore Supra tokamak	Joffrin, E.	149
• Pellet fuelling efficiency as a function of the launching location	Pégourié, B.	152
• Nonlinear evolution of ballooning modes in a tokamak plasma with stochastic field lines	Beyer, P.	157
• Plasma feedback control for stationary enhanced performance operation of Tore Supra	van Houtte, D.	161
• Contribution of electrostatic fluctuations to heat transport during L mode additional heating in Tore Supra	Devynck, P.	165
• Dimensional analysis of transport and turbulence in Tore Supra	Zou X.L.,	169

Title	Presenting Author	Page
• A model for improved confinement in PEP discharges	Maget, P.	173
• Predictive simulations of Tore Supra discharges in stationary and transient regimes	Erba, M.	177
• Analysis of up-down poloidal asymmetries of density fluctuations in Tore Supra	Fenzi, C.	181
• Boundary temperature profile and core energy confinement in ergodic divertor configuration	Féron, S.	185
• Investigation of particle and energy transport in RF heated and ergodic divertor discharges on Tore Supra, using CXRS	Hess, W.R.	189
• Intermittent transport due to particle flux drive of SOL turbulence	Sarazin, Y.	193
• Heat and particle deposition on the new neutraliser plates of the improved ergodic divertor in Tore Supra	Grosman, A.	197
• Impurity penetration in ergodic divertor experiments in Tore Supra	Chérigier, L.	201
• Experimental investigation and modelling of heat loads on limiters	Guilhem, D.	205
• Particle balance in ergodic divertor experiments with auxiliary heating on Tore Supra	Loarer, T.	209
• Plasma enhanced RF power deposition on ICRF antennas in Tore Supra	Goulding, R.H.	213
• High power lower hybrid wave coupling to ergodic divertor plasmas	Goniche, M.	217
• Competition between electron and ion damping in FWCD scenarios in the JET and Tore Supra experiments	Nguyen, F.	221
• Full wave simulation of lower hybrid current drive in tokamaks	Peysson, Y.	225
• Fast electron bremsstrahlung tomography on Tore Supra	Peysson, Y.	229
• The new bolometric diagnostic on Tore Supra	Vallet, J.-C.	233
• Dual frequency O-mode heterodyne reflectometer on Tore Supra	Clairet, F.	237
• Ion heating and confinement in NBI heated START plasmas	Tournianski, M.R.	241
• Profile optimization and MHD-activity in high- β NBH discharges on START	Gryaznevich, M.	245
• The density and q limits in START	Ribeiro, C.	249
• Edge scalings on COMPASS-D and START	Counsell, G.F.	253
• Analysis of halo current results on COMPASS-D and START	Castle, G.G.	257

