<b>Preface .....</b>	<b>xiii</b>
<b>Introduction .....</b>	<b>xv</b>
<i>Stephen M. Shafrroth, James C. Austin, and Eugen Merzbacher</i>	
<b>1 Applications of High-Performance Multicharged Ion Sources .....</b>	<b>1</b>
<i>H. P. Winter</i>	
1.1 Introduction .....	1
1.2 Working principles of high-performance MCIS .....	2
1.3 Experimental applications of slow MCI beams .....	8
1.4 Summary .....	29
Acknowledgments .....	30
References .....	30
<b>2 ECR Ion Sources .....</b>	<b>33</b>
<i>Gérard Melin and Alain Girard</i>	
2.1 Introduction .....	33
2.2 Basic principles of ECRIS operation .....	35
2.3 Atomic physics and plasma effects—ECRIS modeling .....	43
2.4 Design and performance of existing ECRIS .....	56
2.5 Prospects for development of ECRIS .....	62
Acknowledgments .....	64
References .....	64
<b>3 The Operation of Electron Beam Ion Sources for Atomic Physics .....</b>	<b>67</b>
<i>Martin P. Stöckli</i>	
3.1 Introduction .....	67
3.2 Evolution of charge states .....	70
3.3 Ion confinement .....	81
3.4 Ion expulsion .....	84

3.5 Injection of seed particles .....	103
Acknowledgments .....	111
References .....	111
<b>4 Merged Beams with Multicharged Ions .....</b>	<b>117</b>
<i>C. C. Havener</i>	
4.1 Early merged beams .....	117
4.2 Merged-beams technique .....	120
4.3 ORNL merged-beams measurements .....	135
4.4 The future of the ORNL merged beams .....	141
Acknowledgments .....	142
References .....	142
<b>5 Heavy Ion Storage Rings .....</b>	<b>147</b>
<i>Alfred Müller and Andreas Wolf</i>	
5.1 Introduction .....	147
5.2 Construction and performance of storage rings .....	148
5.3 Storage ring experiments: special techniques and examples .....	163
5.4 Conclusion .....	173
Acknowledgments .....	174
Annotated Suggested Readings .....	175
References .....	176
<b>6 Relativistic Neutral Hydrogen Beams .....</b>	<b>183</b>
<i>H. C. Bryant and Edward P. MacKerrow</i>	
6.1 Introduction .....	183
6.2 Production by photodetachment .....	185
6.3 Production by stripping with thin foils .....	195
6.4 Production by field stripping .....	197
6.5 Production by novel methods .....	199
6.6 Beam cooling by resonance production .....	200
6.7 Diagnostics .....	203
6.8 Conclusion .....	209
Acknowledgments .....	209
References .....	210
<b>7 Neutral Beam-Atom Collisions Resulting in Electron Cusps .....</b>	<b>215</b>
<i>Dénes Berényi</i>	
7.1 Introduction .....	215
7.2 Production of the beam of neutral projectiles .....	217
7.3 The interaction zone .....	219
7.4 Electron analyzers .....	220
7.5 Ion and atom detection and separation .....	221
7.6 Coincidence arrangements .....	223

