<b>Chapter 1</b>	<b>The Study of Ball Lightning . . . . .</b>	<b>1</b>
1.1	Definitions . . . . .	1
1.2	Explaining Ball Lightning Reports . . . . .	2
1.3	History of the Scientific Study of Ball Lightning . . . . .	2
1.4	Reported Characteristics . . . . .	11
1.4.1	Environmental Conditions and Incidence . . . . .	12
1.4.2	Form . . . . .	13
1.4.3	Diameter . . . . .	13
1.4.4	Duration of Observations . . . . .	14
1.4.5	Luminosity . . . . .	15
1.4.6	Color . . . . .	15
1.4.7	Constancy of Appearance . . . . .	15
1.4.8	Motion . . . . .	16
1.4.9	Behavior inside Aircraft Fuselages . . . . .	17
1.4.10	Odor . . . . .	17
1.4.11	Sound . . . . .	17
1.4.12	Traces and Damage . . . . .	18
1.4.13	Types of Ball Lightning . . . . .	18
1.4.14	Log-Normal Distributions for Ball Lightning Parameters . . . . .	18
1.4.15	Summary: Typical Reported Characteristics . . . . .	20
1.5	Developing Models for Ball Lightning . . . . .	20
<b>Chapter 2</b>	<b>Thunderstorms and Lightning . . . . .</b>	<b>23</b>
2.1	Introduction . . . . .	24
2.2	Thunderstorm Electricity . . . . .	25
2.3	Lightning . . . . .	27

2.4	Unusual Forms of Lightning . . . . .	33
2.5	Atmospherics and Radio Noise . . . . .	34
2.6	Recent Developments . . . . .	35
<b>Chapter 3</b>	<b>Phenomena that May Be Mistaken for Ball Lightning . . . . .</b>	<b>39</b>
3.1	Physical Phenomena . . . . .	39
3.1.1	Effects of Conventional Linear Lightning . . . . .	39
3.1.2	Corona Discharge (St. Elmo's Fire) . . . . .	42
3.1.3	Ignis fatuus (will-o'-the-wisp) . . . . .	43
3.1.4	Other Meteorological Phenomena . . . . .	44
3.1.5	Astronomical Phenomena . . . . .	44
3.1.6	Artificial Satellites and Satellite Reentries . . . . .	46
3.1.7	Streetlights . . . . .	46
3.1.8	Insect Swarms . . . . .	46
3.1.9	Pyrotechnics (Fireworks and Flares) . . . . .	46
3.1.10	Blimps and Weather Balloons . . . . .	46
3.1.11	Miscellaneous Phenomena . . . . .	47
3.2	Physical Effects that Cause Distortion . . . . .	47
3.2.1	Atmospheric Refraction . . . . .	47
3.2.2	Miscellaneous Other Optical Effects . . . . .	47
3.3	Psychological Aspects of Reports . . . . .	47
3.3.1	Perception and the Limitations of Eyewitnesses . . . . .	47
3.3.2	Perception as the Link between Distal Event and Report . . . . .	48
3.3.3	Events Observed during Thunderstorms . . . . .	49
3.3.4	Perception and Memory of Unusual Events . . . . .	49
3.3.5	Afterimages and Persistence of Vision . . . . .	50
3.3.6	Magnetic Phosphenes . . . . .	52
3.3.7	Miscellaneous Perceptual Phenomena . . . . .	53
3.3.8	Hoaxes and Hallucinations . . . . .	54
3.4	Limitations of Reports based on Visual Observation Alone . . . . .	54
3.5	The Importance of Physical Evidence . . . . .	54
<b>Chapter 4</b>	<b>Assessment of Electrical, Thermal, and Mechanical Risks . . . . .</b>	<b>55</b>
4.1	Electrical Effects . . . . .	56
4.1.1	Electrical Effects Attributed to Ball Lightning . . . . .	56
4.1.2	Electrical Effects Due to Conventional Linear Lightning . . . . .	59
4.1.3	Discussion of Case Histories . . . . .	62
4.2	Thermal Effects . . . . .	63
4.2.1	Thermal Effects Attributed to Ball Lightning . . . . .	63
4.2.2	Thermal Effects Due to Conventional Linear Lightning . . . . .	66
4.2.3	Discussion of Case Histories . . . . .	68
4.3	Mechanical Effects . . . . .	69
4.3.1	Mechanical Effects Attributed to Ball Lightning . . . . .	69
4.3.2	Mechanical Effects Due to Conventional Linear Lightning . . . . .	71
4.3.3	Discussion of Case Histories . . . . .	71

