Preface	v
Overview	
<i>M. Ohtsu</i>	1
Near field optics seen as an antenna problem	
<i>D. W. Pohl</i>	9
Near field optics solved by modified self-consistent method	
<i>Zhiyuan Li, Benyuan Gu and Guozhen Yang</i>	22
Near-field scanning optical microscopy of electromagnetic field structures	
<i>S. T. Huntington, A. Horsfall, S. K. Rhodes, J. N. Walford,</i> <i>A. Barty, K. A. Nugent, A. Roberts and R. E. Scholten</i>	43
Near field vibration spectroscopy to observe molecular images	
<i>Satoshi Kawata</i>	58
DNA single molecule imaging and fluorescence detection using SNO/AM	
<i>Jia Wang, Hiroshi Muramatsu and Noritaka Yamamoto</i>	61
Characterization of intercalating state of YOYO-1 in λ DNA using SNOM/AFM	
<i>H. Muramatsu, K. Homma, N. Yamamoto, Jia Wang,</i> <i>K. Sakata-Sogawa and N. Shimamoto</i>	67
Submicrometer-sized optical fiber biosensors for the detection of d-biotin	
<i>Hua Lü, Yujie Zhao, Jianmin Ma and Zuhong Lu</i>	73
A measurement of LSF of PSTM imaging with the image of step spread	
<i>Shifa Wu, Guoshu Jian, Shi Pan and Yuguang Wang</i>	79
Effective probe-sample interaction: toward atom deflection and manipulation	
<i>K. Kobayashi, S. Sangu, H. Ito and M. Ohtsu</i>	82

Tethered hybrid AFM-NSOM scanning probe microscopy for photonic applications <i>R. S. Taylor</i>	89
Similarity in images between illumination and collection mode SNOM observation of a polystyrene particle layer <i>T. Fujimura, T. Itoh, A. Imada, R. Shimada, T. Koda, S. Takabayashi, H. Miyazaki and K. Ohtaka</i>	94
Numerical simulation of fiber probe patterns of SNOM using FDTD method <i>Kai Liu, Ming Bai, X. L. Ding and Hai Ming</i>	100
Computer simulation for 2D-NSOM using metal-coated fiber-probe <i>Masahiro Tanaka and Kazuo Tanaka</i>	106
The study of light-scattering and dynamic progresses in solution using near-field optical microscope <i>Tianhao Zhang, Caifan Yan, Guangyin Zhang, Zengfa Li, Xue Wu and Wenhua Liu</i>	112
Analysis of trapping force and torque for fiber-optical trap <i>Ming Bai, Kai Liu, Y. H. Lu and Hai Ming</i>	117
Numerical simulation of two beam illumination in photon scanning tunneling microscope <i>Xiaoqiu Wang, Guoshu Jian, Wei Liu, Shi Pan and Shifa Wu</i>	123
Visualized simulation of 2D-photon scanning tunneling microscope <i>Takahiro Yoshida, Kazuo Tanaka and Masahiro Tanaka</i>	129
Analysis of piezoelectric quartz fork glued with optical fiber probe in near field <i>Tianhao Zhang, Xue Wu, Guangyin Zhang, Zengfa Li, Caifan Yan and Wenhua Liu</i>	135
Near-field raman spectroscopy of CVD-Diamond films <i>Hong Yan, Jingjing Wang, Fan Zhang, Yufeng Zhang, Yujun Deng, Zongju Xia, Qiaojun Gao and Yinghua Zou</i>	140

Near-field two wavelength pump-probe spectroscopy of CdSe nanocluster films <i>Yujun Deng, Hong Yan, Wei Qian, Zongju Xia and Yinghua Zou</i>	145
A SNOM working at LN temperature <i>Xing Zhu, Teng Fei, Yan Yin, Shifa Xu, Hetian Zhou and Zizhao Gan</i>	150
Design and applications of a multi-mode scanning near-field optical microscope <i>Xiumei Liu, Jia Wang and Dacheng Li</i>	158
Subwavelength light localization in nanostructured surfaces <i>V. Coello, S. Wang, J. Siqueiros and S. I. Bozhevolnyi</i>	164
Near-field polarization state transmitted through different surface structures <i>S. Wang, V. Coello, J. M. Siqueiros, S. Zavala, E. R. Mendez and G. Bao</i>	173
Comparison of focussed ion-beam hole drilling and slicing for NSOM aperture formation <i>R. S. Taylor, J. Li and M. Phaneuf</i>	181
Fabrication of scanning near field optical microscope fiber probe <i>Jialin Sun, Qin Li, Ziyang Wang, Yan Zhang, Guyin Rao, Jihua Guo and Jun Zhao</i>	188
SNOM investigation of a high density optical disc after recording <i>Qiyang Chen, Takashi Nakano, Junji Tominaga, Liqiu Men, Toshio Fukaya and Nobufumi Atoda</i>	193
Super-resolution near-field optical data storage using oxygen doped GeSbTe thin films <i>L. Men, J. Tominaga, Q. Chen, H. Fuji, T. Nakano and N. Atoda</i>	199
The gallery modes in two-dimensionally ordered dielectric spheres excited by evanescent fields <i>M. Haraguchi, T. Nakai, A. Shinya, T. Okamoto, M. Fukui, T. Koda, R. Shimada, K. Ohtaka and K. Takeda</i>	205

Near-field coupling of microsphere resonators to a plane dielectric substrate <i>Hiroshi Ishikawa, Hiroharu Tamaru and Kenjiro Miyano</i>	211
Simulation of 3D near-field optics by volume integral equation <i>Kazuo Tanaka, Mengyun Yan and Masahiro Tanaka</i>	216
Analysis on intensity distribution in a high-throughput probe of scanning near-field optical microscope <i>Q. Zhou, H. Dai, X. Zhu, H. T. Zhou and C. Q. Wang</i>	222
Near-field scanning optical microscopy of electromigration in YBCO <i>Suzanne Huerth, Michael Taylor, Michael Paesler and Hans Hallen</i>	228
Direct near-field optical measurements of the super-resolution near-field optical structure <i>Dinping Tsai, Chiwen Yang, Weichih Lin, Fuhan Ho, Hungji Huang, Mingyish Chen, Tzufeng Tseng, Chiuhsiang Lee and Chweijing Yeh</i>	234
Light-scattering-mode super-resolution near-field structure (super-RENS) for super-density data storage <i>J. Tominaga, H. Fuji, T. Nakano, L. Men and N. Atoda</i>	240
Anodic oxidization and optical observation of metal thin film using scanning near-field optical microscope <i>T. Onuki, Y. Watanabe, T. Tokizaki and T. Tani</i>	246
Nanospectroscopy of surface enhanced Raman scattering of organic molecules by using a metallized cantilever <i>Yasushi Inouye, Norihiko Hayazawa, Zouheir Sekkat and Satoshi Kawata</i>	251
Near-field photoluminescence spectroscopy for semiconductor characterization <i>Y. Narita and T. Ikeda</i>	257

Optical microdisks emission patterns with different geometrical shape
observed by near-field optical microscopy

*Xing Zhu, Yumin Shen, Yu Zhang, Shifa Xu, Lun Dai,
Yunqing Chen, Wei Fang, Dajun Wang, Yongchun Xin,
Guozhong Wang, Bei Zhang, Hetian Zhou, Guoyi Zhang
and Zizhao Gan*
