

CONTENTS OF VOLUME 3

INERTIAL CONFINEMENT 1 (Session B1)

High energy density physics research using laser and pulsed power ICF facilities (IAEA-CN-64/B1-1)	3
<i>C.J. Keane et al.</i>	
Recent progress of laser fusion research with the GEKKO lasers at ILE, Osaka (IAEA-CN-64/B1-2)	13
<i>K. Mima et al.</i>	
The first year of ICF experiments at the OMEGA laser facility (IAEA-CN-64/B1-3)	31
<i>T.R. Boehly et al.</i>	
Progress on the physics of ignition for radiation driven inertial confinement fusion (ICF) targets (IAEA-CN-64/B1-4)	43
<i>J.D. Lindl, M.M. Marinak</i>	
Progress on laser megajoule targets physics studies at CEA Limeil-Valenton PHEBUS and NOVA experiments (IAEA-CN-64/B1-5)	57
<i>CEA Limeil-Valenton ICF Team</i>	

INERTIAL CONFINEMENT 2 (Session B2)

Inertial confinement fusion research at Imperial College (IAEA-CN-64/B2-3)	69
<i>O. Willi et al.</i>	
Experiments on indirect/direct hybrid drive scheme (IAEA-CN-64/B2-4) ..	79
<i>H. Shiraga et al.</i>	
Approaches to fast ignition in inertial confinement fusion at ILE, Osaka (IAEA-CN-64/B2-6)	85
<i>Y. Kato et al.</i>	
Progress in the pulsed power inertial confinement fusion program (IAEA-CN-64/B2-7)	95
<i>J.P. Quintenz et al.</i>	

INERTIAL CONFINEMENT (Poster Session BP)

Effects of preheat and irradiation non-uniformities on radiatively driven shock waves (IAEA-CN-64/BP-1)	107
<i>T. Löwer et al.</i>	

EDITORIAL NOTE

The Proceedings have been edited by the editorial staff of the IAEA to the extent considered necessary for the reader's assistance. The views expressed remain, however, the responsibility of the named authors or participants. In addition, the views are not necessarily those of the governments of the nominating Member States or of the nominating organizations.

Although great care has been taken to maintain the accuracy of information contained in this publication, neither the IAEA nor its Member States assume any responsibility for consequences which may arise from its use.

The use of particular designations of countries or territories does not imply any judgement by the publisher, the IAEA, as to the legal status of such countries or territories, of their authorities and institutions or of the delimitation of their boundaries.

The mention of names of specific companies or products (whether or not indicated as registered) does not imply any intention to infringe proprietary rights, nor should it be construed as an endorsement or recommendation on the part of the IAEA.

The authors are responsible for having obtained the necessary permission for the IAEA to reproduce, translate or use material from sources already protected by copyrights.

Material prepared by authors who are in contractual relation with governments is copyrighted by the IAEA, as publisher, only to the extent permitted by the appropriate national regulations.

Inertial fusion target studies: Heavy-ion target design and fast ignitor physics (IAEA-CN-64/BP-2)	115
<i>S. Atzeni et al.</i>	
Development of high power KrF laser for fundamental research of IFE driver and laser-plasma interaction (IAEA-CN-64/BP-3)	123
<i>Naiyan Wang et al.</i>	
Angara-5 programme: Development of bright X ray sources for inertial confinement fusion based on superfast imploding plasma — ‘Cold start’ and plasma compact implosion problem (IAEA-CN-64/BP-4)	129
<i>E.V. Grabovskij et al.</i>	
Suppression of hydrodynamic instabilities in laser ablated thin solid target — An experimental study (IAEA-CN-64/BP-5)	137
<i>T. Desai et al.</i>	
Heavy ion fusion driver research at Berkeley and Livermore (IAEA-CN-64/BP-6)	145
<i>P. Seidl et al.</i>	
Diagnostics for high density implosions at the National Ignition Facility (IAEA-CN-64/BP-8)	153
<i>M.D. Cable et al.</i>	
Theoretical studies on uniformity and stability in direct drive laser fusion (IAEA-CN-64/BP-9)	161
<i>K. Nishihara et al.</i>	
Development of plasma layering technique for cryogenic laser fusion target (IAEA-CN-64/BP-10)	171
<i>T. Norimatsu et al.</i>	
Laser scattering in large scale length plasmas relevant to National Ignition Facility hohlraums (IAEA-CN-64/BP-11)	181
<i>B.J. MacGowan et al.</i>	
The cryogenic target handling system for the OMEGA laser (IAEA-CN-64/BP-13)	187
<i>N.B. Alexander et al.</i>	
Self-pinch transport for ion beam driven inertial confinement fusion (IAEA-CN-64/BP-14)	195
<i>C.L. Olson et al.</i>	
A solution to the problems of proton-boron fusion (IAEA-CN-64/BP-16)	203
<i>S. Eliezer et al.</i>	
Direct drive experiments using the Nike laser (IAEA-CN-64/BP-17)	209
<i>S.E. Bodner et al.</i>	
Super-ASHURA KrF laser programme at ETL (IAEA-CN-64/BP-18)	215
<i>Y. Owadano et al.</i>	