<b>Chapter 5</b>	<b>Assessment of Risk of Death or Injury by Ball Lightning . . . .</b>	<b>73</b>
	5.1 Deaths of Humans Attributed to Ball Lightning . . . . .	73
	5.2 Deaths of Animals Attributed to Ball Lightning . . . . .	79
	5.3 Injuries Attributed to Ball Lightning . . . . .	81
	5.4 Summary . . . . .	91
	5.5 Discussion . . . . .	91
	5.6 Conclusions . . . . .	93
<b>Chapter 6</b>	<b>Assessment of Risk to Buildings . . . . .</b>	<b>95</b>
	6.1 Case Histories . . . . .	95
	6.1.1 Structural Damage and Fires . . . . .	95
	6.1.2 Damage to Glass, Asbestos, etc. . . . .	100
	6.2 Interpretation . . . . .	102
	6.2.1 Side Flashes and Buildings . . . . .	102
	6.2.2 Overvoltages and Flashover . . . . .	104
	6.2.3 Glass . . . . .	104
	6.2.4 Concrete, Brick, and Mortar . . . . .	104
	6.3 Postscript: A Field Study . . . . .	105
<b>Chapter 7</b>	<b>Assessment of Risk to Aircraft . . . . .</b>	<b>109</b>
	7.1 Ball Lightning External to Aircraft . . . . .	109
	7.1.1 Cases where Damage Has Been Sustained . . . . .	109
	7.1.2 Cases where Aircraft Have Not Sustained Damage . . . . .	111
	7.2 Ball Lightning Seen Inside Aircraft . . . . .	112
	7.2.1 Case Histories . . . . .	112
	7.3 Discussion . . . . .	116
<b>Chapter 8</b>	<b>Assessment of Risk to Trees . . . . .</b>	<b>123</b>
	8.1 No Clear Evidence of Contact between Ball Lightning and a Tree . . . . .	123
	8.2 Reports of Contact between Ball Lightning and a Tree . . . . .	124
	8.3 Conventional Linear Lightning and Trees . . . . .	127
	8.4 Does Ball Lightning Damage Trees? . . . . .	128
<b>Chapter 9</b>	<b>Photographs and Videotapes . . . . .</b>	<b>129</b>
	9.1 General Considerations . . . . .	129
	9.2 Causes of Misidentification . . . . .	130
	9.3 Still Photographs . . . . .	131
	9.4 Films and Videotapes . . . . .	154
	9.5 Instrumented Observations . . . . .	157
	9.6 Conclusions . . . . .	160
<b>Chapter 10</b>	<b>The Existence of Ball Lightning . . . . .</b>	<b>163</b>
	10.1 The Problem of Random, Transient Phenomena . . . . .	163
	10.2 Ockham's Razor and Other Philosophical Questions . . . . .	165
	10.3 Skeptical Views . . . . .	166

10.4	Reliability of Reports . . . . .	168
10.4.1	Ball Lightning Reports from Scientists . . . . .	168
10.4.2	Reports from Other Professional People . . . . .	173
10.4.3	Instrumented Observations . . . . .	175
10.5	Scientists and Skepticism . . . . .	175
10.6	Conclusions . . . . .	178
<b>Chapter 11</b>	<b>Ball Lightning Theories and Experiments . . . . .</b>	<b>179</b>
11.1	Present Status of Ball Lightning Theory . . . . .	179
11.2	Aims of Ball Lightning Theory . . . . .	180
11.3	Classification of Models . . . . .	182
11.4	Plasma Models . . . . .	182
11.5	How Is Ball Lightning Formed? . . . . .	185
11.5.1	Lightning Impact Models . . . . .	185
11.5.2	Formation from a Lightning Channel . . . . .	188
11.5.3	Focusing of Cosmic Rays . . . . .	192
11.6	Energy Content of Ball Lightning . . . . .	192
<b>Chapter 12</b>	<b>Models Based on an Internal Energy Source . . . . .</b>	<b>197</b>
12.1	Heated Sphere of Air . . . . .	197
12.2	Plasmoid and Vortex Plasma Ring Models . . . . .	198
12.3	Other Plasma Models . . . . .	204
12.4	Other Vortex Structures . . . . .	207
12.5	Internal Energy Models Powered by Electromagnetic Radiation . . . . .	210
12.6	Chemical Processes . . . . .	212
12.6.1	Chemical Reaction . . . . .	212
12.6.2	Combustion . . . . .	215
12.7	Dust, Droplets, Dirty Plasmas, Aerosols, and Fractal Structures . . . . .	216
12.8	Nuclear Processes . . . . .	218
12.9	Charge Separation . . . . .	220
12.10	Ions . . . . .	221
<b>Chapter 13</b>	<b>Models Based on an External Energy Source . . . . .</b>	<b>225</b>
13.1	Direct Current Discharge Models . . . . .	225
13.2	Microwave Resonance Models . . . . .	230
<b>Chapter 14</b>	<b>Conclusions and Recommendations . . . . .</b>	<b>239</b>
<b>Appendix A</b>	<b>Ball Lightning Questionnaire . . . . .</b>	<b>243</b>
<b>Appendix B</b>	<b>Glossary . . . . .</b>	<b>249</b>
<b>Appendix C</b>	<b>Bibliography . . . . .</b>	<b>265</b>
<b>Index</b>	<b>. . . . .</b>	<b>345</b>
