### **Development and Applications of a New Deep Level Transient Spectroscopy Method and New Averaging Techniques**

PLAMEN V. KOLEV AND M. JAMAL DEEN

I. Introduction . . . . .	2
II. Review of the Deep-Level Transient Spectroscopy Method . . . . .	6
III. Averaging and Recording of Digital DLTS Transient Signals . . . . .	39
IV. Feedback Circuits and Experimental Setup for CC-DLTS and CR-DLTS	61
V. Constant-Resistance DLTS in Enhancement Mode MOSFETs . . . . .	72
VI. Constant-Resistance DLTS in Depletion Mode MOSFETs . . . . .	83
VII. Constant-Resistance DLTS in Junction Field-Effect Transistors . . . . .	96
VIII. Conclusions and Areas for Future Research . . . . .	119
References . . . . .	122
Appendix A: Magnitude Errors . . . . .	135
Appendix B: Time Constant Errors . . . . .	140
Appendix C: Noise Sources and Signal-to-Noise Ratio (SNR) in the DLTS Transients . . . . .	141
Appendix D: Electrical Circuit of the Pseudo-Logarithmic Generator .	145
Appendix E: Electrical Circuits of the Feedback Circuit . . . . .	146
Appendix F: Listing of a Template for a DLTS Measurement Program	148
Appendix G: Listing of a Template for a DLTS Analysis Program . .	152
Appendix H: Radiation-Induced Defects in Silicon . . . . .	155
List of Acronyms . . . . .	156
List of Symbols . . . . .	158

### **Complex Dyadic Multiresolution Analyses**

J.-M. LINA, P. TURCOTTE AND B. GOULARD

I. Introduction . . . . .	163
II. The Spline Example . . . . .	164
III. Multiresolution and Wavelet . . . . .	167

IV. Daubechies' Wavelets . . . . .	170
V. Symmetric Daubechies Wavelets . . . . .	175
VI. The Phase of SDW Scaling Function . . . . .	176
VII. The Mallat Algorithm with Complex Filters . . . . .	178
VIII. Restoration from the Phase . . . . .	180
IX. Image Enhancement . . . . .	183
X. Complex Shrinkage . . . . .	187
XI. Conclusion . . . . .	193
References . . . . .	196
Reading List . . . . .	197

### **Lattice Vector Quantization for Wavelet-Based Image Coding**

MIKHAIL SHNAIDER AND ANDREW P. PAPLIŃSKI

I. Introduction . . . . .	200
II. Quantization of Wavelet Coefficients . . . . .	201
III. Lattice Quantization Fundamentals . . . . .	213
IV. Lattices . . . . .	218
V. Quantization Algorithms for Selected Lattices . . . . .	229
VI. Counting the Lattice Points . . . . .	233
VII. Scaling Algorithm . . . . .	242
VIII. Selecting a Lattice for Quantization . . . . .	244
IX. Entropy Coding of Lattice Vectors . . . . .	250
X. Experimental Results . . . . .	254
XI. Conclusions . . . . .	258
Appendix A: Cartan Matrices of Some Root Systems . . . . .	260
References . . . . .	261

### **Fuzzy Cellular Neural Networks and Their Applications to Image Processing**

TAO YANG

I. Introduction . . . . .	266
II. Fuzzy Cellular Neural Networks . . . . .	275
III. Theory of Fuzzy Cellular Neural Networks . . . . .	290
IV. FCNN as Computational Arrays . . . . .	327

V. Embed Linguistic Statements into FCNN . . . . .	360
VI. Learning Algorithms of FCNN . . . . .	375
VII. Generic Algorithm for FCNN . . . . .	401
VIII. Applications of Discrete-Time FCNN . . . . .	407
IX. Conclusions and Future Work . . . . .	420
References . . . . .	427
Index . . . . .	447
