Superconductors

Transition temperatures and characterization of elements, alloys and compounds

Subvolume c: O (without cuprates) ... Sc

Introduction (R. FLÜKIGER, T. WOLF)	XI
1 Subject matter	XI
2 General remarks on the contents of subvolumes III/21a ... 21e	XI
3 Selection, arrangement and sequence of the specific data in the tables	XII
4 List of symbols and abbreviations	XIX
5 Alphabetical list of frequently used structure types	XXV
O (Oxygen) (H.L. LUO)	1
O based alloys and compounds	1
O–X–Y (X = Ag...Bi)	1
BaPb _{1-x} Bi _x O ₃ , bulk	1
– transition temperatures only	1
– specific heat data	2
– critical field data	3
– other physical properties	3
BaPb _{1-x} Bi _x O ₃ , films	5
Li _x Mo ₆ O ₁₇	7
K _x TaO ₃	7
TiO _x	7
Li _{1+x} Ti ₂ O ₄	8
SrTiO ₃	9
VO	9
M _x WO ₃	9
Os (Osmium) (T.S. RADHAKRISHNAN, N. KANER)	12
Os element, bulk	12
– transition temperatures only	12
– specific heat data	12
– critical field data	12
– other physical properties	13
Os element under pressure	13
Os based alloys and compounds	13
P (Phosphorus) (F. WEISS)	20
P element under pressure	20
P based alloys and compounds	21

Pa (Protactinium) (T. Wolf)	28
Pa element, bulk	28
– transition temperatures only	28
– specific heat data	28
– critical field data	28
– other physical properties	28
Pa element under pressure	29
Pa based alloys and compounds	29
Pb (Lead) (D. YU, N. KANER)	29
Pb element, bulk	29
– transition temperatures only	29
– specific heat data	31
– critical field data	31
– other physical properties	34
Pb element under pressure	39
Pb element, bulk	41
– mechanical properties	41
– cavity, junctions, point contacts	44
Pb granular element	45
Pb films, deposited at $\leq 77\text{K}$	46
Pb films, deposited at $> 77\text{K}$	46
Pb films (deposition temperature not given)	47
– transition temperatures only	47
– specific heat data	50
– critical field data	50
– other physical properties	54
Pb layers	61
Pb/X layers and multilayers	62
Pb granular films	66
Pb cavity	67
Pb/ Al_2O_3 /Al junctions	68
– critical field data	68
– data under pressure	68
– other physical properties	69
Pb/ $\text{X}/\text{Al}_2\text{O}_3/\text{Al}$ junctions	71
Pb junctions with PbO barrier	72
Pb/ SnO_x/Sn junctions	75
Pb junctions with other barriers	75
Pb, implanted	76
Pb based alloys and compounds	77
Pd (Palladium) (T.S. RADHAKRISHNAN, N. KANER)	146
Pd films	146
Pd based alloys and compounds	147
Pm (Promethium)	155
Po (Polonium) (T. WOLF)	155
Po element	155

Pr (Praseodymium) (T. WOLF)	156
Pr element, bulk	156
– transition temperatures only	156
– specific heat data	156
– other physical properties	156
Pr element under pressure	156
Pr based alloys and compounds	156
Pt (Platinum) (T.S. RADHAKRISHNAN, N. KANER)	157
Pt element, bulk	157
– transition temperatures only	157
– other physical properties	157
Pt/X junctions	158
Pt based alloys and compounds	158
Pt–X–Y (X = Au...U)	158
UPt ₃	162
– transition temperatures only	162
– specific heat data	163
– critical field data	163
– other physical properties	165
UPt ₃ /X junctions	172
U _{1-x} X _x Pt ₃	172
U(Pt _{1-x} X _x) ₃	173
Pt–X–Y (X = U...Y)	175
Pu (Plutonium) (T. WOLF)	176
Pu element, bulk	176
– transition temperatures only	176
– specific heat data	177
– other physical properties	177
Pu element under pressure	177
Pu dilute alloys	178
Pu based alloys and compounds	178
Ra (Radium)	179
Rb (Rubidium) (T. WOLF)	180
Rb element	180
Rb element under pressure	180
Rb based alloys and compounds	180
Re (Rhenium) (T.S. RADHAKRISHNAN)	181
Re element, bulk	181
Re element, film	181
Re based alloys and compounds	181
Rh (Rhodium) (T.S. RADHAKRISHNAN, N. KANER)	184
Rh element	184
Rh based alloys and compounds	184
Rn (Radon)	188

Ru (Ruthenium) (T.S. RADHAKRISHNAN)	189
Ru element	189
Ru based alloys and compounds	189
S (Sulfur) (R. MÜLLER, R.N. SHELTON, N. KANER)	194
S element	194
S based alloys and compounds	194
S-X-Y (X = Cr...Mo)	194
X _x Mo ₆ S ₈ (Chevrel phases)	199
S-X-Y (X = Nb...Ta)	223
TaS ₂ with organic intercalate	231
S-X-Y (X = Th...Zr)	235
Sb (Antimony) (F. HULLIGER)	237
Sb element, bulk	237
– transition temperatures only	237
– other physical properties	238
Sb/X junctions	238
Sb based alloys and compounds	238
Sc (Scandium) (T. WOLF)	244
Sc element	244
Sc element under pressure	244
Sc based alloys and compounds	245
References	249
Author index	291
