

TABLE OF CONTENTS

Volume 1

Preface	v
Committee members	vii
Industrial exhibitors	viii
<i>Invited Talks</i>	
Nuclear fusion, an energy source <i>R. Toschi</i>	1
ITER overview <i>R. Aymar</i>	9
The ITER magnet system <i>M. Huguet</i>	23
Design of in-vessel components for ITER <i>R.R. Parker</i>	33
Management of waste from the International Thermonuclear Experimental Reactor and from future fusion power plants <i>K. Brodén, M. Lindberg, S. Nisan, P. Rocco, M. Zucchetti, N. Taylor, C. Forty</i>	49
Status of European breeding blanket technology <i>L. Giancarli, M. Dalle Donne, W. Dietz</i>	57
Recent results on vacuum pumping and fuel clean-up <i>R.-D. Penzhorn, D. Murdoch, R. Haange</i>	75
Remote handling on fusion experiments <i>A.C. Rolfe</i>	91
Possible divertor solutions for a fusion reactor. Part I. Physical aspects based on present day divertor operation <i>A. Kallenbach, H.-S. Bosch, S. de Peña Hempel, R. Dux, M. Kaufmann, V. Mertens, J. Neuhauser, W. Suttrop, H. Zohm</i>	101
Possible divertor solutions for a fusion reactor. Part II. Technical aspects of a possible divertor <i>Ph. Chappuis, F. Escourbiac, M. Lipa, R. Mitteau, J. Schlosser</i>	109
Engineering experience in JET operations <i>E. Bertolini</i>	119

D-T operation on TFTR <i>M.D. Williams</i>	135
Development of high current negative ion source <i>T. Kuroda</i>	143
Advances in techniques for diagnosing fusion plasmas <i>P.E. Stott</i>	157
On-site developed components for control and data acquisition on next generation fusion devices <i>C.A.F. Varandas, B.B. Carvalho, C. Correia, C. Loureiro, J.L. Malaquias, A.P. Rodrigues, J. Sousa</i>	167
Oral Presentations	
Industrial experience in manufacturing the superconducting CIC conductors in EU for the ITER CS model coil <i>G. Bevilacqua, E. Salpietro, H. Krauth, A. Szulczyk, M. Thoener, S. Angius, P. Gagliardi, A. Laurenti, R. Garré, S. Rossi, M.V. Ricci, M. Spadoni</i>	179
The ITER-QUELL, a QUENCH propagation experiment on long length CICC with central channel <i>A. Anghel, Y. Takahashi, S. Smith, S. Pourrahimi, M. Zhelamskij, B. Blau, A. Fuchs, B. Heer, K. Hamada, H. Fujisaki, C. Marinucci, G. Vecsey</i>	185
The plasma shield in ITER plasma wall interactions <i>H. Würz, B. Bazylev, F. Kappler, I. Landman, S. Pestchanyi, G. Piazza</i>	191
In-situ repair concepts for the ITER first wall components <i>R. Matera, S. Chiochio, G. Federici, K. Ioki, R. Raffray, A. Cardella, A. Lodato, F. Saint-Antonin, G. Le Marois, R. Castro, M. Akiba, S. Suzuki, D. Karpov, L. Moreschi</i>	197
High performance results with the LHCD system on TORE-Supra and new Launcher design for quasi continuous operation <i>P. Froissard, P. Bibet, G. Agarici, S. Berio, C. Deck, L. Garampon, M. Goniche, D. Guilhem, P. Hertout, T. Hoang, J.Y. Journeaux, F. Kazarin-Vibert, X. Litaudon, G. Martin, M. Mattioli, Y. Peysson, C. Portafaix, G. Rey, F. Surle, M. Tareb, G. Tonon, J.G. Wegrowe</i>	203
Mathematical model and results of calculations for poloidal magnetic field system and stress analysis for toroidal field system of the TEXTOR 94 <i>I. Baturo, N. Berkhov, H. Bohn, E. Bondarchuk, V. Filatov, B. Giesen, N. Doinikov, M. Korol'kov, B. Kitaev, N. Kozhukhovskaja, N. Maximenkova, B. Mingalev, O. Neubauer, T. Obidenko, A. Panin, A. Simakov</i>	209
Research progress on JT-60U in advanced steady-state operation <i>O. Naito (for the JT-60 Team)</i>	215

An overview of the DIII-D program <i>J.L. Luxon for the DIII-D Team</i>	221
Commissioning tests and enhancements to the JET active gas handling plant <i>R. Lässer, A. Bell, N. Bainbridge, D. Brennan, B. Grieveson, J.L. Hemmerich, G. Jones, S. Knipe, J. Lupo, J. Mart, A. Perevezentsev, N. Skinner, R. Stagg, K. Walker, R. Warren, J. Yorkshades</i>	227
Neutronics shield experiment for ITER at the Frascati Neutron Generator FNG <i>R. Batistoni, M. Angelone, W. Daenner, U. Fischer, L. Petrizzi, M. Pillon, A. Santamarina, K. Seidel</i>	233
 Contributed Papers	
 Section A: First Wall, Divertors and Vacuum Systems	
Experimental validation of the liquid lithium divertor concept <i>N.V. Antonov, V.B. Petrov, A.S. Pleshakov, A.S. Rupyshev, Y.A. Sokolov, B.I. Khripunov, V.V. Shapkin, A.V. Vertkov, V.A. Evtikhin, I.E. Lublinsky, V.I. Pistunovich, L.G. Golubchikov</i>	243
Feasibility of liquid gallium cooling for ITER divertor cassette <i>P.V. Romanov, Yu. Shpanskij, A.V. Klischenko, V.S. Petrov, S.A. Moshkin, A.V. Beznosov</i>	247
Review of liquid metal divertor concepts for Tokamak reactors <i>I.R. Kirillov, E.V. Muraviev</i>	251
Helium retention of B ₄ C or SiC converted graphite <i>T. Hino, Y. Yamauchi, Y. Hirohata, K. Mori</i>	255
ITER outboard Baffle design and small-scale mock-ups test programme <i>L. Giancarli, B. Bielak, P. Chappuis, C. Cheron, G. Le Marois, Y. Poitevin, J. Quintric-Bossy, J.-F. Salavy, Y. Severi, J. Szczepanski</i>	259
Comparison between various thermal hydraulic tube concepts for the ITER divertor <i>I. Smid, J. Schlosser, J. Boscary, F. Escourbiac, G. Vieider</i>	263
ITER Baffle small-size mock-ups fabrication and testing <i>G. Le Marois, F. Bernier, D. San Filippo, F. Saint-Antonin, F. Moret</i>	267
High heat flux performance of divertor modules for ITER with beryllium and carbon armor <i>J. Linke, G. Breitbach, R. Duwe, A. Gervash, M. Rödiger, B. Wiechers</i>	271
Manufacture and testing of small-scale mock-ups for the ITER divertor <i>G. Vieider, P. Chappuis, R. Duwe, R. Jakeman, M. Merola, H.D. Pacher, L. Plöchl, F. Rainer, M. Rödiger, N. Reheis, I. Smid</i>	275

