

# Fundamentals of Plasma Physics and Controlled Fusion

Kenro Miyamoto

## Contents

### Preface

<b>1 Nature of Plasma .....</b>	<b>1</b>
1.1 Introduction .....	1
1.2 Charge Neutrality and Landau Damping .....	1
1.3 Fusion Core Plasma .....	3
<b>2 Plasma Characteristics .....</b>	<b>7</b>
2.1 Velocity Space Distribution Function, Electron and Ion Temperatures .....	7
2.2 Plasma Frequency, Debye Length .....	8
2.3 Cyclotron Frequency, Larmor Radius .....	9
2.4 Drift Velocity of Guiding Center .....	10
2.5 Magnetic Moment, Mirror Confinement, Longitudinal Adiabatic Constant .....	12
2.6 Coulomb Collision Time, Fast Neutral Beam Injection .....	14
2.7 Runaway Electron, Dreicer Field .....	18
2.8 Electric Resistivity, Ohmic Heating .....	19
2.9 Variety of Time and Space Scales in Plasmas .....	19
<b>3 Magnetic Configuration and Particle Orbit .....</b>	<b>21</b>
3.1 Maxwell Equations .....	21
3.2 Magnetic Surface .....	23
3.3 Equation of Motion of a Charged Particle .....	24
3.4 Particle Orbit in Axially Symmetric System .....	26
3.5 Drift of Guiding Center in Toroidal Field .....	28
a Guiding Center of Circulating Particles	
b Guiding Center of Banana Particles	
3.6 Orbit of Guiding Center and Magnetic Surface .....	31
3.7 Effect of Longitudinal Electric Field on Banana Orbit .....	32
<b>4 Velocity Space Distribution Function and Boltzmann's Equation .....</b>	<b>35</b>
4.1 Phase Space and Distribution Function .....	35
4.2 Boltzmann's Equation and Vlasov's Equation .....	36
<b>5 Plasma as Magnetohydrodynamic Fluid .....</b>	<b>39</b>
5.1 Magnetohydrodynamic Equations for Two Fluids .....	39
5.2 Magnetohydrodynamic Equations for One Fluid .....	41
5.3 Simplified Magnetohydrodynamic Equations .....	42

5.4	Magnetoacoustic Wave .....	44
<b>6</b>	<b>Equilibrium .....</b>	<b>47</b>
6.1	Pressure Equilibrium .....	47
6.2	Equilibrium Equation for Axially Symmetric and Translationally Symmetric Systems .	48
6.3	Tokamak Equilibrium .....	50
6.4	Poloidal Field for Tokamak Equilibrium .....	56
6.5	Upper Limit of Beta Ratio .....	58
6.6	Pfirsch-Schlüter Current .....	59
6.7	Virial Theorem .....	61
<b>7</b>	<b>Diffusion of Plasma, Confinement Time .....</b>	<b>65</b>
7.1	Collisional Diffusion (Classical Diffusion) .....	66
a	Magnetohydrodynamic Treatment	
b	A Particle Model	
7.2	Neoclassical Diffusion of Electrons in Tokamak .....	69
7.3	Fluctuation Loss, Bohm Diffusion, and Stationary Convective Loss .....	71
7.4	Loss by Magnetic Fluctuation .....	74
<b>8</b>	<b>Magnetohydrodynamic Instabilities .....</b>	<b>77</b>
8.1	Interchange, Sausage and Kink Instabilities .....	77
a	Interchange Instability	
b	Stability Criterion for Interchange Instability, Magnetic Well	
c	Sausage Instability	
d	Kink Instability	
8.2	Formulation of Magnetohydrodynamic Instabilities .....	85
a	Linearization of Magnetohydrodynamic Equations	
b	Energy Principle	
8.3	Instabilities of a Cylindrical Plasma .....	90
a	Instabilities of Sharp-Boundary Configuration: Kruskal-Shafranov Condition	
b	Instabilities of Diffuse-Boundary Configurations	
c	Suydam's Criterion	
d	Tokamak Configuration	
e	Reversed Field Pinch	
8.4	Hain-Lüst Magnetohydrodynamic Equation .....	102
8.5	Ballooning Instability .....	103
8.6	$\eta_i$ Mode due to Density and Temperature Gradient .....	107
<b>9</b>	<b>Resistive Instability .....</b>	<b>111</b>
9.1	Tearing Instability .....	111
9.2	Resistive Drift Instability .....	115
<b>10</b>	<b>Plasma as Medium of Electromagnetic Wave Propagation .....</b>	<b>121</b>
10.1	Dispersion Equation of Waves in a Cold Plasma .....	121
10.2	Properties of Waves .....	124
a	Polarization and Particle Motion	
b	Cutoff and Resonance	
10.3	Waves in a Two-Components Plasma .....	126
10.4	Various Waves .....	129
a	Alfvén Wave	
b	Ion Cyclotron Wave and Fast Wave	
c	Lower Hybrid Resonance	
d	Upper Hybrid Resonance	

