

TABLE OF CONTENTS

Preface	ix
Remarks on Domain-wall fermions <i>M. Creutz</i>	1
Domain-wall fermions in vector theories <i>P.M. Vranas</i>	11
Better Domain-wall fermions <i>Y. Shamir</i>	27
Truncated overlap fermions: The link between overlap and Domain-wall fermions <i>A. Boriçi</i>	41
Topology and chiral symmetry in QCD with overlap fermions <i>R.G. Edwards, U.M. Heller, J. Kiskis, R. Narayanan</i>	53
First Experiences with HMC for Dynamical Overlap Fermions <i>A. Bode, U.M. Heller, R.G. Edwards, R. Narayanan</i>	65
Some answered and unanswered questions about the structure of the set of fermionic Actions with GWL symmetry <i>I. Horváth</i>	69
Optimizing chirality and scaling of lattice fermions <i>W. Bietenholz</i>	77
Chiral symmetry breaking in strongly coupled 1+1 dimensional lattice gauge theories <i>F. Berruto, G. Grignani, P. Sodano</i>	91
Regularization and anomalies in gauge theory <i>K. Fujikawa</i>	99
Chiral symmetry outside perturbation theory <i>H. Neuberger</i>	113
Dirac operator normality and chiral fermions on the lattice <i>W. Kerler</i>	125
Abelian and nonabelian lattice chiral gauge theories through gauge fixing <i>W. Bock, M. Golterman, K.C. Leung, Y. Shamir</i>	137
On the eta-invariant in the 4D chiral U(1) theory <i>V. Boryakov, A. Hoferichter, A. Thimm, G. Schierholz</i>	153

Overview of the chiral fermions on 2D Torus <i>N.V. Zverev</i>	163
't Hooft vertex in the chiral schwinger model <i>V. Borneyakov, A. Hoferichter, A. Thimm, G. Schierholz</i>	173
Multifield effective action for lattice QCD <i>A.A. Slavnov</i>	183
An investigation of a new multiboson algorithm proposed by Slavnov <i>T.D. Bakeyev</i>	195
Quenched QCD near the chiral limit <i>M. Göckeler, P.E.L. Rakow, R. Horsley, D. Petters, D. Pleiter, G. Schierholz</i>	201
Decorrelation of the topological charge in tempered simulations of full QCD <i>H. Stüben</i>	211
Computational costs of future QCD simulations in the deep chiral regime <i>Th. Lippert, K. Schilling</i>	219
Some considerations on lattice gauge fixing <i>M. Testa</i>	235
Remarks on lattice gauge fixing <i>S. Petrarca</i>	245
Preliminary results with lattice covariant gauge <i>L. Giusti, M.L. Paciello, S.Petrarca, B. Taglienti</i>	253
Lorentz gauge fixing and lattice QED <i>I.L. Bogolubsky, V. K. Mitrjushkin, M. Müller-Preussker, P.Peter, N.V. Zverev</i>	257
Instantons versus monopoles <i>P. van Baal</i>	269
Classical solutions and the vacuum structure in lattice gauge theories <i>V.K. Mitrjushkin</i>	281
On the topological structure of the QCD vacuum <i>I.-O. Stamatescu</i>	287
Instantons and fermions on the lattice <i>T.G. Kovács</i>	299
Phononlike excitations of instanton liquid and new scale of non-perturbative QCD <i>S.V. Molodtsov, A.M. Snigirev, G.M. Zinovjev</i>	307

Vortices and confinement <i>T.G. Kovács, E.T. Tomboulis</i>	315
Some pieces of lattice evidence in favor of the center-vortex picture of color confinement <i>M. Faber, J. Greensite, Š. Olejník, D. Yamada</i>	327
Embedded vortices and their interactions at electroweak crossover <i>M.N. Chernodub, E.-M. Ilgenfritz, A. Schiller</i>	335
Chirality carried by monopoles <i>H. Markum, W. Sakuler, S. Thurner</i>	339
Half-integer topological charges below and above the deconfinement Transition? <i>E.-M. Ilgenfritz, M. Müller-Preussker, A.I. Veselov</i>	345
Phase structure of hot gauge theories with matter fields <i>O. Borisenko, G. Zinovjev, M. Faber</i>	353
Random matrix theory and Dirac spectrum at nonzero temperature and density <i>B.A. Berg, H. Markum, R. Pullirsch, T. Wettig</i>	357
Short strings and new physics perspectives in QCD <i>F.V. Gubarev, V.I. Zakharov, M.N. Chernodub, M.I. Polikarpov</i>	369
List of Participants	381