Engineering design of the ITER divertor <i>R. Tivey, M. Akiba, A. Antipenkov, S. Chiocchio, D. Driemeyer, R. Jakeman, G. Janeschitz, I. Mazul, M. Ulrickson, G. Vieider</i>	279
Manufacturing feasibility study for the ITER divertor vertical target and wing <i>G. Cai, M. Grattarola, G.B. Ottonello, F. Zacchia</i>	283
Thermal and structural analysis of the ITER divertor outboard channel <i>B. Riccardi, A. Pizzuto, R.A. Palmieri</i>	287
The outline design of the ITER divertor outboard vertical target dump plate and wing <i>A. Pizzuto, G. Vieider, M. Baldarelli, G. Brolatti, B. Riccardi, M. Roccella, I. Smid</i>	291
Development and construction of a high efficiency divertor mock-up using a semi-solid thixotropic alloy as thermal bond layer <i>L.F. Moreschi, E. Visca, S. Storai, M. Sacchetti, F. Salvi</i>	295
Neutron exposure characterisation of ITER divertor materials for source terms evaluation <i>D.G. Ceparaga, G. Cambi, L. Di Pace, M. Vaccari</i>	299
Thermal analysis of sacrificial components <i>F. Andritsos, A. Inzaghi</i>	303
Development of plasma-facing components for fusion experimental reactors at JAERI <i>M. Akiba, M. Araki, K. Nakamura, S. Satoh, S. Suzuki, M. Dairaku, K. Yokoyama, Y. Ohara</i>	307
Boiling crisis at heat transfer intensification on divertor surfaces under resistive and e-stream heating condition <i>V.A. Divavin, S.A. Grigoriev, A.V. Lipko</i>	311
Three dimensional neutronic and activation analysis for the ITER design <i>J.-Ch. Sublet</i>	315
Creep-fatigue damage in OFHC coolant tubes for plasma facing components <i>E.E. Reis, R.H. Ryder</i>	319
Radiation-induced desorption of hydrogen and deuterium from candidate plasma-facing materials <i>R.G. Macaulay-Newcombe, D.A. Thompson</i>	323
Evaluation of an advanced silicon doped CFC for plasma facing material <i>C.H. Wu, C. Alessandrini, P. Bonal, A. Caso, H. Grote, R. Moormann, A. Perujo, M. Balden, H. Werle, G. Vieider</i>	327
Fracture mechanics investigations of molybdenum alloys <i>M. Rödíg, H. Derz, G. Pott, B. Werner</i>	331

Oxidation of carbon-based plasma facing materials in accident-like temperature transients <i>H.-K. Hinssen, M. Hofmann, A.-K. Krüssenberg, R. Moormann, C.H. Wu</i>	335
Thermal fatigue behaviour of first wall mock-ups with defects <i>G. Hofmann, E. Diegele, M. Kamlah, S. Müller</i>	339
Development of plasma facing components with ceramic armour <i>R. Vaßen, A. Yehia, R. Lison, R. Duwe, D. Stöver</i>	343
Materials aspects of ITER in-vessel components <i>V. Barabash, J. Dietz, K. Ioki, G. Janeschitz, G. Kalinin, R. Matera, K. Mohri and ITER Home Teams</i>	347
Analysis of plasma shield formation and graphite target erosion in disruption simulation experiments with high power quasistationary plasma streams <i>V.V. Chebotarev, I.E. Garkusha, V.V. Garkusha, V.A. Makhraj, N.I. Mitina, S.E. Pestchanyi, D.G. Solyakov, V.I. Tereshin, S.A. Trubchaninov, A.V. Tsarenko, H. Würz</i>	351
Tribological behaviour of CFC material <i>A. Orsini, E. Di Pietro, S. Libera, L. Verdini, E. Visca, G. Vieider</i>	355
Development of 3D-based CFC with high thermal conductivity for fusion application <i>M. Araki, Y. Kude, Y. Sohda, K. Nakamura, K. Sato, S. Suzuki, M. Akiba</i>	359
Evaluation of hydrogen sorption and desorption for Ti-6Al-4V alloy as a vacuum vessel material <i>Y. Hirohata, Y. Aihara, T. Hino, N. Miki, S. Nakagawa</i>	363
Crack propagation test under cyclic thermal stress by irradiation of electron beam <i>H. Kogawa, S. Kimura, T. Teramoto, M. Saito</i>	367
Creep analysis of first wall in fusion reactor <i>K. Hatamoto, T. Teramoto, M. Saito</i>	371
Behaviour of sub-surface defects under thermal fatigue loading in a 316L first wall mock-up <i>F. Sevini, M. Merola</i>	375
Erosion damage of nearby plasma-facing components during a disruption on the divertor plate <i>A. Hassanein, I. Konkashbaev</i>	379
The study of CVD thick B ₄ C and SiC coatings on graphites of different types in DIII-D divertor <i>O.I. Buzhinskij, I.V. Opimach, V.A. Barsuk, P.W. West, N. Brooks, D. Whyte</i>	383

