## 1 Exactly Solvable Models for Many-Body Systems Far from Equilibrium

G. M. SCHÜTZ

1 Introduction . . . . .	3
2 Quantum Hamiltonian formalism for the master equation . . . . .	17
3 Integrable stochastic processes . . . . .	30
4 Asymptotic behaviour . . . . .	53
5 Equivalences of stochastic processes . . . . .	72
6 The symmetric exclusion process . . . . .	79
7 Driven lattice gases . . . . .	103
8 Reaction–diffusion processes . . . . .	162
9 Free-fermion systems . . . . .	175
10 Experimental realizations of integrable reaction–diffusion systems . . . . .	215
Acknowledgements . . . . .	223
Appendix A: The two-dimensional vertex model . . . . .	225
Appendix B: Universality of interface fluctuations . . . . .	230
Appendix C: Exact solution for empty-interval probabilities in the ASEP with open boundaries . . . . .	237
Appendix D: Frequently used notation . . . . .	239
References . . . . .	242

**2 Polymerized Membranes, a Review**

K. J. WIESE

1 Introduction and outline . . . . .	256
2 Basic properties of membranes . . . . .	261
3 Field-theoretical treatment of tethered membranes . . . . .	280
4 Some useful tools and relation to polymer theory . . . . .	306
5 Proof of perturbative renormalizability . . . . .	319
6 Calculations at two-loop order . . . . .	341
7 Extracting the physical informations: extrapolations . . . . .	348
8 Other critical exponents, stability of the fixed point and boundaries . . . . .	358
9 The tricritical point . . . . .	364
10 Variants . . . . .	372
11 Dynamics . . . . .	378
12 Disorder and nonconserved forces . . . . .	389
13 $N$ -coloured membranes . . . . .	409
14 Large orders . . . . .	435
15 Conclusions . . . . .	451
Appendix A: Normalizations . . . . .	452
Appendix B: List of symbols and notations used in the main text . . . . .	454
Appendix C: Longitudinal and transversal projectors . . . . .	455
Appendix D: Derivation of the RG equations . . . . .	456
Appendix E: Reparametrization invariance . . . . .	459
Appendix F: Useful formulas . . . . .	460
Appendix G: Derivation of the Green function . . . . .	461
Appendix H: Exercises with solutions . . . . .	462
References . . . . .	468
Subject index . . . . .	481
