## Heterogeneous Coupling along Alaska-Aleutians as Inferred from Tsunami, Seismic, and Geodetic Inversions

JEAN M. JOHNSON

1. Introduction . . . . .	1
2. Generation, Computation, and Inversion of Tsunami Waveforms . . . . .	5
2.1 Generation, Propagation, and Observation of Tsunamis . . . . .	5
2.2 Forward Computation of Tsunamis . . . . .	17
2.3 Inversion of Tsunami Waveforms . . . . .	23
3. The 1965 Rat Islands Earthquake: A Critical Comparison of Seismic and Tsunami Wave Inversions . . . . .	28
3.1 Introduction . . . . .	28
3.2 The 1965 Rat Islands Earthquake . . . . .	29
3.3 Tsunami Study . . . . .	32
3.4 Comparison of Seismic and Tsunami Results . . . . .	37
3.5 Conclusions . . . . .	42
4. The 1957 Great Aleutian Earthquake . . . . .	42
4.1 Introduction . . . . .	42
4.2 Previous Seismic Studies . . . . .	44
4.3 Tsunami Source Area . . . . .	45
4.4 Tsunami Waveform Inversion . . . . .	47
4.5 Comparison of Seismic and Tsunami Results . . . . .	53
4.6 The 1986 Andreanof Islands Earthquake . . . . .	53
5. Rupture Extent of the 1938 Alaskan Earthquake as Inferred from Tsunami Waveforms . . . . .	56
5.1 Introduction . . . . .	56
5.2 Previous Studies of the 1938 Earthquake . . . . .	57
5.3 Tsunami Waveform Inversion . . . . .	58
5.4 Conclusions . . . . .	62
6. Estimation of Seismic Moment and Slip Distribution of the 1 April 1946 Aleutian Tsunami Earthquake . . . . .	62
6.1 Introduction . . . . .	62
6.2 Previous Seismic Analysis . . . . .	65
6.3 Tsunami Analysis . . . . .	68
6.4 Discussion . . . . .	77

6.5 Seismic and Tsunami Hazards . . . . .	79
6.6 Conclusions . . . . .	81
7. The 1964 Prince William Sound Earthquake: Joint Inversion of Tsunami and Geodetic Data . . . . .	82
7.1 Introduction . . . . .	82
7.2 Previous Seismic Studies . . . . .	84
7.3 Previous Geodetic Studies . . . . .	84
7.4 Previous Tsunami Studies . . . . .	86
7.5 Joint Inversion . . . . .	87
7.6 Comparison with Previous Studies . . . . .	98
7.7 Discussion . . . . .	99
8. Conclusions . . . . .	101
Appendix: Notes on the Tsunami Waveform Inversion Method . . . . .	105
References . . . . .	110

## Local Tsunamis and Earthquake Source Parameters

ERIC L. GEIST

1. Introduction . . . . .	117
2. Tsunami Theory . . . . .	120
2.1 General Approaches . . . . .	121
2.2 Coseismic Surface Deformation . . . . .	123
2.3 Tsunami Propagation . . . . .	126
2.4 Tsunami Run-up . . . . .	130
3. Local versus Far-Field Tsunamis . . . . .	133
3.1 Source Parameters Affecting Far-Field Tsunamis . . . . .	133
3.2 Coseismic Displacement near a Coastline . . . . .	134
3.3 Wave Evolution over the Source Area . . . . .	135
4. Tectonic Setting of Tsunamigenic Earthquakes . . . . .	138
4.1 Types of Subduction Zone Faulting . . . . .	138
4.2 Nature of Rupture along the Interplate Thrust . . . . .	139
5. Effect of Static Source Parameters on Tsunamis . . . . .	141
5.1 Fault Geometry . . . . .	145
5.2 Fault Slip . . . . .	153
5.3 Slip Direction . . . . .	155
5.4 Physical Properties . . . . .	160
5.5 Summary of Static Source Parameter Effects . . . . .	164
6. Effect of Spatial Variations in Earthquake Source Parameters . . . . .	164
6.1 Slip Variations . . . . .	165
6.2 Triggered and Compound Earthquakes . . . . .	171

7. Effect of Temporal Variations in Earthquake Source Parameters . . . . .	175
7.1 Rise Time . . . . .	175
7.2 Rupture Velocity . . . . .	178
7.3 Dynamic Overshoot of Vertical Displacements . . . . .	181
8. Local Effects of Tsunami Earthquakes . . . . .	182
8.1 Characteristics of Tsunami Earthquakes . . . . .	184
8.2 Results from Broadband Analysis of Recent Tsunami Earthquakes . . . . .	187
8.3 Mechanics of Shallow Thrust Faults Related to Local Tsunamis . . . . .	189
8.4 Outstanding Problems . . . . .	191
9. Case History: 1992 Nicaragua Earthquake and Tsunami . . . . .	192
9.1 Geometric and Physical Parameters . . . . .	192
9.2 Temporal Progression of Rupture . . . . .	194
9.3 Magnitude and Distribution of Slip . . . . .	194
10. Conclusions . . . . .	195
Appendix . . . . .	197
References . . . . .	198
INDEX . . . . .	211