Mechanical study of JET MKI beryllium tiles after ELMs and deliberate melting <i>E.B. Deksnis, A. Chankin, F. Hurd, W. Parsons, B. Tubbing</i>	387
Design, fabrication and testing of helium-cooled vanadium module for fusion applications <i>C.B. Baxi, E. Chin, B. Laycock, W.R. Johnson, R.J. Junge, E.E. Reis, J.P. Smith</i>	391
Characterization of copper-stainless steel EXW joints <i>S. Tähtinen, P. Moilanen, P. Karjalainen-Roikonen</i>	395
Development and characterization of Be/Cu joint obtained by hot isostatic pressing <i>F. Saint-Antonin, D. Barberi, G. Le Marois, A. Laillé</i>	399
Development of mechanically joined divertor plate for large helical device <i>Y. Kubota, N. Noda, A. Sagara, Y. Kato, T. Morisaki, N. Ohyabu, O. Motojima</i>	403
Reactivity test between beryllium and dispersion strengthened copper <i>N. Sakamoto, H. Kawamura, R.R. Solomon</i>	407
Fabrication of ITER first wall modules from powder by hot isostatic pressing <i>A. Lind, J. Collén</i>	411
Development of silver-free bonding techniques and an investigation of the effect of cadmium in brazed joints made with silver based brazing alloys <i>A.T. Peacock, M.R. Harrison, D.M. Jacobson, M. Pick, S.P.S. Sangha, G. Vieider</i>	415
Thermal fatigue test of a Cu/ss primary wall mock-up <i>M. Merola, P. Fenici, R. Scholz, B. Weckermann, S. Tähtinen</i>	419
Technologies of joining between ITER reference grade beryllium and copper alloys by diffusion bonding process <i>E. Visca, G. Ceccotti, B. Riccardi, G. Mercurio</i>	423
In-vessel cryo pump for the ASDEX Upgrade divertor II <i>B. Streibl, S. Deschka, O. Gruber, B. Jüttner, P. Lang, K. Mattes, G. Pautasso, J. Perchermeier, K. Schippl, H. Schneider, U. Seidel, W. Suttrop, G. Teller, M. Weissgerber</i>	427
The model and experimental basis for the design parameters of the JET divertor cryopump protection system including variations in divertor geometry and first wall materials <i>P. Ageladarakis, S. Papastergiou, D. Stork, H. van der Beken</i>	431
Upgrading of the TORE Supra ergodic divertor <i>L. Doceul, A. Grosman, P. Deschamps, B. Bertrand, J.P. Cocat, J.J. Cordier, L. Garampon, L. Gargiulo, Ph. Ghendrih, M. Lipa, R. Mitteau, H. Viallet</i>	435
Development and fabrication of improved CFC-brazed components for the inner first wall of TORE Supra <i>M. Lipa, Ph. Chappuis, G. Chaumat, D. Guilhem, R. Mitteau, L. Ploechl</i>	439

- Non destructive testing of actively cooled plasma facing components by means of thermal transient excitation and infrared imaging
R. Mitteau, S. Berrebi, P. Chappuis, Ph. Darses, A. Dufayet, L. Garampon, D. Guilhem, M. Lipa, V. Martin, H. Roche 443
- Developments for an actively cooled toroidal pump limiter for TORE Supra
J. Schlosser, Ph. Chappuis, L. Doceul, M. Chatelier, J.P. Cocat, L. Garampon, P. Garin, R. Mitteau, A. Moal, L. Plöchl, G. Tonon, E. Tsitrone 447
- The TORE Supra vented limiter: an alternative concept for heat and particle exhaust
E. Tsitrone, T. Loarer, B. Pégourié, H. Roche, P. Chappuis, D. Guilhem 451
- Divertor II plasma facing components for ASDEX Upgrade
S. Deschka, S. Schweizer, B. Streibl, ASDEX Upgrade Team, C. Garcia-Rosales, G. Hofmann, J. Linke 455
- Actively cooled test limiter for TEXTOR
W. Hohenauer, H. Bolt, T. Koppitz, J. Linke, R. Lison, W. Malléner, V. Philipps, M. Sauer, R. Uhlemann, J.H. You, H. Nickel 459
- Divertor engineering for the Stellarator Wendelstein W 7-X
H. Greuner, H. Bitter, R. Holzthüm, O. Jandl, F. Kerl, J. Kisslinger, H. Renner 463
- Design, manufacturing and testing of the W 7-X target element plate prototypes
H. Greuner, T. Huber, J. Kisslinger, E. Parteder, L. Plöchl, H. Renner 467
- Design of a compact W-shaped pumped divertor in JT-60U
S. Sakurai, N. Hosogane, K. Kodama, K. Masaki, T. Sasajima, K. Kishiya, S. Tsurumi, S. Takahashi, M. Saidoh 471
- Structural design of the DIII-D radiative divertor
E.E. Reis, J.P. Smith, C.B. Baxi, A.S. Bozek, E. Chin, M.A. Hollerbach, G.J. Laughon, D.L. Sevier 475
- Fabrication development and usage of vanadium alloys in DIII-D
J.P. Smith, W.R. Johnson, E.E. Reis 479
- The MkII gas box divertor – A new design concept
H. Altmann, E. Deksnis, C. Froger, S. Lawson, C. Lowry, A. Peacock, M. Pick 483
- Advances in porous media heat exchangers for fusion applications
J.H. Rosenfeld, J.E. Lindemuth, M.T. North, R.D. Watson, D.L. Youchison, R.H. Goulding 487
- Evolution of framatone and CEA high thermal flux station for fusion technology experiments needs
M. Diotalevi, M. Febvre, P. Chappuis 491

