

Contents

Preface	v
List of Contributors	ix
Chapter 1. Models of Atomic Diffusion <i>Roger J. Elliott</i>	1
Chapter 2. A Theory of Glass Formation <i>Richard Kerner</i>	25
Chapter 3. Structural and Vibrational Properties of B_2O_3 and Related Glasses <i>Rafael A. Barrio</i>	86
Chapter 4. Properties of Borate Glasses Structure, Vibrational Properties and Transport Experimental Approach <i>M. Massot</i>	132
Chapter 5. Theory of Atomic Diffusion Across Interfaces <i>Jack Deppe</i>	207
Chapter 6. Applications of Superionic Conductors in Microbatteries and Elsewhere <i>Minko Balkanski</i>	239
Index	297
