

CONTENTS

Introduction	vii
The 3D Stokes Systems in Domains with Conical Boundary Points <i>P. Deuring</i>	1
Weighted Estimates for the Oseen Equations and the Navier–Stokes Equations in Exterior Domains <i>R. Farwig and H. Sohr</i>	11
On Boundary Zero Controllability of the Three-Dimensional Navier–Stokes Equations <i>A. V. Fursikov</i>	31
Nonhomogeneous Navier–Stokes Problems in L_p Sobolev Spaces over Exterior and Interior Domains <i>G. Grubb</i>	46
L^p -Decay Rates for Strong Solutions of a Perturbed Navier–Stokes System in $\mathbb{R}^3$ <i>H.Ch. Grunau</i>	64
On Two-Dimensional Equations of Thermal Convection in the Presence of the Dissipation Function <i>Y. Kagei</i>	72
Exterior Problem for the Navier–Stokes Equations, Existence, Uniqueness and Stability of Stationary Solutions <i>H. Kozono and M. Yamazaki</i>	86
On Decay Properties of Solutions to Stokes System in Exterior Domains <i>P. Maremonti and V.A. Solonnikov</i>	99
Compactness of Steady Compressible Isentropic Navier–Stokes Equations via the Decomposition Method (the Whole 3-D Space) <i>A. Novotny</i>	106
A Note on a Vector Transport Equation with Applications to Non-Newtonian Fluids <i>M. Padula and A. Sequeira</i>	121

Convergence Rates in $H^{2,\tau}$ of Rothe's Method to the Navier–Stokes Equations	127
<i>R. Rautmann</i>	
On Equilibria in the Interaction of Fluids and Elastic Solids	136
<i>M. Rumpf</i>	
Regularity for Steady Solutions of the Navier–Stokes Equations	159
<i>M. Růžička and J. Frehse</i>	
Decay of Non-Oscillating Solutions to the Magneto-Hydrodynamic Equations	179
<i>M. E. Schonbek</i>	
The Stokes Problem for Exterior Domains in Homogeneous Sobolev Spaces	185
<i>H. Sohr and M. Specovius-Neugebauer</i>	
Boundary Value Problems and Integral Equations for the Stokes Resolvent in Bounded and Exterior Domains of $\mathbb{R}^n$	206
<i>W. Varnhorn</i>