Xenon pellet production and acceleration in a pipe-gun <i>P.V. Reznichenko, I.V. Viniar, B.V. Kuteev</i>	495
Disruption simulations on tungsten specimens in a plasma accelerator <i>A. Gervash, E. Wallura, I. Ovchinnikov, A.N. Makhankov, J. Linke, G. Breitbach</i>	499
Void swelling in proton irradiated Fe-Cr-Ni ternary alloys <i>Y. Murase, N. Yamamoto, J. Nagakawa, H. Shiraishi</i>	503
Study of plasma target interactions with plasma streams of power density of 40 MW/cm ² <i>N.I. Arkhipov, V.P. Bakhtin, S.M. Kurkin, S.E. Pestchanyi, V.M. Safronov, D.A. Toporkov, S.G. Vasenin, H. Würz, A.M. Zhitlukhin</i>	507
Post-mortem analysis of HIP bonded first wall panel made from SS316 and DS-Cu after high heat flux testing <i>T. Hatano, K. Fukaya, M. Dairaku, T. Kuroda, H. Takatsu</i>	511
Ohmic baking system upgrade for wall conditioning of Tokamak-15 discharge chamber <i>V.N. Garnov, S.V. Kabanovsky, V.A. Khrabrov, P.P. Khvostenko, V.A. Kochin, A.I. Nikonorov, P.N. Orlov, I.A. Posadsky, A.N. Vertiporokh</i>	515
GlidCop® DSC extruded plus cross-rolled plate tensile properties in the temperature range of 20–500°C <i>R.R. Solomon, J.D. Troxell, A.V. Nadkarni</i>	519
Section B: Plasma Heating and Control	
The 110 GHz ECR system for TdeV <i>R. Magne, G.A. Chaudron, R. Cool, Y. Demers, Ph. Cumyn, R. Décoste, A. Dubé, J.M. Guay, D. Larose, A. Robert, C. Trudel, L. Vachon</i>	525
Low power radiation field pattern measurements of main components of the TORE Supra ECRH transmission line <i>G. Berger-By, J.P. Crenn, R. Levy, P. Garin, D. Roux, M. Pain</i>	529
Status of the 118 GHz-Quasi CW gyrotron for the TORE Supra and TCV tokamaks <i>M. Pain, P. Garin, M.Q. Tran, S. Alberti, M. Thumm, O. Braz, E. Giguet, P. Thouvenin, C. Tran</i>	533
The 140 GHz-2MW-2 s ECRH system for ASDEX-Upgrade <i>H. Brinkschulte, A. Fix, W. Förster, G. Gantenbein, W. Kasperek, F. Leuterer, F. Monaco, M. München, A. Peeters, F. Ryter, P. Schüller, V. Sigalaev, E. Tai</i>	537
Conceptual design of the 140 GHz/10MW CW ECRH system for the stellarator W7-X <i>L. Empacher, W. Förster, G. Gantenbein, W. Kasperek, H. Kumrić, G.A. Müller, P.G. Schüller, K. Schwörer, U. Schumacher, D. Wagner, V. Erckmann, T. Geist, H. Laqua</i>	541

Advanced high power gyrotrons for ECW application <i>B. Piosczyk, E. Borie, O. Braz, G. Dammertz, C.T. Iatrou, S. Illy, S. Kern, M. Kuntze, M.V. Kartikeyan, G. Michel, A. Möbius, M. Thumm</i>	545
Development of 170GHz long pulse gyrotron with depressed collector <i>A. Kasugai, K. Sakamoto, M. Tsuneoka, K. Takahashi, S. Maebara, T. Imai, T. Kariya, K. Hayashi, Y. Mitsunaka, Y. Hirata</i>	549
Development of an ECRH system for large helical device <i>T. Shimozuma, M. Sato, Y. Takita, S. Kubo, H. Idei, K. Ohkubo, T. Watari, S. Yasutomi, Y. Suzuki, F. Saito, S. Sasaki, Y. Saito, T. Okamoto</i>	553
New developments in the 110 GHz system on the RTP tokamak <i>O.G. Kruijt, W.A. Bongers, A.B. Sterk, F.J. van Amerongen, A. Bijker, G.G. Denisov, W. Kooijman, S. Kuyvenhoven, G. Land, A. Montvai, A.A.M. Oomens, R.W. Polman, F.C. Schüller, A.G.A. Verhoeven, D. Vinogradov and the RTP team</i>	557
Present status of the 1MW, 130–260 GHz free electron maser <i>A.B. Sterk, B.S.Q. Elzendoorn, W.A. Bongers, P. Manintveld, P.R. Prins, A.G.A. Verhoeven, W.H. Urbanus, the VE team and the FEM team</i>	561
Design and installation of the electron cyclotron wave system for the TCV tokamak <i>T.P. Goodman, S. Alberti, M.A. Henderson, A. Pochelon, M.Q. Tran</i>	565
Design and operation of the power installation for the TCV ECR additional heating <i>D. Fasel, J. Alex, A. Favre, T. Goodman, M. Henderson, P.-F. Isoz, A. Perez, M-Q. Tran</i>	569
High-power corrugated waveguide components for mm-wave fusion heating systems <i>R.A. Olstad, J.L. Doane, C.P. Moeller, R.C. O'Neill, M. DiMartino</i>	573
ICRF power feedback regulation of the plasma diamagnetic energy content of the tokamak TEXTOR <i>C. Königs, F. Durodié, M. Vervier</i>	577
Generating system for Alfvén waves in TCA/BR <i>L. Ruchko, R. Galvão, I.C. Nascimento, E. Ozono, F. Degasperri, E. Lerche</i>	581
Negative ion extraction physics <i>M. Bacal, F. El Balghiti-Sube, A.A. Ivanov, A.B. Sionov</i>	585
Effect of cesium seeding in volume negative ion sources <i>M. Bacal, F. El Balghiti-Sube, L.I. Elizarov, A.J. Tontegode</i>	589
First results of automatic matching system on Tore Supra ICRH antennas: fast matching network for ICRH systems <i>L. Ladurelle, G. Agarici, B. Beaumont, S. Bremond, H. Kuus, G. Lombard</i>	593

