

## Contents of Part II (Poster Session 2)

Title	Presenting Author	Page
• Disruptive beta limits for high performance discharges in JT-60U	Ishida, S.	489
• Behaviour of radiation power loss from radiative divertor with reserved shear plasmas of JT-60U	Tamai, H.	493
• Analysis of transient transport processes on JT-60U tokamak	Neudatchin, S.V.	497
• Suppression of runaway - electrons generation during disruptive discharge - terminations in JT-60U	Kawano, Y.	501
• Analysis of JT-60U divertor plasma using "B2 Eirene" code	Hatayama, A.	505
• Behaviour of neutral deuterium and helium atoms in the divertor region of JT-60U	Kubo, H.	509
• Heating and current drive experiments with negative-ion-based neutral beam on JT-60U	Kusama, Y.	513
• Nonlinear Fokker-Planck analysis of ion temperature in JT-60U hot ion plasma	Yamagiwa, M.	517
• Statistical study of TCV disruptivity and H-mode accessibility	Martin, Y.	521
• Stability and energy confinement of highly elongated plasmas in TCV	Hofmann, F.	525
• Confinement optimisation by plasma shaping on TCV	Moret, J.-M.	529
• Toroidally asymmetric ELM precursor oscillations in the TCV tokamak	Reimerdes, H.	533
• Heating and confinement studies with ECRH in the TCV tokamak	Pochelon, A.	537
• Comparison of the CREATE-L plasma response model with experiments on TCV	Vyas, P.	541
• X-Ray measurements of MHD activity in shaped TCV plasmas	Furno, I.	545
• Measurement of the effective plasma ion mass in large tokamaks	Lister, J.B.	549
• MHD stability of configurations with distorted toroidal coils	Cooper, W. A.	553
• Fast edge mode observed during enhanced $D_{\alpha}$ phase in Alcator C-Mod	Hutchinson, I.H.	557
• Analysis of ICRF heating on Alcator C-Mod	Takase, Y.	561
• Enhanced $D_{\alpha}$ H-modes on Alcator C-Mod	Snipes, J.A.	565

