

Table of Contents

1. Basic Experimental Techniques	1
1.1 Targets	1
1.1.1 Ground-State Species	1
1.1.2 State-Selected Excited Target Species	2
1.2 Electron and Projectile Ion Beams	4
1.2.1 Electron Beam Sources	4
1.2.2 Projectile-Ion Sources	6
1.3 Detection and Measurements of Collision Products	10
1.3.1 Optical Measurements	11
1.3.2 Secondary-Electron Measurements	12
1.3.3 Recoiled Secondary-Ion Measurements	21
1.4 Crossed/Merged-Beams Techniques	22
1.4.1 Electron-Ion Crossing	22
1.4.2 Electron-Neutral Crossing	25
1.4.3 Ion-Ion Crossing	25
1.5 Coincidence Techniques	27
1.5.1 Coincidence between Recoil Ions and Electrons emitted from Projectile Ions	27
1.5.2 Coincidence between Charge-Changed Projectile Ions and Photons	28
1.5.3 Coincidence between Charge-Changed Projectile Ion and Recoil Ion	30
1.5.4 Multiple Coincidence among Secondary Ions, Secondary Electrons and Projectile Ions	32
2. Multielectron Processes Induced by Charged Particles	35
2.1 Multielectron Ionization by Electron Impact	35
2.1.1 Main Features of MI Cross Sections	36
2.1.2 Semiempirical Formulas. Comparison with Experiment	40
2.1.3 Contribution of Direct and Indirect Processes	44
2.1.4 Double Ionization of Two-Electron Targets. Correlation Effects	47
2.1.5 Ionization by Relativistic Electrons	51
2.2 Multielectron Ionization by Positive Ions	54
2.2.1 General	54
2.2.2 Theory and Experiment	57

2.3	Multiple Excitation	72
2.3.1	Double Excitation by Electrons	73
2.3.2	Double Excitation by Positive Ions. Projectile-Charge Dependence	77
2.4	Simultaneous Ionization and Excitation	78
2.5	Multielectron Capture	85
2.5.1	Very Low Energies	85
2.5.2	Low and Intermediate Energies	87
2.5.3	High Energies	91
2.5.4	Scaling Law for Double-Electron Capture from He Targets	94
3.	Collisions Involving Negative Atomic Ions	97
3.1	Electron Detachment from Negative Ions in Electron Collisions	97
3.1.1	Negative Hydrogen Ions	97
3.1.2	Heavier Negative Heavy Ions	99
3.2	Electron Detachment from Negative Ions in Neutral Atom/Molecule Collisions	99
3.2.1	H ⁻ Ions	100
3.2.2	He ⁻ Ions	102
3.2.3	Heavier Negative Ions	104
3.2.4	Secondary Electrons from H ⁻ Ions under Neutral Atom Collisions	104
3.3	Electron Detachment from Negative Ions in Positive-Ion Collisions	105
3.3.1	Proton Impact	107
3.3.2	Heavy, Low-Charged Positive-Ion Impact	109
3.3.3	Highly-Charged, Heavy-Ion Impact	110
3.3.4	Electron Detachment from Heavier Negative Ion	117
3.4	Electron Detachment in Negative Ion Collisions	117
3.5	Ionization of Neutral Atoms in Negative-Ion Collisions	119
3.5.1	Electron Impact	119
3.5.2	H ⁻ Ion Impact	119
3.5.3	Antiproton impact	121
4.	Multiple Photoionization	123
4.1	Basic Properties and Relations	123
4.2	Double Photoionization	130
4.2.1	Double Photoionization of He and He-like Systems	132
4.2.2	Compton Scattering	142
4.3	Photoionization with Excitation	146
