1	Introduction	1
2	Source processes in the high-latitude ionosphere	7
2.1	Introduction	7
2.2	Ionospheric Context	9
2.2.1	Ionospheric Plasma Source	9
2.2.2	Convection	12
2.2.3	Vertical Flows	12
2.2.4	Ionospheric Three-Dimensional Circulation	15
2.3	Collisional Bulk Heating	17
2.3.1	Ionospheric F-Region and Topside observations	17
2.3.2	Proposed Mechanisms	18
2.3.3	Theories and Modelling	19
2.4	Transverse Ion Energization	24
2.4.1	Observations	24
2.4.2	Processes	30
2.5	Parallel Acceleration of Ions and Electrons	39
2.5.1	Background	39
2.5.2	The Auroral Dynamo and Related Current Circuit	41
2.5.3	Mechanisms for Field-Aligned Acceleration.	44
2.5.4	Observations of Particles and Fields—Constraints on Models	45
2.5.5	Altitude Distribution of the Field-Aligned Acceleration Process	49
2.5.6	Parallel Heating of Ions and Electrons	55
2.6	Summary of Ion Outflows	65
2.6.1	Polar Wind and Auroral Bulk Upflow	66
2.6.2	Ion Beams and Conics	67
2.6.3	Effects of Magnetic Activity, Solar Cycle and Seasons	69
2.6.4	Ion Outflow at High and Low Energies	73
2.6.5	Total Ion Outflow	73
2.7	Conclusions, Controversies and Open Questions	75

3 Processes leading to plasma losses into the high-latitude atmosphere	85
3.1 Introduction	85
3.2 Main loss processes	88
3.2.1 Current Sheet Pitch-angle Scattering	89
3.2.2 Scattering in Wave-Particle Interaction	90
3.2.3 Precipitation Due to Parallel Electric Fields	91
3.2.4 Adiabatic Drift Motion and Precipitation	94
3.3 Polar Cap-Regions that May be on Open Field Lines	95
3.3.1 Overview of Polar Precipitation	95
3.3.2 Polar Arcs	97
3.3.3 Cusp Aurora	102
3.3.4 Soft-electron Zone and the LLBL	107
3.3.5 Total Low-energy Precipitation	111
3.4 Precipitation from the Plasma Sheet	113
3.4.1 Current Sheet Scattering	113
3.4.2 Diffuse Electron Precipitation	118
3.4.3 Auroral Arc Precipitation	125
3.4.4 Storm-time Particle Precipitation	128
3.4.5 Dayside Plasma Sheet	129
3.5 Where we stand today	132
4 Source and loss processes in the inner magnetosphere	137
4.1 Introduction	137
4.2 Physical Processes	138
4.2.1 Adiabatic Motion	138
4.2.2 Inner Magnetospheric Electric Field	140
4.2.3 Inner-Magnetospheric Magnetic Fields and Induction Electric Fields	145
4.2.4 Non-Adiabatic Motion	146
4.3 Radiation Belts	152
4.3.1 Spatial Structure and Variability	152
4.3.2 Radiation Belt Source Mechanisms	157
4.3.3 Internal Acceleration Processes	161
4.3.4 Radiation Belt Loss Mechanisms	163
4.3.5 Comprehensive Modelling	168
4.3.6 Summary and Open Questions	169
4.4 Ring Current	170
4.4.1 Spatial Structure and Variability	170
4.4.2 Ring Current Sources	172

