

Contents

I Kadanoff–Baym Equations: History and Perspectives

Introduction	1
Quantum Kinetic Equations	
<i>P. C. Martin</i>	2
Conservation Laws and the Quantum Theory of Transport: The Early Days	
<i>G. Baym</i>	17

II General Problems of Quantum Kinetic Theory

Introduction	33
Kadanoff–Baym Equations with Initial Correlations	
<i>D. Kremp, D. Semkat, M. Bonitz</i>	34
Nonlocal Kinetic Theory	
<i>K. Morawetz, V. Špička, P. Lipavský</i>	45
The “Mixed” Green’s Function Approach to Quantum Kinetics with Initial Correlations	
<i>V. G. Morozov, G. Röpke</i>	56
Approximative Constructions of the Double–Time Correlation Function from the Single–Time Distribution Function	
<i>P. Lipavský, V. Špička, K. Morawetz</i>	63
Nonequilibrium Green’s Functions and the Method of Nonequi- librium Statistical Operator	
<i>V. G. Morozov, G. Röpke</i>	82

Langevin Interpretation of Kadanoff–Baym Equations <i>C. Greiner, S. Leupold</i>	91
--	----

Space-Time Versus Particle-Hole Symmetry of Non-Local Collisions in a Kinetic Equation for Fermi Systems <i>V. Špička, P. Lipavský, K. Morawetz</i>	100
---	-----

III Plasmas

Introduction	111
---------------------------	-----

From Kadanoff–Baym Equations to Plasma Turbulence <i>D.F. DuBois</i>	112
--	-----

Self-Consistent Approximations: Application to a Quasiparticle Description of the Thermodynamic Properties of Relativistic Plasmas <i>B. Vanderheyden, G. Baym</i>	144
--	-----

Quantum Kinetic Theory for Dense Coulomb Systems in Strong Electromagnetic Fields <i>M. Bonitz, Th. Bornath, D. Kremp, H. Haberland, M. Schlanges, P. Hilse</i>	153
---	-----

Quantum and Spin Statistics Effects on Short Time Scales <i>H. Haberland, D. Semkat, M. Bonitz</i>	162
--	-----

Bloch Dynamics of Atoms in Dense Plasmas <i>R. Schepe, D. Tamme, K. Henneberger</i>	170
---	-----

IV Semiconductors. Optics

Introduction	179
---------------------------	-----

Correlation Effects and Quantum Kinetics in Pulse Excited Semiconductors <i>K. Henneberger, U. Moldzio, H. Guldner</i>	180
--	-----

Coulomb Quantum Kinetics with Time-Dependent Screening <i>H. Haug</i>	212
---	-----

Quantum Kinetics of Coulomb Scattering with Screening in Quasi-2D Semiconductors <i>B. Mieck, H. Haug</i>	226
---	-----

Exciton Lineshape within Linear Response of a Semiconductor <i>G. Manzke, K. Henneberger</i>	238
--	-----

V Quantum Transport in Coulomb Systems

Introduction	249
---------------------------	-----

Time-Dependent Transport in Interacting Mesoscopic Systems <i>A.P. Jauho</i>	250
--	-----

Two-Beam Coherent Control: Injection of Hot-Carrier Populations with Nonzero Momenta and Atomic Drag <i>P. Král, J.E. Sipe</i>	274
--	-----

Impact Ionization Rate and Intracollisional Field Effect in Semiconductors <i>J.R. Madureira, R. Redmer, N. Fitzer</i>	283
--	-----

The Use of Relativistic Action in Strong-Field Nonlinear Photoionization <i>J. Ortner V.M. Rylyuk</i>	292
---	-----

Variational Principle for Linearized Kadanoff–Baym Equations <i>A. Yu. Zakharov</i>	301
---	------------

VI Nuclear Matter

Introduction	309
Soft Modes, Quantum Transport and Kinetic Entropy <i>Yu.B. Ivanov, J. Knoll, H. van Hees, D.N. Voskresensky</i>	310
Particle–Hole Dynamics <i>E.E. Kolomeitsev, D.N. Voskresensky</i>	331
A Covariant Generalization of the Real–Time Green’s Functions Method in the Theory of Kinetic Equations <i>S.A. Smolyansky, A.V. Prozorkevich, G. Maino, S.G. Mashnik</i>	345
Relativistic Transport Equations with Generalized Mass Shell Constraints <i>L. Mornas, K. Morawetz</i>	353
Test Particle Description of Transport Processes for States with a Continuous Mass Spectrum <i>S. Leupold</i>	364
The Non–Equilibrium Distribution Function of Particles and Anti–Particles Created in Strong Fields <i>S.A. Smolyansky, V.A. Mizerny, D.V. Vinnik, A.V. Prozorkevich, V.D. Toneev</i>	375
Deuteron Formation in Heavy Ion Collisions Within the Faddeev Approach <i>M. Beyer, C. Kuhrts, G. Röpke, P. D. Danielewicz</i>	383
Dyson–Schwinger Equation Approach to the QCD Deconfinement Transition and J/ψ Dissociation <i>D.B. Blaschke, G.R.G. Burau, M.I. Ivanov, Yu.L. Kalinovsky, P.C. Tandy</i>	392

VII Correlations. Bound States. Bose Condensation

Introduction	403
Generalized Boltzmann Equation for a Trapped Bose–Condensed Gas Using the Kadanoff–Baym Formalism <i>M. Imamovic–Tomasovic, A. Griffin</i>	404
Real–Time Kadanoff–Baym Approach to Plasma Oscillations in Correlated Coulomb Systems <i>N.H. Kwong, M. Bonitz</i>	418
The Kinetics of Two–Particle Bound States in Nonideal Systems <i>Th. Bornath, D. Kremp, M. Schlanges</i>	427
Equilibrium Properties of Dense Coulomb Systems <i>D. Tamme, T. Schmielau, R. Schepe, K. Henneberger</i>	436
Strong Correlations and Dynamic Screening Effects in Dense Plasmas <i>D.O. Gericke, S. Kosse, M. Schlanges, W.D. Kraeft, M. Bonitz</i>	445
Quantum Kinetic Approach to Reaction Rates of Dense Plasmas <i>M. Schlanges, T. Bornath, R. Prenzel</i>	454

VIII Numerical Concepts

Introduction	463
Numerical Solutions of the Kadanoff–Baym Equations <i>H.S. Köhler, N.H. Kwong, R. Binder, D. Semkat, M. Bonitz</i>	464

Two-Time Electron-LO-Phonon Quantum Kinetics and the Test of the Generalized Kadanoff-Baym Relation <i>P. Gartner, L. Bányai, H. Haug</i>	485
Semiclassical and Quantum Production Rates <i>P. Božek</i>	496
Non-Lorentzian Spectral Functions for Coulomb Systems <i>D. Semkat, M. Bonitz</i>	504
Thermodynamic Properties of Correlated Strongly Degenerate Plasmas <i>V.S. Filinov, P.R. Levashov, V.E. Fortov, M. Bonitz</i>	513
Quantum Dynamics in Phase Space <i>V.S. Filinov</i>	521
Tunneling Times of Wave Packets: an Application of the Method of Quantum Trajectories in the Wigner Representation <i>A. V. Filinov, Yu. E. Lozovik</i>	529
Conclusion and Outlook	564
