

Contents

1. Introduction	1
2. Femtosecond Real-Time Spectroscopy	9
2.1 Experimental Basics	9
2.1.1 Setup for the Real-Time MPI Experiments	9
2.1.2 Setup for the Real-Time Charge Reversal (NeNePo) Experiments	33
2.2 A Few Basics on the Theoretical Approach to Real-Time Spectroscopy	40
2.2.1 Theoretical Analysis of Wave Packet Propagation	40
2.2.2 Simple Decay Models for Ultrafast Photodissociation .	43
2.2.3 Theoretical Description of Ultrafast Structural Relaxation	46
3. Wave Packet Propagation	49
3.1 Femtosecond Wave Packet Propagation Phenomena in Excited Alkali Dimers	51
3.1.1 K_2 A State at Moderate Laser Intensities	52
3.1.2 K_2 A State for Different Pump&Probe Cycles	56
3.1.3 Spin-Orbit Coupled Electronic States: the Isotopes $^{39,39}K_2$ and $^{39,41}K_2$	63
3.1.4 Spin-Orbit Coupled Electronic States of Na_2	75
3.1.5 Multiphoton Ionization Processes in K_2 : from Pump&Probe to Control	83
3.1.6 Fractional Revivals of Vibrational Wave Packets in the NaK $A^1\Sigma^+$ State	93
3.2 Ultrafast Wave Packet Propagation Phenomena in Excited Alkali Trimers	101
3.2.1 Brief Review of Spectroscopy of the Sodium Trimer ...	103
3.2.2 Real-Time Spectroscopy of Na_3 B	105
3.2.3 3d Approach to the Wave Packet Dynamics of the Na_3 B State	110
3.2.4 Pulse-Width-Controlled Molecular Dynamics	115
3.2.5 The Dissociative K_3 Molecule	123

4. Ultrafast Photodissociation	131
4.1 Predissociation of Na ₃ C State	133
4.2 Excited D State of Na ₃ Molecules	139
4.3 Small Sodium Clusters	143
4.4 Small Potassium Clusters	148
5. Ultrafast Structural Relaxation	155
5.1 Charge Reversal Process in Ag ₃ Molecules	156
5.2 Small Silver Clusters	165
6. Summary and Forward View	171
6.1 Summary	171
6.1.1 Wave Packet Propagation in Alkali Dimers	172
6.1.2 Wave Packet Propagation in Alkali Trimers	174
6.1.3 Ultrafast Photodissociation in Small Alkali Clusters ..	174
6.1.4 Ultrafast Structural Relaxation in Small Silver Clusters	175
6.2 Forward View	176