ICRF operation during H-mode with ELMs development status at ASDEX Upgrade <i>F. Wesner, W. Becker, F. Braun, H. Faugel, R. Fritsch, F. Hofmeister, J.-M. Noterdaeme, Th. Sperger</i>	597
An ARC detection system for ICR-heating <i>F. Braun, Th. Sperger</i>	601
Matching fast ICRF antenna coupling variations by frequency change <i>F. Hofmeister and ICRH team</i>	605
Progress on radio frequency auxiliary heating system designs in ITER <i>M. Makowski, G. Bosia, F. Elio and the Home Teams</i>	609
The 1.8 MW-433 MHz RF system for the ion Bernstein waves experiments on FTU <i>P. Papitto, R. Cesario, A. Cucchiaro, A. Marra, G.L. Ravera, P. Zampelli</i>	613
Achievment of 1.6MW/5000sec operation of RF oscillator on the large helical device <i>R. Kumazawa, T. Mutoh, T. Watari, T. Seki, F. Shinbo, G. Nomura, S. Masuda, T. Ido, T. Kuroda</i>	617
Operation of high power ICRH with ELMY plasmas at JET <i>M. Schmid, V. Bhatnagar, C. Gormezano, P.U. Lamalle, A. Sibley, M. Simon, M. Timms, T. Wade</i>	621
Improved tuning and matching of ion cyclotron systems <i>D.W. Swain, R.H. Goulding, F.W. Baity, R.I. Pinsker, J.S. deGrassie, C.C. Petty, D.J. Hoffman</i>	625
Development of fast wave systems tolerant of time-varying loading <i>R.I. Pinsker, C.P. Moeller, C.C. Petty, D.A. Phelps, T. Ogawa, Y. Miura, H. Ikezi, J.S. deGrassie, R.W. Callis, R.H. Goulding, F.W. Baity</i>	629
Flexible N_{\parallel} Launcher for lower hybrid wave injection in the first operation phase of ITER <i>G. Rey, P. Bibet, P. Froissard, J.G. Wegrowe, S. B�erio, M. Goniche, G.T. Hoang, F. Kazarin-Vibert, X. Litaudon, M. Tareb, G. Tonon</i>	633
Development of a new lower hybrid antenna module using a poloidal power divider <i>S. Maebara, M. Seki, K. Sukanuma, T. Imai, M. Goniche, Ph. Bibet, S. B�erio, J. Brossaud, G. Rey, G. Tonon</i>	637
Upgrading of the injection power of the W7-AS neutral beam system <i>W. Ott, F.-P. Penningsfeld, W. Melkus, F. Probst, E. Speth, R. S�uss and W7-AS Team</i>	641
Development of a novel compact RF-source <i>B. Heinmann, J.-H. Feist, W. Kraus, F. Probst, R. Riedl, E. Speth, M. Busch, W. Szcapaniak</i>	645

Optimization of a large-area RF plasma generator <i>W. Kraus, J.-H. Feist, E. Speth</i>	649
Modelling of the TEXTOR-94 neutral-injection power supply system in the search of parasitic currents <i>C.-C. Hering, U. Braunsberger, M. Sauer, W. Schalt</i>	653
Neutral beam injector for steady state superconducting tokamak <i>A.K. Chakraborty, N. Bisai, M.R. Jana, P.K. Jayakumar, U.K. Baruah, P.J. Patel, K. Rajasekar, S.K. Mattoo</i>	657
Beam properties of the enhanced JET PINIs <i>D. Ciric, C.D. Challis, H.P.L. de Esch, H.-D. Falter, D. Godden, A.J.T. Holmes, D. Stork, E. Thompson</i>	661
Upgrading of the neutral beam power supplies from 80KV/60A to 140KV/60A <i>F. Jensen, R. Claesen, H. McBryan, J. Mills, R. Öström, A.P. Vadgama</i>	665
Operations with tritium neutral beams on TFTR <i>L.R. Grisham, J. Kamperschroer, T. O'Connor, M.E. Oldaker, T.N. Stevenson, A. von Halle and TFTR Group</i>	669
The BEL: a test bed for the positive ions based neutral beam injectors with energy recovery system for TORE Supra <i>P. Bayetti, F. Bottiglioni, H. Dougnac, F. Imbeaux, J.Y. Journeaux, Ph. Lotte, G. Mayaux</i>	673
Negative D ⁻ ion source relevant for application to ITER neutral beam injectors <i>C. Jacquot, D. Riz, R. Trainham, K. Miyamoto, Y. Okumura, M.B. Hopkins</i>	677
Extraction system development and stray electron study for high intensity negative ion based NBI <i>A. Simonin, K. Miyamoto, Y. Fujiwara</i>	681
Results of the Cadarache 1 MeV D ⁻ "SINGAP" experiment <i>J. Bucalossi, C. Desgranges, M. Fumelli, P. Massmann, J. Paméla, A. Simonin</i>	685
Development of a large RF-driven negative ion source for neutral beam injector <i>T. Takanashi, Y. Takeiri, O. Kaneko, Y. Oka, K. Tsumori, M. Osakabe, T. Kuroda</i>	689
Initial beam operation of 500KeV negative-ion based NBI system for JT-60U <i>M. Kuriyama, N. Akino, T. Aoyagi, N. Ebisawa, Y. Fujiwara, N. Isozaki, A. Honda, T. Inoue, T. Itoh, M. Kawai, M. Kazawa, J. Koizumi, K. Miyamoto, N. Miyamoto, K. Mogaki, Y. Ohara, T. Ohga, Y. Okumura, H. Oohara, K. Ohshima, F. Satoh, H. Seki, T. Takenouchi, Y. Toyokawa, K. Usui, K. Watanabe, M. Yamamoto, T. Yamazaki</i>	693