7.7	Corrections, elimination of disturbing factors and uncertainties .....	224
7.8	Data analysis .....	225
7.9	Results on the cusp in the spectrum of electrons emitted in neutral projectile-atom collisions .....	226
7.10	Future prospects .....	231
	Acknowledgments .....	231
	References .....	232
<b>8</b>	<b>Bremsstrahlung and K X-Ray Production by Electron Bombardment of Thin-film and Gas Targets .....</b>	<b>237</b>
	<i>C. A. Quarles</i>	
8.1	Introduction .....	237
8.2	Current experimental techniques in photon energy spectrum measurements from thin targets .....	243
8.3	Development of a physical model for the photon energy spectrum .....	253
8.4	Discussion of typical results: comparison of model and data .....	259
8.5	Beyond the photon energy spectrum: coincidence experiments .....	269
8.6	Conclusions .....	273
	Acknowledgments .....	275
	References .....	275
<b>9</b>	<b>Parametric X Rays .....</b>	<b>279</b>
	<i>Alexander V. Shchagin and Xavier K. Maruyama</i>	
9.1	Introduction .....	279
9.2	PXR from a single crystal .....	284
9.3	PXR from a mosaic crystal .....	303
9.4	Possibilities for PXR applications .....	304
	Acknowledgments .....	305
	References .....	305
<b>10</b>	<b>Hard X-Ray Microbeam Production and Application .....</b>	<b>309</b>
	<i>P. Chevallier and P. Dhez</i>	
10.1	Introduction .....	309
10.2	Microbeam production .....	311
10.3	X-ray microprobes .....	325
10.4	Conclusion .....	342
	Acknowledgments .....	342
	References .....	343
<b>11</b>	<b>Study of the Interaction of Highly Charged Ions with Surfaces by X-Ray Spectroscopy of Hollow Atoms .....</b>	<b>349</b>
	<i>G. Giardino and J. P. Briand</i>	
11.1	Introduction .....	349

<b>11.2 Hollow atoms .....</b>	<b>350</b>
<b>11.3 X-ray spectroscopy of hollow atoms .....</b>	<b>356</b>
<b>11.4 X-ray study of fully decelerated highly charged ions on surfaces.....</b>	<b>364</b>
<b>References .....</b>	<b>374</b>
<b>12 Auger Electron Spectroscopy of Target Atoms .....</b>	<b>377</b>
<i>B. Sulik and N. Stolterfoht</i>	
<b>12.1 Introduction .....</b>	<b>377</b>
<b>12.2 The Auger effect.....</b>	<b>381</b>
<b>12.3 Experimental method and apparatus .....</b>	<b>385</b>
<b>12.4 Experimental studies .....</b>	<b>404</b>
<b>Acknowledgments .....</b>	<b>419</b>
<b>References .....</b>	<b>420</b>
<b>13 Zero-Degree Auger Electron Spectroscopy of Projectile Ions .....</b>	<b>427</b>
<i>Theo J. M. Zouros and Do-Hyung Lee</i>	
<b>13.1 Introduction .....</b>	<b>427</b>
<b>13.2 Principles of projectile Auger electron spectroscopy .....</b>	<b>430</b>
<b>13.3 Experimental set-up .....</b>	<b>443</b>
<b>13.4 Data analysis-selected topics .....</b>	<b>452</b>
<b>13.5 Practical applications .....</b>	<b>458</b>
<b>13.6 State-selective cross section measurements .....</b>	<b>462</b>
<b>13.7 Future prospects .....</b>	<b>473</b>
<b>Acknowledgments .....</b>	<b>474</b>
<b>References .....</b>	<b>474</b>
<b>14 Molecular Imaging with Fast Ion Beams .....</b>	<b>481</b>
<i>Daniel Zajfman and Oded Heber</i>	
<b>14.1 Introduction .....</b>	<b>481</b>
<b>14.2 Molecular dissociation processes .....</b>	<b>482</b>
<b>14.3 Experimental principles .....</b>	<b>486</b>
<b>14.4 Detection procedure .....</b>	<b>491</b>
<b>14.5 Examples .....</b>	<b>497</b>
<b>14.6 Summary .....</b>	<b>505</b>
<b>Acknowledgments .....</b>	<b>506</b>
<b>References .....</b>	<b>506</b>
<b>15 Fragment-Fragment Coincidence Methods for Mean Lifetime Measurements of Doubly Charged Molecular Ions .....</b>	<b>509</b>
<i>B. Rosner, I. Gertner, and I. Ben-Itzhak .....</i>	
<b>15.1 Introduction .....</b>	<b>509</b>
<b>15.2 Experimental techniques .....</b>	<b>514</b>
<b>15.3 Short-lived molecular ions .....</b>	<b>526</b>
<b>15.4 Long-lived molecular ions .....</b>	<b>530</b>