e Electron Cyclotron Wave	
10.5 Conditions for Electrostatic Waves .....	134
<b>11 Landau Damping and Cyclotron Damping .....</b>	<b>137</b>
11.1 Landau Damping (Amplification) .....	137
11.2 Transit-Time Damping .....	140
11.3 Cyclotron Damping .....	140
11.4 Quasi-Linear Theory of Evolution in the Distribution Function .....	142
<b>12 Wave Propagation and Wave Heating .....</b>	<b>145</b>
12.1 Energy Flow .....	145
12.2 Ray Tracing .....	149
12.3 Dielectric Tensor of Hot Plasma, Wave Absorption and Heating .....	150
12.4 Wave Heating in Ion Cyclotron Range of Frequency .....	154
12.5 Lower Hybrid Wave Heating .....	157
12.6 Electron Cyclotron Heating .....	160
<b>13 Velocity Space Instabilities (Electrostatic Waves) .....</b>	<b>163</b>
13.1 Dispersion Equation of Electrostatic Wave .....	163
13.2 Two Streams Instability .....	164
13.3 Electron Beam Instability .....	165
13.4 Harris Instability .....	165
<b>14 Instabilities driven by Energetic Particles .....</b>	<b>169</b>
14.1 Fishbone Instability .....	169
a Formulation	
b MHD Potential Energy	
c Kinetic Integral of Hot Component	
d Growth Rate of Fishbone Instability	
14.2 Toroidal Alfvén Eigenmodes .....	176
a Toroidicity Induced Alfvén Eigenmode	
b Instabilities of TAE Driven by Energetic Particles	
c Various Alfvén Modes	
<b>15 Development of Fusion Researches .....</b>	<b>189</b>
<b>16 Tokamak .....</b>	<b>197</b>
16.1 Tokamak Devices .....	197
16.2 Equilibrium .....	201
a Case with Conducting Shell	
b Case without Conducting Shell	
c Equilibrium Beta Limit of Tokamaks with Elongated Plasma Cross Section	
16.3 MHD Stability and Density Limit .....	203
16.4 Beta Limit of Elongated Plasma .....	205
16.5 Impurity Control, Scrape-Off Layer and Divertor .....	206
16.6 Confinement Scaling of L Mode .....	210
16.7 H Mode and Improved Confinement Modes .....	212
16.8 Noninductive Current Drive .....	217
a Lower Hybrid Current Drive	
b Electron Cyclotron Current Drive	
c Neutral Beam Current Drive	
d Bootstrap Current	
16.9 Neoclassical Tearing Mode .....	226
16.10 Resistive Wall Mode .....	232

a	Growth Rate of Resistive Wall Mode	
b	Feedback Stabilization of Resistive Wall Mode	
16.11	Parameters of Tokamak Reactor .....	239
17	Non-Tokamak Confinement System .....	247
17.1	Reversed Field Pinch .....	247
a	Reversed Field Pinch Configuration	
b	MHD Relaxation	
c	Confinement	
d	Oscillating Field Current Drive	
17.2	Stellarator .....	251
a	Helical Field	
b	Stellarator Devices	
c	Neoclassical Diffusion in Helical Field	
d	Confinement of Stellarator Plasmas	
17.3	Open End Systems .....	260
a	Confinement Times in Mirrors and Cusps	
b	Confinement Experiments with Mirrors	
c	Instabilities in Mirror Systems	
d	Tandem Mirrors	
18	Inertial Confinement .....	269
18.1	Pellet Gain .....	269
18.2	Implosion .....	272
<b>Appendix</b>		
A	Derivation of MHD Equations of Motion .....	277
B	Energy Integral of Axisymmetric Toroidal System .....	281
B.1	Energy Integral in Illuminating Form .....	281
B.2	Energy Integral of Axisymmetric Toroidal System .....	283
B.3	Energy Integral of High $n$ Ballooning Modes .....	288
C	Derivation of Dielectric Tensor in Hot Plasma .....	291
C.1	Formulation of Dispersion Relation in Hot Plasma .....	291
C.2	Solution of Linearized Vlasov Equation .....	292
C.3	Dielectric Tensor of Hot Plasma .....	293
C.4	Dielectric Tensor of bi-Maxwellian Plasma .....	296
C.5	Dispersion Relation of Electrostatic Wave .....	297
C.6	Dispersion Relation of Electrostatic Wave in Inhomogenous Plasma .....	298
<b>Physical Constants, Plasma Parameters and Mathematical Formula</b> .....		303
<b>Index</b> .....		307