Title	Presenting Author	Page	Title	Presenting Author	Page
• Reversed shear experiments in Alcator C-Mod with current ramp and ICRF heating	Porkolab, M.	569	• Laser blow-off experiment and study of impurity transport on HL-1M tokamak	Wang, E.Y.	657
• Volume recombination in Alcator C-mod divertor plasmas	Terry, J.L.	573	• Instability driven by ion-temperature-gradient and parallel-velocity-shear in plasmas with reversed magnetic shear	Peng, X.	661
• Study of Balmer spectrum near photo-recombination edge in Alcator C-Mod divertor plasmas	Terry, J.L.	577	• Variation of small scale density fluctuations characteristics in discharges with different confinement in T-10 tokamak	Vershkov, V.A.	665
• SOL power and pressure balance in Alcator C-mod	Pitcher, C.S.	581	• Improved core confinement study under fast current ramp up in the LHH experiment at FT-2 tokamak	Lashkul, S.I.	669
• Transport barriers and bifurcations in off-axis ECR heated discharges in RTP	de Baar, M.R.	585	• Investigation of plasma oscillations in regimes with $m=2,3$ instabilities in T-10 tokamak	Soldatov, S.V.	673
• Disruption studies with active triggering of Thomson scattering in RTP	Salzedas, F.	589	• Observation of electron heat transport close to the neo-classical one inside a zone with flattened q-profile in experiment on the magnetic plasma compression in tokamak	Lebedev, S.V.	677
• Evidence for fast radial transport during pellet ablation in the RTP tokamak as measured by Thomson scattering	de Kloe, J.	593	• The effect of plasma boundary on absorption of lower hybrid waves and plasma improved confinement in FT-2 tokamak	Budnikov, V.N.	681
• Dynamics of small scale $T_e$ , $n_e$ and $p_e$ structures; Thomson scattering at RTP	Beurkens, M.N.A.	597	• Investigation of plasma turbulence by microwave back-scattering techniques in LH-heating experiments on the FT-2 tokamak	Gusakov, E.Z.	685
• Magnetohydrodynamic stability analysis of negative shear plasmas in the KSTAR tokamak	Belien, S.	601	• Investigation of plasma oscillations on resonant magnetic flux surfaces by the correlation reflectometry on FT-2 tokamak	Gusakov, E.Z.	689
• Second harmonic ECCD experiments in RTP	Polman, R.	605	• $\beta$ studies in TUMAN-3M tokamak	Lebedev, S.V.	693
• VUV measurements of impurity behaviour on RTP	Mejer, F.	609	• Modelling of the L-H transition on TUMAN 3 tokamak	Rozhansky, V.	697
• Transonic MHD flows: stationary states and spectrum	Goedbloed, J.P.	613	• Control of edge plasma turbulence via ergodic magnetic limiter in tokamak TF-2	Budaev, V.P.	701
• Ray-tracing near cyclotron resonance using warm plasma dispersion	Westerhof, E.	617	• Study of dense and cold divertor with H-mode in the JFT-2M	Kawashima, H.	705
• Current density profiles measured with multi-position tangential Thomson scattering in the RTP tokamak	Pijper, F.	621	• Measurement of the plasma flow using the asymmetric double probe in JFT-2M tokamak	Maeda, M.	709
• Analysis of electrostatic and magnetic fluctuations on the CASTOR tokamak	Stöckel, J.	625	• Optimized high-field tokamak	Merezhkin, V.G.	713
• Characteristics of low intensity LHW launched in tokamak CASTOR by a quasioptical grill	Záček, F.	629	• Ripple losses of fast particles from reversed magnetic shear plasmas	Tobita, K.	717
• Space resolved investigation of USX radiation of low-Z impurities in CASTOR tokamak	Badalec, J.	633	• Particle behavior after vacuum pumping and gas-feeding termination during the long LHCD discharge in TRIAM-1M	Sakamoto, M.	721
• The plasma behaviour with molecular beam and pellet injection in HL-1M	Wang, E.Y.	637	• Full AC tokamak discharge in a small research device CSTN-AC	Takamura, S.	725
• Enhanced confinement in internal and edge regions of HL-1M H-mode plasma	Ran, L.B.	641	• Poloidal rotation studies in the TJ-I U torsatron	Zurro, B.	729
• Suppression of central MHD instabilities and snake perturbations during LHCD in the HL-1M tokamak	Wang, E.Y.	645			
• Injected impurity transport and confinement during improved confinement discharge induced by lower hybrid current drive	Chen, J.	649			
• Measurements of the boundary plasma flow on the HL-1M tokamak	Wang, E.Y.	653			