Title	Presenting Author	Page	Title	Presenting Author	Page
• Neoclassical islands on COMPASS-D	Gates, D.A.	261	• Locked modes in the reversed-field pinch device TPE-IRM20	Yagi, Y.	345
• Error field mode thresholds, harmonics and scaling studies on JET and COMPASS-D, and implications for ITER	Buttery, R.J.	265	• Superthermal electrons and magnetohydrodynamic fluctuations in TPE-IRM20	Yagi, Y.	349
• Energy confinement of high- β plasmas on COMPASS-D with ECRH	Valovic, M.	269	• Effect of the shell proximity on confinement characteristics in a reversed-field pinch device, TPE-IRM20	Yagi, Y.	353
• Rotation and mode locking in COMPASS-D H-mode plasmas	O'Connell, R.	273	• Mode locking from an applied stationary error field in MST	Campostrini, P.	357
• Effects of electromagnetic turbulence on tokamak stability and transport	Thyagaraja, A.	277	• First reflectometric measurements on a RFP plasma with high density fluctuations	Cavazzana, R.	361
• ELMs and asymmetries at the COMPASS-D boundary	Silva, C.G.	281	• Fast flow phenomena in the MST reversed-field pinch	Den Hartog, D.J.	365
• Extensions to fluid models of tokamak edge plasma transport	Maddison, G.P.	285	• Improved confinement and β in an RFP with reduced turbulence	Den Hartog, D.J.	369
• Ballooning instabilities, poloidal flow and the temperature pedestal at the tokamak edge	Wilson, H.R.	289	• Ion acceleration model in reversed field pinch experiments	Viterbo, M.	373
• CT Fuelling of TdeV	Raman, R.	293	• Two aspects of poloidal plasma current in various wave form of toroidal plasma current on ATRAS RFP experiment	Saito, K.	377
• Effect of divertor geometry and plasma density on helium enrichment on TdeV-96	Pacher, G.W.	297	• Role of α -particles in mirror based volumetric neutron source (FEF-II)	Mizuno, N.	381
• Measurement and simulation of the sheath expansion in front of a flush-mounted probe	Gunn, J.P.	301	• High power neutral beam heating experiments in the gas dynamic trap	Anikeev, A.V.	385
• Finite element modelling of plasma and impurity transport in the TdeV divertor	Marchand, R.	305	• Modelling equilibrium magnetic fields with plasma flows in the SPHEX spheromak and tight aspect ratio tokamak	Willett, D.M.	389
• Proposal of a quasi-optical grill operating at 3.7 GHz for TdeV tokamak	Preinhaelter, J.	309	• VUV spectroscopic measurements of the impurity content and diffusion coefficient in the spheromak SPHEX	Cunningham, G.	393
• Analysis of hydrogen pellet injection experiments in RFX	Martini, S.	313	• The optimization and design of a small aspect-ratio torsatron-tokamak hybrid (EPEIUS)	Wootton, A.J.	397
• Magnetic profile behaviour, dynamo mechanisms and confinement in RFX	Innocente, P.	317	• The influence of mode coupling on the rotation and locking of tearing modes	Coelho, R.	401
• Pulsed poloidal current drive experiments in RFX	Martini, S.	321	• The investigations of magnetic perturbation spatial structures behavior during major disruptions in tokamak T-11M	Mirnov, S.V.	405
• Toroidal and poloidal plasma rotation in the reversed field pinch RFX	Puiatti, M.E.	325	• On peculiarities of L-H transition in the T-11M tokamak	Romannikov, A.N.	409
• Z_{eff} measurements on the reversed field pinch RFX	Scarin, P.	329	• On the turbulent transport in tokamaks	Pavlenko, V.P.	413
• Total radiation emissivity profiles reconstructed with tomographic techniques in RFX	Marrelli, L.	333	• Current drive experiments on the spherical tokamak TST	Toyama, H.	417
• Dynamo and superthermal electrons in RFX	Murari, A.	337	• Effect of induced toroidal rotation on poloidal rotation and ion heat conductivity of tokamak edge plasmas	Tsypin, V.S.	421
• Halo current measurements and their correlation with mode locking in RFX	Peruzzo, S.	341			

Title	Presenting Author	Page
• Current drive by Alfvén waves in elongated cross section tokamak	Tsy-pin, V.S.	425
• The generation of shear flow at a plasma edge in the finite gyro-radius guiding center approximation	Shoucri, M.	429
• Surface relaxation of highly excited diatomic molecules in the plasma edge	Nedospasov, A.V.	433
• Features of plasma edge turbulence in TBR tokamak	Caldas, I. L.	437
• The collision limits of collisionless bounce-resonance dissipation of waves in magnetized toroidal plasmas	Elfimov, A.G.	441
• The influence of light impurity ions on Alfvén wave dispersion and Alfvén wave plasma heating	Elfimov, A.G.	445
• Plasma dynamics in box of unshielded fast wave antenna	Faulconer, D.W.	449
• Nonlinear weighting scheme for Monte Carlo computation of the particle distribution function during RF heating	Heyn, M.F.	453
• A MW LHCD system and its first operation on HT-7 superconducting tokamak	Kuang, G.-L.	457
• Role of secondary processes in neutralization of fast protons during He ⁰ neutral beam injection into plasma	Khudoleev, A.V.	461
• Gamma-ray diagnostic project	Kiptily, V.	465
• Modeling of ion-dynamic effects in Stark-broadening theory of hydrogenic emitters	Golosnoy, I.O.	469
• A 5-chord VUV spectrometer for impurity study	Giroud, C.	473
• Extension and optimization of lithium beam diagnostic methods	Brandenburg, R.	477
• Electron temperature profile measurements by heavy ion beam probing on the tokamak ISTTOK	Malaquias, A.	481
• Fast multichannel plasma radiation losses measuring system	Romannikov, A.	485