15.5 Future developments .....	536
Acknowledgments .....	537
References .....	537
<b>16 Angular Distribution of Auger Transitions in Oriented Molecular Ions .....</b>	<b>541</b>
<i>R. M. Wood and A. K. Edwards</i>	
16.1 Introduction .....	541
16.2 Experimental technique .....	545
16.3 Results and analysis .....	556
16.4 Future measurements .....	564
References .....	565
<b>17 Radiative-Lifetime Measurements on Highly Charged Ions .....</b>	<b>567</b>
<i>Elmar Träbert</i>	
17.1 Introduction: Why measure atomic lifetimes? .....	567
17.2 Historical note .....	569
17.3 Properties of the beam-foil light source .....	571
17.4 Spectroscopic techniques .....	574
17.5 Lifetimes .....	576
17.6 Equipment .....	584
17.7 Lifetime measurements with foils: technical problems .....	591
17.8 Decay curve analysis .....	597
17.9 Achievements and outlook .....	599
References .....	604
<b>18 Laser Excitation of Fast Atomic Beams for Precision Lifetime Measurements .....</b>	<b>609</b>
<i>C. E. Tanner</i>	
18.1 Introduction .....	609
18.2 Generation of fast atomic beams .....	612
18.3 Laser excitation schemes .....	618
18.4 Detection .....	625
18.5 Velocity measurement techniques .....	628
18.6 Data collection and analysis .....	631
18.7 Summary .....	633
Acknowledgments .....	634
References .....	634
<b>19 Generation of Slow Positron Beams with ORELA .....</b>	<b>637</b>
<i>Lester D. Hulett, Jr., T. A. Lewis, and Jun Xu</i>	
19.1 Introduction .....	637
19.2 Generation and transport of the positron beam .....	638
Acknowledgments .....	647
References .....	647

<b>20 Ion Bombardment Induced Light Emission .....</b>	<b>649</b>
<i>D. Ghose and R. Hippler</i>	
20.1 Introduction .....	649
20.2 Mechanisms of light emission phenomena from sputtered atoms .....	651
20.3 Experimental arrangement .....	656
20.4 Experimental observations .....	658
20.5 Applications to surface analysis .....	671
20.6 Future prospects .....	672
References .....	673
<b>21 Accelerator-Based Rydberg Atom Collision Experiments .....</b>	<b>677</b>
<i>Brett DePaola</i>	
21.1 Introduction .....	677
21.2 Rydberg atom and ion preparation .....	678
21.3 Target Rydberg detection .....	681
21.4 Projectile Rydberg detection .....	686
21.5 New trends: elliptical Rydberg production .....	692
References .....	696
<b>22 Collision Spectroscopy of Multiply Charged Recoil Ions in Collisions with Atomic Targets .....</b>	<b>699</b>
<i>Emanuel Y. Kamber</i>	
22.1 Introduction .....	699
22.2 Experimental technique .....	700
22.3 Theoretical considerations .....	705
22.4 Experimental results .....	712
22.5 Conclusions .....	720
22.6 Additional Reading .....	720
References .....	721
<b>23 Cold Target Recoil Ion Momentum Spectroscopy .....</b>	<b>723</b>
<i>H. Schmidt-Böcking, M. Achler, I. Ali, H. Bräuning, C. L. Cocke, R. Dörner, O. Jagutzki, T. Kambara, Kh. Khayyat, V. Mergel, R. Moshammer, M. H. Prior, L. Spielberger, W. Schmitt, K. Ullmann-Pfleger, M. Unverzagt, J. Ullrich, and W. Wu</i>	
23.1 Introduction .....	724
23.2 Recoil ion kinematics .....	725
23.3 Experimental set-up .....	729
23.4 Experimental results and discussion .....	735
23.5 Outlook and perspectives .....	742
Acknowledgments .....	743
References .....	743
<b>Index .....</b>	<b>747</b>