Title	Presenting Author	Page	Title	Presenting Author	Page
• Behaviour of superthermal electrons in TJ-I Upgrade Torsatron	Rodríguez-Rodrigo, L.	733	• MHD instability study with soft X-ray detector array system on CHS Heliotron/Torsatron	Ohdachi, S.	813
• Atomic beam characterisation of the plasma edge in the TJ-I Up torsatron	Tabarés, F.L.	737	• Sawtooth oscillations observed in CHS Heliotron/Torsatron and their effects on edge plasma	Ohdachi, S.	817
• First experimental results in TJ-II flexible heliac: magnetic surface mapping	Alejandre, C.	741	• Edge plasma control using an LID configuration on CHS	Masuzaki, S.	821
• Fluctuations and turbulent transport in the TJ-IU torsatron	Pedrosa, M.A.	745	• Development of a pulsed radar reflectometer for CHS plasmas	Ohdachi, S.	825
• Diamagnetic drift and finite ion Larmor radius effects on ballooning stability of the TJ-II flexible heliac	Sanchez, R.	749	• Li pellet injection experiments and extension to advanced particle transport diagnostics with tracer-encapsulated pellet	Sudo, S.	829
• Solving three-dimensional plasma equilibria with a neutral network technique	van Milligen, P.	753	• Analysis of neo-classical double tearing mode	Yu, Q.	833
• ECRH plasma breakdown studies in TJI-U torsatron	Cappa, A.	757	• Extension of lattice Boltzmann techniques to flows with arbitrary Prandtl number	Pavlo, P.	837
• Kinetic global Alfvén modes and kinetic flute modes in a stellarator with trapped energetic ions	Andrushchenko, Zh.N.	761	• Improved regimes of the tokamak core	Sen, S.	841
• Two problems of the plasma confinement in stellarators	Mikhailov, M.I.	765	• Beta limits against external kink modes in tokamaks taking into account plasma outside separatrix	Medvedev, S.	845
• Few period quasisymmetric stellarators	Subbotin, A.A.	769	• Integral equation approach to modelling of the observed phenomena of fast nonlocal heat transport in a tokamak	Kukushkin, A.B.	849
• Plasma equilibrium without Pfirsch-Schlüter current in conventional stellarators	Pustovitov, V.D.	773	• Automodel dynamics of current "coalescence" in a thin current layer	Kukushkin, A.B.	853
• Fast pressure measurements of the local island divertor on the compact helical system	Lyon, J.F.	777	• Subcritical excitation of plasma turbulence	Itoh, K.	857
• Fast reconstruction of H-1NF heliac electron density profiles from multi-view far-infrared interferometer signals	Waller, J.W.	781	• Shear flow effects on resistive ballooning turbulence	Garcia, L.	861
• Suppression of Pfirsch-Schlüter current in inward-shifted stellarator plasma on Heliotron E	Besshou, S.	785	• Energy limits on runaway electrons in tokamak plasmas	Martin-Solis, R.	865
• Plasma confinement analysis for large helical device and modular heliotron reactor	Yamazaki, K.	789	• Non-linear saturation of ion temperature gradient modes	Alvarez, J.D.	869
• Study of ion cyclotron heating experiment in LHD by code calculation	Seki, T.	793	• Gyrokinetic particle simulation of small-scale magnetic islands in high temperature tokamak plasmas	Sydora, R.D.	873
• Preparative study of simulated magnetic measurements in large helical device	Sakakibara, S.	797	• Large temperature gradient toroidal $\eta_i$ modes in fluid and kinetic descriptions	Jarmén, A.	877
• Introduction and role of effective toroidal curvature in L=1 torsatron	Shiina, S.	801	• Stability of ideal and resistive modes in cylindrical plasmas with resistive walls and plasma rotation	Bondeson, A.	881
• A model equation for high-n ballooning and TAE modes in an L = 2 heliotron/torsatron system	Nakajima, N.	805	• MHD operational limits for tokamaks with negative central shear	Bondeson, A.	885
• Electron temperature and density determination in combination of hydrogen spectroscopy and collisional-radiative model in plasma decay phase of CHS	Goto, M.	809	• Nonlinear stability analysis of external hydromagnetic modes in a tokamak	Wahlberg, C.	889
			• Relaxation of banana drift orbits towards turbulent equipartition	Persson, H.	893
			• Plasma equilibrium with flow in axisymmetric toroidal magnetic traps	Cheremnykh, O.K.	897
			• Distribution of divertor plasma fluxes in the "Heliotron E" device	Masuzaki, S.	901

<b>Title</b>	<b>Presenting Author</b>	<b>Page</b>
• Theory of ion and impurity transport in edge plasmas	Hazeltine, R.D.	905
• Divertor plasma flows affected by ExB drifts	Ödblom, A.	909
• Transport of intensive LHW pulses into the tokamak plasma and accompanying plasma biasing	Krlin, L.	913
• Co-counter asymmetry in fast wave heating and current drive and profile control in NSTX	Jaeger, E.F.	917
• Alfvén current drive in tokamaks with aspect ratio in the range $1.05 \leq R/a \leq 10$	Cuperman, S.	921
• Fokker-Planck simulation of the electron-cyclotron heating and electron-cyclotron/lower hybrid current drive synergy for TdeV	Shoucri, M.	925
• Experimental investigation of oscillating magnetic field current drive in an inductively coupled plasma device	Luo, W.	929
• EC ray tracing with relativistic effects	Kuznetsova, L.K.	933
• Reconstruction of transport coefficients and ECRH power deposit profile from SXR intensity in tokamak T-10	Sushkov, A.V.	937
• Full Wave-Vlasov analysis of Alfvén wave current drive in simulated low aspect ratio tokamaks	Komoshvili, K.	941
• ICRF heating and current drive in low and high beta tokamaks	Scharer, J.	945
• Production of an „illusory image“ in the measurements of $T_e(r)$ profile by the ECE diagnostic under ECCD in T-10 tokamak	Sushkov, A.V.	949
