|---|------|
| List of participants..... | XI |
| F. TROYON - Welcome address and introduction..... | XIX |
| | |
| INVITED PAPERS | |
| J. NÜHRENBERG, W. LOTZ and S. GORI - Quasi-axisymmetric tokamaks..... | 3 |
| L. M. KOVRIZHNYKH - Theoretical models of anomalous transport and their comparison with experiments..... | 13 |
| M. OTTAVIANI and F. PORCELLI - Fast nonlinear magnetic reconnection in collisionless and weakly collisional regimes..... | 33 |
| W. W. HEIDBRINK - Experimental aspects of effects of high-energy particles on Alfvén modes..... | 49 |
| Y. TODO, T. SATO, K. WATANABE, T. H. WATANABE and R. HORIUCHI - Studies of excitation and saturation of the toroidal Alfvén eigenmodes using a new simulation method..... | 63 |
| G. VLAD - Non-linear gap mode simulations..... | 75 |
| V. S. CHAN and S. C. CHIU - Plasma rotation in RF heated plasmas..... | 89 |
| L.-G. ERIKSSON, J. CARLSSON and T. HELLSTEN - Modelling of ICRH in a tokamak including large banana width effects..... | 101 |
| E. WESTERHOF - Present status of electron cyclotron resonant heating and electron cyclotron current drive and their applications to experiments..... | 115 |
| S. CIRANT, S. NOWAK and A. OREFICE - Self-diffractive effects in the propagation and absorption of electron cyclotron Gaussian beams in toroidal plasmas..... | 131 |
| B. B. KADOMTSEV - Anomalous transport selforganization | 155 |
| J. W. CONNOR and C. M. ROACH - How confident are we that ITER will ignite?..... | 173 |
| L. GARCIA, B. A. CARRERAS and V. E. LYNCH - Turbulence and poloidal flows..... | 187 |

| | | | |
|--|-----|---|-----|
| J. WEYLAND, G. BATEMAN and B. BROWN - Simulations of anomalous transport using drift wave models..... | 197 | C. CASTALDO, A. CARDINALI, R. CESARIO and F. DE MARCO - Evaluation of nonlinear resonant absorption at $\omega = 9/2 \Omega_{ci}$ in the ion Bernstein wave plasma heating experiment on FTU..... | 357 |
| S. E. PARKER, J. C. CUMMINGS, W. W. LEE and H. E. MYNICK - Gyrokinetic simulation of tokamak turbulence..... | 219 | D. ANDERSON, L.-G. ERIKSSON and A. ÖDBLOM - Modelling of sawtooth induced redistribution of ICRF-heated minority ions..... | 363 |
| M. TANAKA - Particle simulations of collisionless magnetic reconnection..... | 233 | A. JAUN, K. APPERT, H. LÜTJENS, J. VACLAVIK and L. VILLARD - Linear wave propagation in resistive/hot tokamak plasmas..... | 369 |
| F. L. HINTON - Theory of the L-H transition..... | 247 | A. VARIAS, J. A. JIMÉNEZ, A. LÓPEZ-FRAGUAS and F. CASTEJÓN - Stability properties of stellarators with a net toroidal current..... | 379 |
| A. TARONI, G. CORRIGAN, G. J. RADFORD, R. SIMONINI, J. SPENCE and S. A. WEBER - Computational modelling of SOL and divertor plasmas at JET..... | 259 | D. FARINA, S. LASCA, A. NASSIGH and R. POZZOLI - Stochasticity of magnetic field lines in the scrape-off layer of a divertor configuration..... | 385 |
| R. SCHNEIDER, D. REITER, K. LACKNER, J. NEUHAUSER, B. BRAAMS, D. COSTER, H. S. BOSCH and H. KASTELEWICZ - B2-EIRENE scrape-off-layer calculations..... | 273 | F. PEGORARO, B. N. KUVSHINOV and T. J. SCHEP - Hamiltonian structure and self-similar plasma motions..... | 391 |
| CONTRIBUTED PAPERS | | | |
| R. E. DENTON, E. K. MASCHKE and G. URQUIJO - A flexible code based on a scalar representation of toroidal MHD | 289 | M. TESSAROTTO, R. B. WHITE and LIN-JIN ZHENG - Monte Carlo approach for non-linear δf -weighting schemes... | 397 |
| H. A. HOLTIES, G. T. A. HUYSMANS, J. P. GOEDBLOED, W. KERNER, F. X. SÖLDNER and V. V. PARAIL - Stability of MHD modes in plasmas with inverted q-profiles..... | 295 | T. HELLSTEN, J. CARLSSON and L.-G. ERIKSSON - Minority ion current drive during ICRH..... | 403 |
| L. VILLARD, S. BRUNNER and J. VACLAVIK - Theoretical aspects of effects of high-energy particles on MHD modes..... | 301 | C. BRUDERER, J. VACLAVIK and K. APPERT - Nonlinear interaction of lower hybrid waves..... | 409 |
| L.-J. ZHENG and M. TESSAROTTO - Collisionless kinetic ballooning theory revisited..... | 317 | A. CARDINALI - Quasilinear absorption of lower hybrid waves in tokamak plasmas..... | 417 |
| S. WEBER, G. CORRIGAN, R. SIMONINI, J. SPENCE and A. TARONI - Transition to a detached plasma state in an iter divertor..... | 331 | M. BORNATICI and U. RUFFINA - The effect of radiative slowing-down on current-drive by electron-cyclotron radiation in fusion plasmas..... | 423 |
| O. SAUTER, Y. R. LIN-LIU, F. L. HINTON and J. VACLAVIK - 3-D Fokker-Planck code valid for arbitrary collisionality and adjoint function for bootstrap current calculation..... | 337 | S. BRUNNER, L. VILLARD and J. VACLAVIK - A kinetic model for the global power transfer between particles and MHD waves..... | 431 |
| F. WOLOCH, G. KAMELANDER and O. GRUBER - Scaling of the Rebut-Lallia-Watkins transport model for ASDEX discharges..... | 345 | M. D. TOKMAN - On the possibility of two-photon regimes of ECRH in toroidal systems..... | 437 |
| J. CARLSSON, L.-G. ERIKSSON and T. HELLSTEN - FIDO, a code for calculating the velocity distribution function of a toroidal plasma during ICRH..... | 351 | | |