General design of the neutral beam injection system and integration with ITER <i>A. Krylov, E. Di Pietro, M. Hanada, R. Hemsworth, C. Holloway, S. Stoner, E. Alexandrov, M. Barinov, E. Dlougach, V. Kulygin, V. Naumov, A. Panasenkov, V. Petrov, Y. Fujiwara, T. Inoue, K. Miyamoto, N. Miyamoto, Y. Ohara, Y. Okumura, K. Shibata, M. Tanii, K. Watanabe, J.-H. Feist, B. Heinemann, E. Kussel, P. Lotte, P. Massmann, J. Paméla, M. Watson</i>	697
Design and R&D of high power negative ion source/accelerator for ITER NBI <i>T. Inoue, Y. Okumura, Y. Fujiwara, K. Miyamoto, N. Miyamoto, Y. Ohara, K. Watanabe, B. Heinemann, M. Tanii</i>	701
Experimental results using the JET real time power control system <i>N.H. Zornig, H.E.O. Brelen, A. Browne, M.L. Browne, C. Gormezano, T. Dobbing, J.A. How, F.A. Jensen, T.T.C. Jones, F.B. Marcus, Q.A. King, F.G. Rimini, J.A. Romero, A.G.H. Sibley, F. Söldner, B.J.D. Tubbing</i>	705
E.C.R.H. system for TJ-II experiment <i>R. Martin, K. Likin, A. Fernández, M. Sorolla, A. Sánchez, C. del Río Bocio, N. Matveev</i>	709
Sliding contact tests at high RF current under vacuum <i>G. Agarici, B. Beaumont, L. Ladurelle, G. Lombard, P. Mollard, H. Kuus</i>	713
Section C: Plasma Engineering and Control	
Loads on the ITER in-vessel components from electromagnetic transients <i>S. Chiocchio, K. Ioki, M. Araki, P. Barabaschi, J.B. Bialek, V. Kokotvov, M. Roccella, R.S. Sayer, J. Wesley, D. Williamson</i>	719
3-D electromagnetic model and electromagnetic analysis of the ITER in-vessel components <i>M. Roccella, A. Capriccioli, M. Ferrari, M. Gasparotto, A. Pizzuto, S. Chiocchio, F. Lucca</i>	723
Modelling and analysis of plasma-first wall contact during vertical instabilities in Next-Step tokamaks with a 3D eddy current code <i>S. Fantechi, Y. Crutzen</i>	727
Control of the magnetic configuration in ITER <i>A. Portone, Y. Gribov, Y. Mitrishkin, P.L. Mondino, J. Wesley, R. Albanese, G. Ambrosino, D. Ciscato, E. Coccoresese, D. Humphreys, S. Jardin, A. Kavin, C. Kessel, J. Lister, D. Pearlstein, A. Pironti, I. Senda, M. Walker, D. Ward</i>	731
Modelling and engineering aspects of the plasma shape control in ITER <i>R. Albanese, G. Ambrosino, E. Coccoresese, J.B. Lister, A. Pironti, D.J. Ward</i>	735
Enhancement of the JET vacuum vessel supports <i>A. Miller, J.L. Hemmerich</i>	739

Effects of high frequency disruptions on the JET divertor cryopump, including potential JET toroidal field upgrades <i>S. Papastergiou, P. Ageladarakis</i>	743
Enhancement of JET machine instrumentation and coil protection systems <i>V. Marchese, T. Businaro, M. Buzio, E. De Marchi, N. Dolgetta, J. Howie, J. Last, T. Raimondi, L. Scibile, J. van Veen</i>	747
Present understanding of electromagnetic behaviour during disruptions in JET <i>P. Noll, P. Andrew, M. Buzio, R. Litunovsky, T. Raimondi, V. Riccardo, M. Verrecchia</i>	751
Axisymmetric and non-axisymmetric structural effects of disruption-induced electromechanical forces on the JET tokamak <i>M. Buzio, P. Noll, T. Raimondi, V. Riccardo, L. Sonnerup</i>	755
Scientific basis and engineering design to accommodate disruption and halo current loads for the DIII-D tokamak <i>P.M. Anderson, A.S. Bozek, M.A. Hollerbach, D.A. Humphreys, J.L. Luxon, E.E. Reis, M.J. Schaffer</i>	759
Effects of plasma behaviour on in-vessel components in JT-60 operation <i>H. Hiratsuka, T. Sasajima, K. Kodama, T. Arai, K. Masaki, Y. Neyatani, J. Yagyu, A. Kaminaga, M. Saidoh</i>	763
Numerical and experimental evaluation of halo currents in RFX plasma facing components <i>S. Peruzzo, A. Masiello, N. Pomaro, P. Sonato, G. Zollino</i>	767
Feasibility analysis of an active local field control at the poloidal gap of RFX <i>F. Bellina, G. Chitarin, P. Fiorentin, E. Gaio, G. Marchiori, P. Sonato, V. Toigo, P. Zaccaria, G. Zollino</i>	771
Eddy currents in the RFX shell after short-circuiting one poloidal and one equatorial gap <i>G. Chitarin, G. Marchiori, A. Masiello, N. Pomaro, G. Zollino</i>	775
Plasma-material interaction during high transient heat loads in fast probe experiments at TEXTOR <i>T. Scholz, A. Hassanein, H. Bolt, K.H. Finken, J. Linke</i>	779
Minimizing the first wall and blanket loading caused by plasma disruptions by tuning first wall's resistivity <i>T. Jordan, D. Schneider</i>	783
Joining technology and material and shape optimization for the ICRF vacuum transmission line dielectric window <i>P. Auerkari, L. Heikinheimo, J.A. Heikkinen, J. Linden, M. Kemppainen, K. Kotikangas, S. Nuutinen, S. Orivuori, M. Peräniitty, S. Saarelma, M. Sirén, S. Tähtinen, F. Wasastjerna, G. Bosia, E. Hodgson</i>	787

