

# Contents

Preface		ix
Foreword		xii
Introduction		xvii
<b>Chapter 1</b>	<b>Discovery of the plasmasphere and initial studies of its properties</b>	<b>1</b>
1.1	Introduction	1
1.2	First plasmaspheric research in the USSR	2
1.3	The discovery of the ‘knee’ effect from whistlers	14
<b>Chapter 2</b>	<b>Electromagnetic sounding of the plasmasphere</b>	<b>40</b>
2.1	Introduction	40
2.2	Initial results	41
2.3	Plasmasphere dynamics	42
2.4	Coupling of the plasmopause and plasmasphere regions to the ionosphere	70
2.5	Other aspects of plasmasphere structure and dynamics	76
2.6	Plasma wave observations and the plasmasphere	94
<b>Chapter 3</b>	<b>Plasmasphere measurements from spacecraft</b>	<b>108</b>
3.1	Introduction	108
3.2	Experimental results from the decade 1960–70	110

## Contents

3.3	Experiments and results from the decade 1970–80	119
3.4	Plasmaspheric measurements during the decade 1980–90	143
3.5	The latest results	155
<b>Chapter 4</b>	<b>A global description of the plasmasphere</b>	<b>159</b>
4.1	Introduction	159
4.2	The ionosphere as a source and sink for plasmaspheric particles	159
4.3	Thermal structure of the plasmasphere	171
4.4	Pitch angle distributions	177
4.5	Ion composition	182
4.6	Plasma density distribution	186
4.7	The shape of the equatorial plasmopause	191
4.8	The plasmopause region	195
4.9	Plasma density irregularities outside and inside the plasmasphere	207
4.10	Magnetic and electric field distributions	212
4.11	Concluding remarks	219
<b>Chapter 5</b>	<b>Theoretical aspects related to the plasmasphere</b>	<b>221</b>
5.1	Introduction	221
5.2	Field-aligned and equatorial plasma density distributions	222
5.3	Equatorial plasma distribution	249
5.4	Plasma convection and interchange motion	254
5.5	Theories for the formation of the plasmopause	270
	Epilogue	310
	References	312
	Index	347
