Foreword	1
A Conversation with Hirotugu Akaike	3
List of Publications of Hirotugu Akaike	17
Papers	
1. Precursors	
1. On a zero-one process and some of its applications	29
2. On a successive transformation of probability distribution and its application to the analysis of the optimum gradient method	37
2. Frequency Domain Time Series Analysis	
1. Effect of timing-error on the power spectrum of sampled-data	53
2. On a limiting process which asymptotically produces f^{-2} spectral density	75
3. On the statistical estimation of frequency response function	81
3. Time Domain Time Series Analysis	
1. On the use of a linear model for the identification of feedback systems	115
2. Fitting autoregressive models for prediction	131
3. Statistical predictor identification	137
4. Autoregressive model fitting for control	153
5. Statistical approach to computer control of cement rotary kilns	171
6. Statistical identification for optimal control of supercritical thermal power plants	185
4. AIC and Parametrization	
1. Information theory and an extension of the maximum likelihood principle	199
2. A new look at the statistical model identification	215
3. Markovian representation of stochastic processes and its application to the analysis of autoregressive moving average processes	223
4. Covariance matrix computation of the state variable of a stationary Gaussian process	249

5. Analysis of cross classified data by AIC	255
6. On linear intensity models for mixed doubly stochastic Poisson and self-exciting point processes	269
5. Bayesian Approach	
1. A Bayesian analysis of the minimum AIC procedure	275
2. A new look at the Bayes procedure	281
3. On the likelihood of a time series model	289
4. Likelihood and the Bayes procedure	309
5. Seasonal adjustment by a Bayesian modeling	333
6. A quasi Bayesian approach to outlier detection	347
7. On the fallacy of the likelihood principle	357
8. A Bayesian approach to the analysis of earth tides	361
9. Factor analysis and AIC	371
6. General Views on Statistics	
1. Prediction and entropy	387
2. Experiences on the development of time series models	411
3. Implications of informational point of view on the development of statistical science	421
Index	433