Design study on high Tc superconducting plasma stabilizer <i>T. Uchimoto, K. Miya</i>	791
Development of a precise long-time digital integrator for magnetic measurements in a tokamak <i>K. Kurihara, Y. Kawamata</i>	795
Section D: Experimental Systems	
Simulation of the magnetic field penetration in the structure material of the dynamic ergodic divertor coils of TEXTOR-94 <i>D. Styhler, M. Lindmayer, U. Braunsberger, B. Giesen, O. Neubauer</i>	801
Design of vacuum system and support structure for plasma facing components of SST1 tokamak <i>M.K. Bhise, P. Chaudhuri, D. Chenna Reddy, R. Gangradey, S. Jacob, S. Khirwadkar, C. Muralidaran, H.A. Pathak, E. Rajendra Kumar, T. Ranga Nath, N. Ravipragash, P. Sinha and SST1 Team</i>	805
Electromagnetics aspects in ITER: impact on magnet cryogenics, plasma diagnostics and control system <i>R. Albanese, G. Ambrosino, E. Coccoresse, R. Fresa, R. Martone, C. Morabito, A. Pironti, G. Reitano, G. Rubinacci</i>	809
Plasma engineering in the IGNITOR experiment <i>B. Coppi, R. Andreani, C. Ferro, M. Gasparotto, C. Rita, A. Pizzuto, M. Roccella, G. Cenacchi, A. Bianchi, G. Galasso, L. Lanzavecchia</i>	813
Design characteristics of KT-2 tokamak for advanced tokamak operation <i>B.G. Hong, S.H. Jeong, S.K. Kim</i>	817
Numerical simulation of plasma equilibrium and shape control in tight tokamak GLOBUS-M <i>A.A. Kavin, V.A. Belyakov, S.A. Bulgakov, Y.A. Kostsov, E.N. Rumyantsev, S.A. Galkin, L.M. Degtyarev, A.A. Ivanov, Y.Y. Poshekhonov, V.A. Yagnov</i>	821
Thermal and structural analysis of vacuum and in-vessel components for low aspect ratio tokamak Globus-M <i>V.A. Divavin, S.A. Grigoriev, A.V. Lipko, V.A. Bykov, V.N. Komarov, E.G. Kuzmin, I.A. Mironov</i>	825
Globus-M tokamak magnets <i>A.B. Alekseev, A.F. Arneman, V.A. Belyakov, S.A. Boulgakov, V.A. Bykov, V.A. Divavin, K.E. Egorov, S.A. Grigoriev, V.K. Gusev, A.A. Kavin, V.A. Korotkov, Y.M. Krivchenkov, E.G. Kuzmin, A.A. Malkov, A.G. Panin, N.V. Sakharov, V.F. Soikin</i>	829

- Joint upgraded spherical tokamak (JUST) and support installation – 2 MA spherical tokamak “Selena”: concept and status
E.A. Azizov, N.Ya. Dvorkin, O.G. Filatov, G.P. Gardymov, I.S. Garypov, V.E. Golant, V.A. Glukhikh, V.I. Iogansen, V.A. Iagnov, I.A. Kadi-Ogly, R.R. Khayrutdinov, V.V. Korshakov, V.K. Krylov, I.N. Leykin, V.E. Lukash, A.B. Mineev, G.E. Notkin, A.R. Polevoy, K.G. Shakhovets, S.V. Tsaun, E.P. Velikhov, N.I. Vinogradov, G.M. Vorobiev 833
- Application of seismic isolation for ITER
D. Dilling, C.E. Ahlfeld, P. Barabaschi, V. Chuyanov, K. Ishimoto, E. Tanaka 837
- Calorimetric measurements of energy deposition in TORE Supra
F. Surle, G. Mayaux, J.J. Cordier 841
- Application of FIR polarimetry for real-time density control on TEXTOR-94
H.R. Koslowski, B. Giesen, P. Hüttemann, H.T. Lambertz, K.P. Pelzer, W. Schalt, E. Zimmermann 845
- Engineering aspects of ITER plasma diagnostic systems
C.I. Walker, T. Ando, A. Costley, L. deKock, K. Ebisawa, G. Janeschitz, L. Johnson, V. Mukhovatov, G. Vayakis, M. Yamada, S. Yamamoto 849
- Tracer-encapsulated cryogenic pellet for particle transport diagnostics
S. Sudo, H. Itoh, K. Khlopenkov 853
- Experiment of 14MeV neutron induced luminescence on window materials
F. Sato, Y. Oyama, T. Iida, F. Maekawa, J. Datemichi, A. Takahashi, Y. Ikeda 857
- Status and characteristics of diagnostics on Korea superconducting tokamak research (KSTAR)
S.G. Lee, S.M. Hwang, H.Y. Chang, G.S. Lee, H.K. Park, J. Kim, D.I. Choi, S.G. Oh, K.K. Choh, J.H. Choi, J.W. Choi, Y.S. Chung, J.H. Han, J. Hong, B.C. Kim, W.C. Kim, Y.J. Kim, H.G. Lee, H.K. Na, Y.K. Oh, H.L. Yang, J.G. Yang, N.S. Yoon 861
- High performance drivers for fast sweep microwave reflectometry
L. Cupido, A. Silva, M.E. Manso, F. Serra 865
- Engineering aspects of an advanced heavy ion beam diagnostic for the TJ-II stellarator
A. Malaquias, C. Varandas, J.A.C. Cabral, L.I. Krupnik, S.M. Khrebtov, I.S. Nedzelskij, Yu.V. Trofimenko, A. Melnikov, C. Hidalgo, I. Garcia-Cortes 869
- Two-frequency correlation reflectometer
J. Fernandes, A. Silva, L. Cupido, M.E. Manso, P. Varela 873
- Plasma density profile evaluation in broadband reflectometry using a neural network
F.D. Nunes, J. Santos, M.E. Manso 877