Hydrodynamic instability experiments at GEKKO XII (IAEA-CN-64/BP-19)	223
<i>H. Azechi et al.</i>	
Hydrodynamic instability experiments on the Nova laser (IAEA-CN-64/BP-20)	233
<i>B.A. Remington et al.</i>	

HEATING AND CURRENT DRIVE (Session E)

Fast wave heating and current drive in DIII-D in discharges with negative central shear (IAEA-CN-64/E-1)	243
<i>R. Prater et al.</i>	
Application of LHCD to sustainment and control of a reversed magnetic shear plasma in JT-60U (IAEA-CN-64/E-3)	253
<i>S. Ide et al.</i>	
Long pulse RF experiments on Tore Supra: Results and simulations (IAEA-CN-64/E-4)	265
<i>Y. Peysson et al.</i>	
Additional heating and reversed magnetic shear in the FTU tokamak (IAEA-CN-64/E-5)	283
<i>F. Alladio et al.</i>	
ICRF heating and TAE modes in reactor relevant JT-60U discharges (IAEA-CN-64/E-6)	295
<i>H. Kimura et al.</i>	

HEATING AND CURRENT DRIVE (Poster Session EP)

ICRF heating scenarios in Alcator C-Mod (IAEA-CN-64/EP-1)	309
<i>P.T. Bonoli et al.</i>	
ICRF heating and current drive experiments on TFTR (IAEA-CN-64/EP-2)	317
<i>J.H. Rogers et al.</i>	
Experimental observation of RF driven plasma flow in the Phaedrus-T tokamak (IAEA-CN-64/EP-3)	327
<i>S. Wukitch et al.</i>	
ICRF heating results in ASDEX Upgrade and W7-AS (IAEA-CN-64/EP-4)	335
<i>J.-M. Noterdaeme et al.</i>	
Lower hybrid current drive and antenna coupling experiments on TdeV (IAEA-CN-64/EP-5)	343
<i>A. Côté et al.</i>	

Ultra-long tokamak discharge by lower hybrid current drive on TRIAM-1M (IAEA-CN-64/EP-6)	351
<i>S. Itoh et al.</i>	
A successful method to promote current drive efficiency on the HT-6M tokamak (IAEA-CN-64/EP-7)	359
<i>F.X. Yin et al.</i>	
Recent results on electron cyclotron current drive and MHD activity in RTP (IAEA-CN-64/EP-8)	365
<i>A.J.H. Donn�e et al.</i>	
Local current profile modification in tokamak reactors in various radiofrequency ranges (IAEA-CN-64/EP-9)	373
<i>O. Dumbrajs et al.</i>	

REACTOR STUDIES (Session G1)

Assessment of tokamak plasma operation modes as fusion power plants: The Starlite study (IAEA-CN-64/G1-1)	383
<i>F. Najmabadi, ARIES Team</i>	
The spherical torus approach to magnetic fusion development (IAEA-CN-64/G1-2)	395
<i>R.D. Stambaugh et al.</i>	
The Helias reactor (IAEA-CN-64/G1-4)	407
<i>C.D. Beidler et al.</i>	
Design assessment of heliotron reactor (IAEA-CN-64/G1-5)	421
<i>K. Yamazaki et al.</i>	

TECHNOLOGY AND NEW DEVICES (Session G2)

Conceptual design of the International Fusion Materials Irradiation Facility (IFMIF) (IAEA-CN-64/G2-2)	437
<i>T.E. Shannon et al.</i>	
Design progress of JT-60SU (IAEA-CN-64/G2-3)	451
<i>M. Kikuchi et al.</i>	
Superconducting magnet design and construction of Large Helical Device (IAEA-CN-64/G2-4)	467
<i>O. Motojima et al.</i>	

TECHNOLOGY, NEW DEVICES AND REACTOR STUDIES (Poster Session GP)