4.4.3 Ring Current Loss Mechanisms	176
4.4.4 Comprehensive Modelling of Ring-Current Processes	180
4.4.5 Summary and Open Questions	184
4.5 Cold and Suprathermal Particles in the Inner Magnetosphere	187
4.5.1 Spatial Structure and Temporal Variability	187
4.5.2 Cold and Suprathermal Particle Source Mechanisms	190
4.5.3 Degradation of Ring Current Ions to Suprathermal Ions	198
4.5.4 Cold and Suprathermal Particle Loss Mechanisms	198
4.5.5 Comprehensive Modelling of Cold and Suprathermal Plasmas	203
4.5.6 Summary and Open Questions	205
5 Plasma transfer processes at the magnetopause	207
5.1 Introduction	207
5.2 Magnetic Reconnection	208
5.2.1 Introduction	208
5.2.2 Theoretical Background	210
5.2.3 Predictions and Tests: Microscale	213
5.2.4 Predictions and Tests: Mesoscale	222
5.2.5 Predictions and Tests: Macroscale	228
5.2.6 Global Flux Estimates	233
5.2.7 Reconnection Summary	235
5.3 Finite Larmor Radius Effects	236
5.3.1 FLR and Gyro-Viscosity	237
5.3.2 Gyro-Viscous Erosion at the Magnetopause	239
5.3.3 Filamentary Transport	240
5.3.4 Gradient and Polarisation Drift Entry	243
5.3.5 Gradient Drift Exit	246
5.4 Diffusion	247
5.4.1 Introduction	247
5.4.2 Diffusion Processes	248
5.4.3 Observations Suggestive of Diffusion	250
5.4.4 Diffusion Coefficient	253
5.4.5 Diffusion Summary	256
5.5 Kelvin-Helmholtz Instability	257
5.5.1 Introduction	257
5.5.2 Theoretical Developments	258
5.5.3 Predictions and Tests	261
5.6 Impulsive Penetration	263
5.6.1 Introduction	263

5.6.2 Penetration Theory	263
5.6.3 Discussion	265
5.7 The Special Role of the Cusp	270
5.7.1 Introduction	270
5.7.2 Gas Dynamic Model of the Cusp	271
5.7.3 Observations Related to the Gas Dynamic Model	274
5.7.4 Cusp Summary	276
5.8 Summary and Conclusions	277
5.9 Future Directions	279
6 Source and loss processes in the magnetotail	285
6.1 Introduction	285
6.2 Magnetotail Overview	287
6.2.1 Plasma Observations in the Magnetotail	287
6.2.2 Solar Wind Input	293
6.2.3 Ionospheric Inputs	298
6.3 Models	298
6.3.1 Overview	298
6.3.2 MHD Models	300
6.3.3 Kinetic Models	311
6.3.4 Modelling Ionospheric Outflow	319
6.4 Observations	320
6.4.1 Solar Wind Plasma Entry to the Distant Tail	320
6.4.2 Ion Composition	323
6.4.3 Heating and Energisation in the Tail	329
6.4.4 Loss From the Tail	332
6.5 Data-Theory Closure	339
6.6 Alternate Scenarios	344
6.6.1 Evidence for Processes other than Reconnection?	344
6.6.2 The Turbulent Tail	349
6.7 Summary and Remarks	350
6.7.1 General Summary	350
6.7.2 Future Efforts	352
7 Contribution of different source and loss processes to the magnetospheric plasma content	355
7.1 Introduction	355
7.2 Summary of Source Processes	355
7.2.1 The High-Latitude Ionosphere	355

7.2.2 The Plasmasphere	361
7.2.3 The Magnetopause	362
7.2.4 The Magnetotail	365
7.3 Summary of Loss Processes	367
7.3.1 Precipitation Into the Atmosphere	367
7.3.2 Loss Through the Magnetopause	368
7.3.3 Ion Loss Through the Distant Tail	369
7.4 Balance Between Source and Loss Processes	370
8 Magnetospheric plasma sources and losses: future directions	373
8.1 Introduction	373
8.2 Identification of Global Sources	374
8.3 Search for and Identification of Reconnection Site	377
8.4 Entry and Transport Processes	377
8.5 Mixing of the Solar Wind and Ionospheric Sources	379
8.5.1 Role of Ion Composition Measurements	380
8.6 Losses	381
APPENDIX A / Simulation models	383
A.1 MHD models	383
A.2 Basics of Large Scale Kinetic (LSK) Models	385
APPENDIX B / Diffusive Processes	389
B.1 Basic Concepts	389
B.2 Anomalous Diffusion	391
APPENDIX C / List of symbols and conventions used	403
APPENDIX D / Abbreviations and Acronyms	405
Index	469