Time resolved energy dispersive X-ray diagnostic for the TCV tokamak <i>J. Sousa, P. Amaro, P. Amorim, B. Duval, C.A.F. Varandas</i>	881
Experimental tests of an ion source for the diagnostic neutral beam injector of the TEXTOR tokamak <i>G.F. Abdrashitov, A.A. Ivanov, V.V. Mishagin, A.A. Podyminogin, A.I. Rogozin, I.V. Shikhovtsev</i>	885
Heavy ion beam probing for ITER <i>A.V. Melnikov, L.G. Zimeleva, K.N. Tarasyan, L.G. Eliseev, L.I. Krupnik, I.S. Nedzelskij, Yu.V. Trofimenko, Y. Hamada, H. Iguchi, K. Connor, T. Crowley, C.A.F. Varandas, A. Malaquias</i>	889
Remote sensing of a capacitance manometer pressure measurement head <i>A. Browne, D. Cooper, J.F. Davies, L. Hackett, L. Svensson, D. Young</i>	893
Engineering design of the JET edge Thomson scattering system <i>D.J. Wilson, P. Nielsen, C.W. Gowers, R.J. Eagle</i>	897
A PC based real-time imaging system for the TdeV tokamak <i>F. Meo, P. de Villers, F. Brunet, G. Ratel</i>	901
Design of an optimal control system for Tore Supra <i>S. Brémond, J.-M. Ané</i>	905
Evolution of the Tore Supra data acquisition system: towards the steady state <i>B. Guillerminet, D. Elbèze, J.F. Artaud, S. Balme, Y. Buravand, B. Couturier, L. Ducobu, B. Gagey, M. Leluyer, R. Masset, D. Moulin, B. Rothan, J. Signoret</i>	909
The Tore Supra control computer system: evolutions <i>E. Chatelier, F. Hennion, M. Hernandez, J.Y. Journeaux, P. Lebourg</i>	913
First results of the new plasma feed-back control for TORE-SUPRA <i>G. Martin, D. Moulin, D. van Houtte, T. Wijnands</i>	917
A data acquisition, control and visualization system for the upgraded TOSKA facility at FZK <i>A. Augenstein, H. Barthel, I. Donner, H. Frankrone, P. Gruber, G. Hellmann, P. Klingenstein, U. Padligur, K. Rietzschel, T. Specht, G. Würz</i>	921
Plasma regime guided discharge control at ASDEX Upgrade <i>T. Zehetbauer, P. Franzen, G. Neu, V. Mertens, G. Raupp, W. Treutterer, D. Zasche and ASDEX Upgrade Team</i>	925
Structure for next generation discharge control systems <i>G. Raupp, K. Lüddecke, G. Neu, W. Treutterer, D. Zasche, T. Zehetbauer and ASDEX Upgrade Team</i>	929

Plasma shape control design in ASDEX Upgrade <i>W. Treutterer, J. Gernhard, O. Gruber, P. McCarthy, G. Raupp, U. Seidel and ASDEX Upgrade Team</i>	933
The use of fuzzy curves for the reconstruction of the plasma shape and the selection of the magnetic sensors <i>F.C. Morabito, M. Versaci</i>	937
Measurement and control of error field driven magnetic islands in a tokamak reactor by electron cyclotron current drive <i>E. Lazzaro, S. Cirant, G. D'Antona, S. Nowak, G. Ramponi</i>	941
Design of central control and man-machine interface systems for large helical device <i>H. Yamada, K. Yamazaki, K.Y. Watanabe, S. Yamaguchi, K. Nishimura, Y. Taniguchi, H. Ogawa, N. Yamamoto, S. Sakakibara, M. Shoji, O. Motojima</i>	945
Real time control of the plasma boundary in JET <i>S. Puppin, M.E. Angoletta, D.J. Campbell, J.J. Ellis, M. Garribba, M. Lennholm, F. Milani, D. O'Brien, F. Sartori, R. Sartori</i>	949
Implementation and initial operation of an adaptive plasma density controller at JET <i>H.E.O. Brelén, T. Budd, J. Ehrenberg, M. Gadeberg, C. Ryle</i>	953
Real time software for the control and monitoring of DIII-D system interlocks <i>J.D. Broesch, B.G. Penafior, R.M. Coon, J.J. Harris, J.T. Scoville</i>	957
An introduction to FASTCAMAC (60 Megabytes/sec in CAMAC?) <i>S. Dhawan, C. Hubbard, T. Radway, R. Sumner</i>	961
A structured architecture for advanced plasma control experiments <i>B.G. Penafior, J.R. Ferron, M.L. Walker</i>	965
Availability analysis of five years of operation of the superconducting tokamak Tore Supra <i>D. van Houtte, B. de Gentile, C. Grisolia, J.Y. Journeaux, P. Joyer, J.M. Laurens, G. Martin, F. Parlange, T. Wijnands</i>	969
The Frascati Tokamak Upgrade machine: plant and operation status <i>S. Ciattaglia, B.M. Angelini, G. Buceti, F. Crisanti, F. Gravanti, G. Mazzitelli, M. Panella, E. Sternini, A. Tuccillo, V. Zanza</i>	973
Operation of the tokamak ISTTOK in an alternating current regime <i>H. Fernandes, H. Figueiredo, J. Sousa, C.J. Freitas, J.A.C. Cabral, C.A.F. Varandas</i>	977
Monitoring and digital control system for the 130 MVA pulse generator system of the Spanish Stellarator TJ-II <i>L. Kirpichev, L. Almoguera, M. Blaumoser, P. Mendez, L. Pacios, A. de la Peña, F. Lapayese, R. Carrasco, I. Labrador, A. Pérez, B. Alberdi, J.M. del Río, E. Jauregi</i>	981

Final assembly and present status of the Spanish Stellarator TJ-II <i>J. Botija, M. Blaumoser, J. Doncel, J.R. Knaster, J. Alonso and TJ-II Team</i>	985
Operational experience with the JET saddle coil system <i>A. Santagiustina, H. Altmann, M. Buzio, D.J. Campbell, R. Claesen, G. D'Antona, M. De Benedetti, A. Fasoli, G. Israel, R. Ostrom, S. Peruzzo, T. Raimondi, L. Rossi, F. Sartori, M. Tabellini, A. Tanga, G. Zullo</i>	989
Compatibility analysis of the magnet system of the KT-2 tokamak for long-pulse operation <i>K.W. Lee, J.M. Han, B.G. Hong, B.J. Yoon, Y.D. Bae, W.S. Song, D.E. Kim, N.S. Shin, J.E. Milburn</i>	993
