

Contents

Introduction to microwave sources	1
<i>Alan Phelps</i>	
Spontaneous and Stimulated Radiation of Classical Electrons	9
<i>M Petelin</i>	
High gain free electron laser with waveguide	29
<i>Rodolfo Bonifacio</i>	
Computer Modelling of Microwave Sources	57
<i>James W Eastwood</i>	
Gyro-Amplifiers	103
<i>Monica Blank</i>	
Vacuum Microelectronics for Microwave Power Amplifiers	109
<i>M Garven and R K Parker</i>	
Modes and Mode Conversion in Microwave Devices	121
<i>Manfred Thumm</i>	
Klystrons and related devices	173
<i>Georges Faillon</i>	
Cyclotron Resonance Effects on a Rectilinear Electron Beam for the Generation of High-Power Microwaves	183
<i>J L Vomvoridis</i>	
Interaction of Radiation with Plasmas	201
<i>R A Cairns</i>	
Uses of Intense Microwaves in Tokamaks	219
<i>N J Fisch</i>	
The Physics of Ion Cyclotron Heating In Tokamaks	237
<i>Marco Brambilla</i>	
RF systems for heating and current drive	275
<i>C Gormezano</i>	
Applications of High-Power Microwave Devices	305
<i>Manfred Thumm</i>	
Participants Addresses	325
Index	331