Development of innovative fuelling systems for fusion energy science (IAEA-CN-64/GP-2)	481
<i>M.J. Gouge et al.</i>	

The U.S. program to develop structural materials for near- and long-term fusion systems (IAEA-CN-64/GP-3)	489
<i>A.F. Rowcliffe et al.</i>	
Development of low activation ferritic and martensitic steels for fusion reactors (IAEA-CN-64/GP-4)	499
<i>A. Kohyama et al.</i>	
Progress in radiation effect studies of low activation vanadium alloys for fusion (IAEA-CN-64/GP-5)	507
<i>H. Matsui et al.</i>	
Deuterium-tritium neutron activation experiments at TFTR (IAEA-CN-64/GP-6)	517
<i>A. Kumar et al.</i>	
Reduction of erosion yield of graphite materials under high flux beam irradiation (IAEA-CN-64/GP-7)	525
<i>Y. Ueda et al.</i>	
Study on the application of high Tc superconductors to improve the positional stability of tokamak plasmas (IAEA-CN-64/GP-8)	531
<i>T. Uchimoto et al.</i>	
Development of negative ion based neutral beam injector for the Large Helical Device (IAEA-CN-64/GP-9)	539
<i>O. Kaneko et al.</i>	
Production of multi MW deuterium negative ion beams for neutral beam injectors (IAEA-CN-64/GP-10)	547
<i>K. Miyamoto et al.</i>	
A compact W-shaped pumped divertor concept for JT-60U (IAEA-CN-64/GP-11)	555
<i>N. Hosogane et al.</i>	
High heat flux experiments on a saddle shaped divertor mock-up (IAEA-CN-64/GP-12)	565
<i>S. Suzuki et al.</i>	
SINGAP acceleration of high energy negative ion beams (IAEA-CN-64/GP-13)	571
<i>P. Massmann et al.</i>	
The Ignitor experiment and its perspectives (IAEA-CN-64/GP-14)	579
<i>B. Coppi et al.</i>	
Basic properties of the GLOBUS-M spherical tokamak project (IAEA-CN-64/GP-15)	591
<i>V.E. Golant et al.</i>	
Inertial fusion energy development approaches for direct and indirect drive (IAEA-CN-64/GP-16)	601
<i>B.G. Logan et al.</i>	

Development of laser fusion power plant KOYO — System optimization and development of key technologies (IAEA-CN-64/GP-17)	607
<i>S. Nakai et al.</i>	
High density, high magnetic field concepts for compact fusion reactors (IAEA-CN-64/GP-18)	619
<i>L.J. Perkins et al.</i>	
Conceptual design of a 2 MJ KrF laser fusion facility (IAEA-CN-64/GP-19)	627
<i>M.W. McGeoch et al.</i>	
Stabilization of the resistive shell mode in fusion reactors (IAEA-CN-64/GP-20)	637
<i>R. Fitzpatrick</i>	
Ignition and burn in electric tokamaks at low magnetic fields (IAEA-CN-64/GP-21)	643
<i>R.J. Taylor et al.</i>	
Steady state lithium plasma and liquid lithium divertor experimental validation (IAEA-CN-64/GP-22)	651
<i>N.V. Antonov et al.</i>	
The Liquid Lithium Fusion Reactor (IAEA-CN-64/GP-23)	659
<i>V.A. Evtikhin et al.</i>	
Improved version of a mirror based 14 MeV neutron source (IAEA-CN-64/GP-24)	667
<i>A.A. Ivanov et al.</i>	
Design of a volumetric neutron source based on a steady state tokamak (IAEA-CN-64/GP-25)	677
<i>Y. Ogawa et al.</i>	
High field tokamak reactor with force balanced coils as a volumetric neutron source (IAEA-CN-64/GP-26)	685
<i>S. Tsuji-Iio et al.</i>	
Maintenance oriented tokamak reactor with low activation material and high aspect ratio configuration (IAEA-CN-64/GP-27)	693
<i>S. Nishio et al.</i>	
A compact tokamak transmutation reactor (IAEA-CN-64/GP-28)	701
<i>L.J. Qiu et al.</i>	
Measurements and calculations of neutron leakage spectra from lead slabs irradiated with 14 MeV neutrons (IAEA-CN-64/GP-29)	711
<i>J. Jordanova, O. Penchev</i>	
Chairpersons of Sessions and Secretariat of the Conference	719
Author Index	721

INERTIAL CONFINEMENT 1
