

CONTENTS

Introduction	6
Knowledge Map	8
Timechart	12
Physics Keywords	16

1 *Properties of Matter* 48

Gases and Vapors	50
Using Gas Pressure	52
The Liquid State	54
Solids	56

2 *Force and Energy* 58

Matter on the Move	60
Force of Gravity	62
Mechanical Energy	64
Simple Machines	66
Heat Energy	68
Heating and Cooling	70
Measuring and Using Heat	72

3 *Electricity and Magnetism* 74

Magnets and Fields	76
Static Electricity	78
Electric Current	80
Producing Electric Current	82
Generating Electricity	84
Electric Motors	86
Electrolysis	88
Electricity and Other Energy	90
Electronics and Semiconductors	92
Miniaturization	94

4 *Sound Energy* 96

Producing Sound	98
Speed of Sound	100
Ultrasound	102
Sound Recording	104

5 *Light and the Spectrum* 106

Producing Light	108
Reflection and Mirrors	110
Refraction and Lenses	112
Dispersion and Diffraction	114
Light from Lasers	116
Invisible Radiations	118
Radio Waves	120
Radar at Work	122
TV Camera and Recorder	124
Television Playback	126

6 *Inside the Atom* 128

Subatomic Particles	130
The Unstable Atom	132
Nuclear Fission	134
Nuclear Fusion	136
Quantum Physics	138
Waves and Particles	140
Mass Equals Energy	142

Factfile 144

Metric Prefixes	144
Conversion Factors	144
SI Units	145
Common Formulas	146
Physical Constants	147
Elementary Particles	147
Chemical Elements	148
Physical Properties of Common Metals	150
Circuit Symbols	150
Sound Intensity	151
Isotopes and Radioactivity	152
Nobel Prizewinners	154
Further Reading	151
Index	156
Acknowledgments	160
